Modern Paints Uncovered - Getty Conservation Institute 2007

Over the past seventy years, a staggering array of new pigments and binders has been developed and used in the production of paint, and twentieth-century artists readily applied these materials to their canvases. Paints intended for houses, boats, cars, and other industrial applications frequently turn up in modern art collections, posing new challenges for paintings conservators. This volume presents the papers and posters from "Modern Paints Uncovered," a symposium organized by the Getty Conservation Institute, Tate, and the National Gallery of Art and held at Tate Modern, London, in May 2006. Professionals from around the world shared the results of research on paints that have been available to artists since 1930--the date that synthetic materials began to significantly impact the paint industry. Modern Paints Uncovered showcases the varied strands of cutting-edge research into the conservation of contemporary painted surfaces. These include paint properties and surface characteristics, analysis and identification, aging behavior, and safe and effective conservation techniques.

Cardiopulmonary Critical Care - David R. Dantzker 1998

Provides current insights into critical abnormalities of the heart and lungs. The 3rd Edition includes chapters on microcirculation, regional distribution of blood flow, methods of increasing oxygen delivery, septic shock, environmental lung injury, and the effects of high pressure environments. Much more focused toward the critical care aspects of cardiopulmonary disorders. Emphasizes the growing knowledge of the chemical basis for tissue injury and the role that inflammatory mediators play in cardiocirculatory failure in chapters on asthma, sepsis, respiratory distress, and septic shock. Provides brand-new chapters on the effects of injury in unusual situations such as diving and high altitude. Discusses modern concepts in the treatment of myocardial infarction, arrhythmias, adult respiratory distress syndrome, sepsis, pneumonia, and much more. Reviews the effects of various ventilatory modes on pulmonary and circulatory function. FEATURES: Divides content into three sections: the pathophysiologic basis of cardiorespiratory failure, general principles of treating patients with cardiac, circulatory, and respiratory failure, and the clinical care of specific cardiac, circulatory, and respiratory diseases encountered in critical care. Discusses current topics of importance, including the role of cytokines in acute pulmonary injury, the biochemical basis of myocardial function, the control of cardiac output in normal and abnormal situations, oxygen transport and utilization, pulmonary mechanics in critical care, intensive care radiology, invasive and noninvasive treatment of acute and chronic respiratory failure, and more.

Handbook on Medical Student Evaluation and Assessment - Alliance for Clinical Education 2015-07-17

The Alliance for Clinical Education (ACE) is proud to announce its newest text, the Handbook on Medical Student Evaluation and Assessment. This comprehensive book derives from some chapters in the indispensable fourth edition of the Guidebook for Clerkship Directors, but expands upon those chapters and contains critical new information about milestones, professionalism, and program evaluation. It is useful not only for clerkship directors, but also for preclinical educators, teachers of electives and subinternships, the dean's office, the student affairs office, residency and fellowship program directors, and anyone who teaches, advises, or mentors medical students. It discusses all aspects of assessing learners, with well-referenced presentations starting from basic definitions, progressing through various assessment methods, and including reviews of the legal aspects of assessments.

Principles of Critical Care, 4th edition - John Kress 2015-06-02

Quickly and accurately diagnose and treat the critically ill patient with

guidance from the field's definitive text "...Clearly the finest textbook available in the field." -- Critical Care Medicine journal "...Very well done...unusually user-friendly...excellent...a significant contribution to the field. It should be placed not only in the critical care practitioner's library, but also in the rounds and nurses' conference rooms of critical care units." -- Journal of the American Medical Association Considered the field's definitive text, Principles of Critical Care offers unmatched coverage of the diagnosis and treatment of the most common problems encountered in the practice of critical care. Written by expert critical care physicians who are also experienced teachers, the book features an organization, thoroughness, and clarity not found in any other reference on the topic. Within its pages, you will find comprehensive, authoritative discussion of every aspect of critical care medicine essential to successful clinical practice, ranging from basic principles to the latest technologies. The fourth edition is highlighted by: A new full-color presentation NEW CHAPTERS on ICU Ultrasound, Extracorporeal Membrane Oxygenation, ICU-Acquired Weakness, Abdominal Compartment Syndrome, and Judging the Adequacy of Intravascular Volume The addition of many new figures and diagnostic and treatment algorithms In-depth, up-to-date descriptions of the unique presentation, differential diagnosis, and management of specific critical illnesses A logical organ system approach that simplifies the search for thorough and practical information necessary to manage a patient's specific condition The integration of pathophysiology throughout the text Content that reflects today's interdisciplinary approach to critical care medicine *Reviews are of previous editions

Applied Manure and Nutrient Chemistry for Sustainable Agriculture and Environment - Zhongqi He 2014-04-07

Due to the rapid increase in world population and improving living standards, the global agriculture sector is confronting with challenges for the sustainability of agricultural production and of the environment. Intensive high-yield agriculture is typically dependent on addition of fertilizers (synthetic chemicals, animal manure, etc.). However, non-point nutrient losses from agricultural fields due to fertilization could adversely impact the environment. Increased knowledge on plant nutrient chemistry is required for improving utilization efficiency and minimizing losses from both inorganic and organic nutrient sources. For this purpose, the book is composed of 19 chapters that highlight recent research activities in applied nutrient chemistry geared toward sustainable agriculture and environment. Topics of interest include, but are not limited, to speciation, quantification, and interactions of various plant nutrients and relevant contributors in manure, soil, and plants. This book outlooks emerging researchable issues on alternative utilization and environmental monitoring of manure and other agricultural by products that may stimulate new research ideas and direction in the relevant fields.

Christian Reflections on The Leadership Challenge - James M. Kouzes 2009-04-20

Christian Reflections on The Leadership Challenge is a faith-based companion to the best-selling leadership book of all time--The Leadership Challenge. Grounded in Jim and Barry's time-tested research, Christian Reflections on The Leadership Challenge describes their Five Practices of Exemplary Leadership® --Model the Way, Inspire a Shared Vision, Challenge the Process, Enable Others to Act, and Encourage the Heart--and offers practical guidance and inspiring examples about how Christian leaders can have a powerful impact in their workplaces, communities, and congregations by bringing their faith into their leadership. In addition to Jim and Barry's foundational wisdom, the book

brings together five leaders who reflect on the Five Practices from a Christian perspective. John C. Maxwell, David McAllister-Wilson, Patrick Lencioni, Nancy Ortberg, and Ken Blanchard share insights and stories culled from personal experience and the lives of other Christian leaders who have accomplished extraordinary things in churches, communities, classrooms, and corporations. Their thoughtful reflections on the role of faith in leadership will propel leaders and aspiring leaders

How to Think Seriously about the Planet - Roger Scruton 2014-10

"In *How to Think Seriously About the Planet*, Roger Scruton rejects the popular left-wing view that international capitalism, consumerism, and over-exploitation of natural resources are the chief threats to the planet. Such a view necessitates top-down interventions, which Scruton contends are ineffective unless rooted in small-scale practical reasoning. Rather than entrusting the environment to unwieldy NGOs and international committees, Scruton argues, we must assume personal responsibility and foster local control over our environment."--Back cover.

Brian's Winter - Gary Paulsen 2012-03-13

From three-time Newbery Honor-winning author Gary Paulsen comes a beloved follow-up to his award-winning classic *Hatchet* that asks: What if Brian hadn't been rescued and had to face his deadliest enemy yet--winter? In the Newbery Honor-winning *Hatchet*, thirteen-year-old Brian Robeson learned to survive alone in the Canadian wilderness, armed only with his hatchet. As millions of readers know, he was rescued at the end of the summer. But what if that hadn't happened? What if Brian had been left to face his deadliest enemy--winter? Brian Paulsen raises the stakes for survival in this riveting and inspiring story as one boy confronts the ultimate adventure. "Paulsen picks *Hatchet's* story up in midstream; read together, the two books make his finest tale of survival yet." --Kirkus Reviews, Starred "Breathtaking descriptions of nature . . . Paulsen fans will not be disappointed." --School Library Journal Read all the *Hatchet Adventures!* Brian's Winter The River Brian's Return Brian's Hunt

Nontraditional Careers for Chemists - Lisa M. Balbes 2007

"Contrary to what some people think, an education and background in chemistry prepares you for much more than just a laboratory career. The broad science education, logical and analytical thinking, research methods, and other professional skills are of value to a wide variety of employers, and are essential for a plethora of positions. In addition, those who are interested in chemistry tend to have some similar personality characteristics, which lead to success in certain types of positions. Realizing these two things opens up a world of possibilities for the professional chemist, and allows the selection of a career path that truly is the best fit for your own personal skills, abilities, and interests." "Each chapter in this book provides background information on a nontraditional field and a variety of positions within that field, including typical tasks, education or training requirements, and personal characteristics that contribute to a successful career. Each chapter also contains detailed profiles of several chemists who have achieved success and personal satisfaction in various types of positions in that field. These interesting and varied career histories explain how these chemists got where they are, details what motivates them, and gives advice for others considering the same path, in both the short and long term." "Specific career fields profiled include communication, chemical information, patents, sales and marketing, business development, regulatory affairs, public policy, safety, human resources, and computers, among others. Along the way you will learn how to seek out and evaluate new career options, so even if none of the careers profiled is right for you, you can continue the exploration on your own until you find the one that is."-- Back cover.

Management - James Arthur Finch Stoner 1995-01

This edition continues its strong research orientation and solid theoretical underpinnings. The general theme of the sixth edition is dynamic engagement - a broad term that captures the essence of change confronting future managers, and current thinking on what they will need to succeed. The material presented revolves around the themes of ethics, globalization, entrepreneurship and small businesses, cultural diversity, and quality. This work is appropriate for students following courses in the Principles of Management.

Conservation Biology for All - Navjot S. Sodhi 2010-01-08

Conservation Biology for All provides cutting-edge but basic conservation science to a global readership. A series of authoritative chapters have been written by the top names in conservation biology with the principal aim of disseminating cutting-edge conservation knowledge as widely as

possible. Important topics such as balancing conservation and human needs, climate change, conservation planning, designing and analyzing conservation research, ecosystem services, endangered species management, extinctions, fire, habitat loss, and invasive species are covered. Numerous textboxes describing additional relevant material or case studies are also included. The global biodiversity crisis is now unstoppable; what can be saved in the developing world will require an educated constituency in both the developing and developed world. Habitat loss is particularly acute in developing countries, which is of special concern because it tends to be these locations where the greatest species diversity and richest centres of endemism are to be found. Sadly, developing world conservation scientists have found it difficult to access an authoritative textbook, which is particularly ironic since it is these countries where the potential benefits of knowledge application are greatest. There is now an urgent need to educate the next generation of scientists in developing countries, so that they are in a better position to protect their natural resources.

Advances in Social and Occupational Ergonomics - Richard H.M.

Goossens 2019-06-06

This book reports on cutting-edge research on social and occupational ergonomics, presenting innovative contributions to the optimization of sociotechnical management systems related to organizational, policy, and logistical issues. It discusses timely topics related to communication, crew resource management, work design, participatory design, as well as teamwork, community ergonomics, cooperative work, and warning systems, and explores new work paradigms, organizational cultures, virtual organizations, telework, and quality management. The book also describes pioneering infrastructures implemented for different purposes such as urban, health, and enterprise, and examines the changing role of automated systems, offering innovative solutions that address the needs of particular populations. Based on the AHFE 2019 International Conference on Social and Occupational Ergonomics, held on July 24-28, 2019, Washington D.C, USA, the book provides readers with a comprehensive overview of the current challenges in both organizational and occupational ergonomics, highlighting key connections between them and underlining the importance of emotional factors in influencing human performance.

Evidence-Based Approach to Phytochemicals and Other Dietary Factors - Jane Higdon 2012-07-18

From Reviews of the First Edition: Dr. Higdon has given the healthcare providers, especially dietitians, nurses, physicians, and researchers who seek to understand phytochemicals an authoritative yet easy to use book.-- *Phytomedicine: International Journal of Phytotherapy & Phytopharmacology* I highly recommend this monograph for physicians, dietitians, and other health practitioners as well as the health-aware public. It captures what you need to know in a succinct but comprehensive fashion. -- *American Journal of Lifestyle Medicine* Now in a completely updated second edition, *An Evidence-based Approach to Dietary Phytochemicals and Other Dietary Factors* is a trusted resource for all health professionals who need to interpret the explosion of information on the role of a plant-based diet in health and disease. It consolidates a wealth of scientifically accurate, peer-reviewed data on plant foods, dietary phytochemicals, and dietary supplements, and includes information on essential intake recommendations, dietary sources, nutrient and drug interactions, phytochemicals in disease prevention, possible adverse effects, and much more. Special features: All chapters revised and updated, with new sections on choline, coenzyme Q10, L-Carnitine, lipoic acid, and other dietary factors Logically structured for quick access to information begins with the evidence-based benefits of fruits and vegetables, legumes, nuts, whole grains, coffee, and tea; and goes on to the scientific and clinical data on individual dietary phytochemicals and classes of phytochemicals, including carotenoids, flavonoids, fiber, and more Summaries at the end of each chapter for rapid review Peer-reviewed by experts in the field, ensuring that all material is accurate and up-to-date The well-constructed appendix includes not only a quick reference to diseases and foods and where to find them in the book; but also useful tables on phytochemical-drug interactions, phytochemical-nutrient interactions, and phytochemical-rich foods; a summary of the glycemic index of dietary carbohydrates; and a comprehensive glossary of terms Concisely synthesizing a huge amount of epidemiological and clinical research and emphasizing the importance of a phytochemical-rich diet over dietary supplements, this book is ideal for nutritionists, dietitians, nurses, and other health care professionals who need to educate patients about sound food choices. Students in graduate programs in nutrition, food

science, pharmacy, and allied health fields will also find the abundance of rigorous, scientifically accurate information essential in their studies.

The Battle over Patents - Stephen H. Haber 2021-08-06

An examination of how the patent system works, imperfections and all, to incentivize innovation Do patents facilitate or frustrate innovation?

Lawyers, economists, and politicians who have staked out strong positions in this debate often attempt to validate their claims by invoking the historical record--but they frequently get the history wrong. The Battle over Patents gets it right. Bringing together thoroughly researched essays from prominent historians and social scientists, this volume traces the long and contentious history of patents and examines how they have worked in practice. Editors Stephen H. Haber and Naomi R. Lamoreaux show that patent systems are the result of contending interests at different points in production chains battling over economic surplus. The larger the potential surplus, the more extreme are the efforts of contending parties--now and in the past--to search out, generate, and exploit any and all sources of friction. Patent systems, as human creations, are therefore necessarily ridden with imperfections. This volume explores these shortcomings and explains why, despite all the debate, historically US-style patent systems still dominate all other methods of encouraging inventive activity.

Multicriteria-based Ranking for Risk Management of Food-borne Parasites - Pascal Boireau 2014

This product documents the process by which foodborne parasites were ranked from a global food safety perspective and provides a ranking and information on all the top ranked parasites both generally and from a regional perspective. It directly supports the establishment of international standards on foodborne parasites by the Codex Alimentarius which are agreed by countries and can then be used as a basis for improving the safety of specific products and facilitation their trade internationally. These in turn directly contribute to the SO by promoting more efficient and inclusive trade.

The 8-Hour Diet - David Zinczenko 2013-12-03

A paradigm-shifting diet plan that allows you to eat anything you want, as much as you want—and still strip away 20, 40, 60 pounds, or more. After conducting extensive research at the Salk Institute and the National Institute on Aging, poring over copious amounts of new research in intermittent fasting, and engaging 2,000 people for a test panel, bestselling authors David Zinczenko and Peter Moore determined that people can lose remarkable amounts of weight eating the foods they like best—as long as they eat within a set 8-hour time period. Fasting is, of course, an ancient spiritual and health practice, but it's also a way to sidestep many of the ills of the modern world—including diabetes, heart disease, and cognitive impairment. Zinczenko and Moore demonstrate how simply observing this timed-eating strategy, even just three days a week, will reset your metabolism so that you can enter fat-burning mode first thing in the morning—and stay there all day long. And by focusing on eight critical, nutrient-rich Powerfoods, you can build in a second layer of protection against Alzheimer's, heart disease, and even the common cold. In the book, you will find motivating strategies, delicious recipes, and an 8-minute workout routine to maximize calorie burn. The 8-Hour Diet promises to strip away unwanted pounds and give you the focus and willpower you need to reach your goals for weight loss and life.

Preharvest Food Safety - Siddhartha Thakur 2020-07-10

An overview of farm-to-fork safety in the preharvest realm Foodborne outbreaks continue to take lives and harm economies, making controlling the entry of pathogens into the food supply a priority. Preharvest factors have been the cause of numerous outbreaks, including Listeria in melons, Salmonella associated with tomatoes, and Shiga toxin-producing E.coli in beef products, yet most traditional control measures and regulations occur at the postharvest stage. Preharvest Food Safety covers a broad swath of knowledge surrounding topics of safety at the

preharvest and harvest stages, focusing on problems for specific food sources and food pathogens, as well as new tools and potential solutions. Led by editors Siddhartha Thakur and Kalmia Kniel, a team of expert authors provides insights into critical themes surrounding preharvest food safety, including Challenges specific to meat, seafood, dairy, egg, produce, grain, and nut production Established and emerging foodborne and agriculture-related pathogens Influences of external factors such as climate change and the growing local-foods trend Regulatory issues from both US and EU perspectives Use of pre- and probiotics, molecular tools, mathematical modeling, and one health approaches Intended to encourage the scientific community and food industry stakeholders to advance their knowledge of the developments and challenges associated with preharvest food safety, this book addresses the current state of the field and provides a diverse array of chapters focused on a variety of food commodities and microbiological hazards.

The White House Conference for a Drug Free America - White House Conference for a Drug Free America 1988

Abstract: This is the final report of the White House Conference for a Drug Free America presented to the President of the United States and members of the 100th Congress. The primary aim of this conference was to gather integrated view points from American citizens on how to solve illegal drug problems in the country. The opinions of the following among others were sought: law enforcement, health care and research professionals; corporate and labor leaders; parents; and educators. The report examines the scope of the drug problem, the evolution of the situation, and offers some solutions. Emphasis is placed on prevention recommendations. Resources on drug issues, recommended reading, and audiovisual materials are included.

The International Corporate 1000 - R. Whiteside 2012-12-06

The International Corporate 1000 represents a joint venture between Monitor Publishing Company of Washington, DC, and Graham & Trotman Limited of London. Monitor Publishing Company is well known as the publisher of The Federal Yellow Book, The Congressional Yellow Book, and The Corporate 1000. Graham & Trotman's annual directories providing data on the major companies in many parts of the world are equally established. The two publishing companies have pooled their expertise in this joint venture to research, compile and publish The International Corporate 1000, A Directory of/Who Runs The World's 1000 Leading Corporations. The directory was designed to help you identify and contact the senior executives who lead and manage these companies. Accordingly, you will find extensive, valuable detail about who does what, and how to reach them, but you will find little financial or statistical data. We have designed the book in this way because we believe there is a great need for an accurate and current executive directory, whereas a wealth of financial data is already available from many different sources. The organization of the directory is by key geographical region, then by major country within each region, and then alphabetically by company within each country.

Quantile Regression - Roger Koenker 2005-05-05

Quantile regression is gradually emerging as a unified statistical methodology for estimating models of conditional quantile functions. By complementing the exclusive focus of classical least squares regression on the conditional mean, quantile regression offers a systematic strategy for examining how covariates influence the location, scale and shape of the entire response distribution. This monograph is the first comprehensive treatment of the subject, encompassing models that are linear and nonlinear, parametric and nonparametric. The author has

devoted more than 25 years of research to this topic. The methods in the analysis are illustrated with a variety of applications from economics, biology, ecology and finance. The treatment will find its core audiences in econometrics, statistics, and applied mathematics in addition to the disciplines cited above.

Conservation Biology in Sub-Saharan Africa - Richard Primack 2019-09-10

Conservation Biology in Sub-Saharan Africa comprehensively explores the challenges and potential solutions to key conservation issues in Sub-Saharan Africa. Easy to read, this lucid and accessible textbook includes fifteen chapters that cover a full range of conservation topics, including threats to biodiversity, environmental laws, and protected areas management, as well as related topics such as sustainability, poverty, and human-wildlife conflict. This rich resource also includes a background discussion of what conservation biology is, a wide range of theoretical approaches to the subject, and concrete examples of conservation practice in specific African contexts. Strategies are outlined to protect biodiversity whilst promoting economic development in the region. Boxes covering specific themes written by scientists who live and work throughout the region are included in each chapter, together with recommended readings and suggested discussion topics. Each chapter also includes an extensive bibliography. Conservation Biology in Sub-Saharan Africa provides the most up-to-date study in the field. It is an essential resource, available on-line without charge, for undergraduate and graduate students, as well as a handy guide for professionals working to stop the rapid loss of biodiversity in Sub-Saharan Africa and elsewhere.

The Adelaide Dental School 1917 To 2017 - James Rogers 2018-08-31

This history considers 100 years of education at the Adelaide Dental School. It contains a history of the formation and development of the School from 4 October 1917, the date the establishment of a dental school that would be affiliated with the university and the hospital for the education of dental students was first proposed. It also contains three chapters in which former students of the Dental School provide personal viewpoints of their education at the Adelaide Dental School. The final section contains a potpourri of archival material, including copies of documents and examples of lecture notes and examination papers.

University Social Responsibility and Quality of Life - Daniel T. L. Shek 2017-03-27

This book provides a critical review of the theory and practice of University Social Responsibility. In addition to addressing the nature of and concepts surrounding University Social Responsibility, as well as its ties to areas such as service learning or engaged scholarship, the book also presents effective practices from around the world. Dedicated chapters demonstrate how University Social Responsibility can manifest itself in different types (civic, moral, economic or global responsibility), levels (local, national, regional or international), and formats (partnership, venture or joint project), depending on local contexts and needs. The book also focuses on three areas of work - educating students to take on social responsibility, broadening access to education, and applying knowledge to societal problems - to highlight the potential and viable ways University Social Responsibility can be employed to promote quality of life in society. Offering a unique resource, it is intended to stimulate thinking and expand the repertoire of all educators, administrators, and organizations who wish to incorporate societal needs into their core mission and promote quality of life in different

communities around the world.

From Higher Aims to Hired Hands - Rakesh Khurana 2010-03-22

Is management a profession? Should it be? Can it be? This major work of social and intellectual history reveals how such questions have driven business education and shaped American management and society for more than a century. The book is also a call for reform. Rakesh Khurana shows that university-based business schools were founded to train a professional class of managers in the mold of doctors and lawyers but have effectively retreated from that goal, leaving a gaping moral hole at the center of business education and perhaps in management itself. Khurana begins in the late nineteenth century, when members of an emerging managerial elite, seeking social status to match the wealth and power they had accrued, began working with major universities to establish graduate business education programs paralleling those for medicine and law. Constituting business as a profession, however, required codifying the knowledge relevant for practitioners and developing enforceable standards of conduct. Khurana, drawing on a rich set of archival material from business schools, foundations, and academic associations, traces how business educators confronted these challenges with varying strategies during the Progressive era and the Depression, the postwar boom years, and recent decades of freewheeling capitalism. Today, Khurana argues, business schools have largely capitulated in the battle for professionalism and have become merely purveyors of a product, the MBA, with students treated as consumers. Professional and moral ideals that once animated and inspired business schools have been conquered by a perspective that managers are merely agents of shareholders, beholden only to the cause of share profits. According to Khurana, we should not thus be surprised at the rise of corporate malfeasance. The time has come, he concludes, to rejuvenate intellectually and morally the training of our future business leaders.

Excerpt from Free Negro Owners of Slaves in the United States in 1830: Together With Absentee Ownership of Slaves in the United States in 1830 The report on the Absentee Ownership of Slaves in the United States in 1830 attached hereto developed in a similar way. The investigators were impressed also with the frequent occurrence of such wide separation of the master from the slave. In noting the cases of free Negro ownership it was a simple matter, then, to record also the cases of absentee ownership, and it was done accordingly. Cyber Threats and Nuclear Weapons - Herbert Lin 2021-10-19

The technology controlling United States nuclear weapons predates the

Internet. Updating the technology for the digital era is necessary, but it comes with the risk that anything digital can be hacked. Moreover, using new systems for both nuclear and non-nuclear operations will lead to levels of nuclear risk hardly imagined before. This book is the first to confront these risks comprehensively. With *Cyber Threats and Nuclear Weapons*, Herbert Lin provides a clear-eyed breakdown of the cyber risks to the U.S. nuclear enterprise. Featuring a series of scenarios that clarify the intersection of cyber and nuclear risk, this book guides readers through a little-understood element of the risk profile that government decision-makers should be anticipating. What might have

happened if the Cuban Missile Crisis took place in the age of Twitter, with unvetted information swirling around? What if an adversary announced that malware had compromised nuclear systems, clouding the confidence of nuclear decision-makers? *Cyber Threats and Nuclear Weapons*, the first book to consider cyber risks across the entire nuclear enterprise, concludes with crucial advice on how government can manage the tensions between new nuclear capabilities and increasing cyber risk. This is an invaluable handbook for those ready to confront the unique challenges of cyber nuclear risk.
