Rediscovering Geography - Rediscovering Geography Committee 1997-04-11

As political, economic, and environmental issues increasingly spread across the globe, the science of geography is being rediscovered by scientists, policymakers, and educators alike. Geography has been made a core subject in U.S. schools, and scientists from a variety of disciplines are using analytical tools originally developed by geographers. Rediscovering Geography presents a broad overview of geography's renewed importance in a changing world. Through discussions and highlighted case studies, this book illustrates geography's impact on international trade, environmental change, population growth, information infrastructure, the condition of cities, the spread of AIDS, and much more. The committee examines some of the more significant tools for data collection, storage, analysis, and display, with examples of major contributions made by geographers. Rediscovering Geography provides a blueprint for the future of the discipline, recommending how to strengthen its intellectual and institutional foundation and meet the demand for geographic expertise among professionals and the public.

Rural Settlement Structure and African Development - Marilyn Silberfein 2019-09-13

This volume is the result of a group of researchers applying their insights and experience to a common theme. All the authors are concerned with rural development in Africa and all have focused on the connection between the development process and the arrangement of people and their built environment in rural space. Both anthropologists and geographers have contributed to the dialogue on this subject and representatives of the two disciplines are included in this volume. The members of this group have never all been in the same place at the same time, and so have utilized various electronic modes of communication to link their locations around the world. Two conferences were organized, however, among a subset of the whole, in order to generate a group discussion. One of these meetings was a symposium on African rural development held at Temple University while a second was organized at the African Studies Association Meetings in Toronto. Both opportunities helped raise issues that found their way into individual chapters. The audience in each case further stimulated our thinking.

Ethnic Landscapes of America - John A. Cross 2017-06-19

This volume provides a comprehensive catalog of how various ethnic groups in the United States of America have differently shaped their cultural landscape. Author John Cross links an overview

of the spatial distributions of many of the ethnic populations of the United States with highly detailed discussions of specific local cultural landscapes associated with various ethnic groups. This book provides coverage of several ethnic groups that were omitted from previous literature, including Italian-Americans, Chinese-Americans, Japanese-Americans, and Arab-Americans, plus several smaller European ethnic populations. The book is organized to provide an overview of each of the substantive ethnic landscapes in the United States. Between its introduction and conclusion, which looks towards the future, the chapters on the various ethnic landscapes are arranged roughly in chronological order, such that the timing of the earliest significant surviving landscape contribution determines the order the groups will be viewed. Within each chapter the contemporary and historical spatial distribution of the ethnic groups are described, the historical geography of the group's settlement is reviewed, and the salient aspects of material culture that characterize or distinguish the group's ethnic landscape are discussed. *Ethnic Landscapes of America* is designed for use in the classroom as a textbook or as a reader in a North American regional course or a cultural geography course. This volume also can function as a detailed summary reference that should be of interest to geographers, historians, ethnic scholars, other social scientists, and the educated public who wish to understand the visible elements of material culture that various ethnic populations have created on the landscape.

The Limits of Settlement Growth - Roland Fletcher 1995-09-29

A study of the effects of the built environment on long-term settlement development.

An Introduction to Settlement Geography - William Fredric Hornby 1991

This book presents both rural and urban settlement issues in a single and accessible text. The authors examine a range of spatial concepts and models and apply these to a variety of locations, providing students with both a general understanding of a broad range of study, and an in-depth knowledge of specific places. The general concepts are explored through varied case studies drawn from around the world. These look at issues ranging from socio-

economic change in rural Thailand and land reform in the Kenyan Highlands, to the social geography of Chicago and the changing morphology of an English country town. *Historical Collections of Ohio ... an Encyclopedia of the State* - Henry Howe 1907

Vermont Historical Reader - Edward Conant 1907

Settlement, Urbanization, and Population - Alan Bowman 2011-12-22

A collection of essays presenting new analyses of data and evidence for population and settlement patterns, particularly urbanization, in the Mediterranean world from 100 BC to AD 350.

Geography, Urbanisation and Settlement Patterns in the Roman Near East - Henry Innes MacAdam 2017-11-01

This title was first published in 2002: This volume focuses on the Roman provinces of Syria and Arabia, above all the lands now within Lebanon, Syria and Jordan. The first articles look at questions of geography, cartography and toponymy, particularly in Strabo, Pliny and Ptolemy. The following sections are concerned with settlement patterns and urban development in the region. In the Roman and early Byzantine periods, the inland areas underwent a gradual transformation, from a semi-sedentary, lightly populated and predominantly rural region, to one of large cities and a network of prosperous, socially sophisticated villages, linked by a network of roads. That change is documented by a wealth of epigraphy from both the urban communities and their outlying settlements (the subject of several articles). By the 4th century, too, Christianity had become the dominant religion and remained such until the arrival of Islam.

Rural Settlement and Land Use - Michael Chisholm 1968

Settlement Ecology - Glenn Davis Stone
2022-11-08

What determines agrarian settlement patterns? Glenn Davis Stone addresses this question by analyzing the spatial aspects of agrarian ecology--the relationship between how farmers

farm and where they settle--and how farming and settlement change as population density rises. Crosscutting the fields of cultural anthropology, archaeology, geography, and agricultural economics, *Settlement Ecology* presents a new perspective on the process of agricultural intensification and explores the relationships between intensification and settlement decision making. Stone insists that paleotechnic ("traditional") agriculture must be seen as a social process, with the social organization of agricultural work playing a key role in shaping settlement characteristics. These relationships are demonstrated in a richly documented case study of the Kofyar, who have been settling a frontier in the Nigerian savanna. The history of agricultural change and the development of the settlement pattern are reconstructed through ethnography, archival research, and aerial photos and are analyzed using innovative graphical methods. Stone also reflects on the limits of ecological determination of settlement, comparing the farming and settlement trajectories of the Kofyar and Tiv on the same frontier.

Rural Settlement in an Urban World - Michael Bunce 2017-11-20

Originally published in 1982, this book emphasizes the continued significance and distinctiveness of rural settlement, while at the same time recognizing the great changes of recent decades. The early chapters review the field of rural study and trace the evolution of man-land relationships in the establishment of the traditional elements of rural settlement. Later chapters discuss the changes wrought by urbanisation, the industrialisation and commercialisation of agriculture, the growth of recreation and the expanding role of public policy. The book stresses the processes which underlie rural settlement structure and, consistent with its geographical bias, the functional and cultural foundations of settled landscapes. While the main emphasis is on Europe and North America, the diversity of expression of general trends in rural settlement is recognised by drawing upon examples from Africa, India, Latin America and South-East Asia.

Liquid Landscape - Michele Currie Navakas 2018

The Violin Conspiracy - Brendan Slocumb 2022-02-01

GOOD MORNING AMERICA BOOK CLUB PICK!

• Ray McMillian is a Black classical musician on the rise—undeterred by the pressure and prejudice of the classical music world—when a shocking theft sends him on a desperate quest to recover his great-great-grandfather's heirloom violin on the eve of the most prestigious musical competition in the world. "I loved *The Violin Conspiracy* for exactly the same reasons I loved *The Queen's Gambit*: a surprising, beautifully rendered underdog hero I cared about deeply and a fascinating, cutthroat world I knew nothing about—in this case, classical music."

—Chris Bohjalian, #1 New York Times bestselling author of *The Flight Attendant* and *Hour of the Witch* Growing up Black in rural North Carolina, Ray McMillian's life is already mapped out. But Ray has a gift and a dream—he's determined to become a world-class professional violinist, and nothing will stand in his way. Not his mother, who wants him to stop making such a racket; not the fact that he can't afford a violin suitable to his talents; not even the racism inherent in the world of classical music. When he discovers that his beat-up, family fiddle is actually a priceless Stradivarius, all his dreams suddenly seem within reach, and together, Ray and his violin take the world by storm. But on the eve of the renowned and cutthroat Tchaikovsky Competition—the Olympics of classical music—the violin is stolen, a ransom note for five million dollars left in its place. Without it, Ray feels like he's lost a piece of himself. As the competition approaches, Ray must not only reclaim his precious violin, but prove to himself—and the world—that no matter the outcome, there has always been a truly great musician within him.

China's Island Frontier - Ronald G. Knapp 2019-03-31

Until the seventeenth century, Professor Knapp reminds us, Taiwan lay obscure off the southeast coast of China—an island cloaked in anonymity and inhabited principally by aborigines. Then, rather abruptly, the island was thrust into the maelstrom of European commercial expansion in East Asia, which in its wake drew Chinese peasant pioneers across the straits to Taiwan. This is the story, told from many viewpoints, of

how Taiwan was transformed over a period of three centuries from a raw frontier to a stable entity with social and economic patterns similar to those found along the coastal mainland of southeastern China.

Understanding Poverty - Abhijit Vinayak
Banerjee 2006-04-20

Understanding poverty and what to do about it, is perhaps the central concern of all of economics. Yet the lay public almost never gets to hear what leading professional economists have to say about it. This volume brings together twenty-eight essays by some of the world leaders in the field, who were invited to tell the lay reader about the most important things they have learnt from their research that relate to poverty. The essays cover a wide array of topics: the first essay is about how poverty gets measured. The next section is about the causes of poverty and its persistence, and the ideas range from the impact of colonialism and globalization to the problems of "excessive" population growth, corruption and ethnic conflict. The next section is about policy: how should we fight poverty? The essays discuss how to get drug companies to produce more vaccines for the diseases of the poor, what we should and should not expect from micro-credit, what we should do about child labor, how to design welfare policies that work better and a host of other topics. The final section is about where the puzzles lie: what are the most important anomalies, the big gaps in the way economists think about poverty? The essays talk about the puzzling reluctance of Kenyan farmers to fertilizers, the enduring power of social relationships in economic transactions in developing countries and the need to understand where aspirations come from, and much else. Every essay is written with the aim of presenting the latest and the most sophisticated in economics without any recourse to jargon or technical language.

Barrett's study focuses on the theme of settlement geography. It attempts to identify the pueblos of the Rio Grande Pueblo Region from the mid-16th century through the 17th century, during the period of Spanish exploration and settlement in the area. The study provides a baseline settlement location pattern for the Rio Grande Pueblo Region, documents the changes

in that pattern occurring over a 160- year period, and discusses the impacts of the Spanish on the Pueblo communities. The Razor's Edge - Lee Yong Leng 1980

One of the most important spatial changes to the political geography of Southeast Asia was the redrawing of the political map of Southeast Asia by the Europeans in the 19th and 20th centuries. The European intervention also created a political discontinuity in the evolution of boundaries from frontiers. This paper discusses how the alien European concepts of frontiers and boundaries has Balkanized the region and led to the boundary disputes of today.
