*The BrickGun Book* - Jeff Boen 2013

The BrickGun Book shows you how to build five remarkably sleek LEGO® handgun replicas, like the classic Berreta 92FS and a formidable rubber-band-firing MAC-11. Each chapter includes step-by-step building instructions and a complete parts list using only readily available LEGO pieces. Builder Jeff Boen has designed each model with stunning accuracy and attention to detail, focusing on everything from 1:1 real-life scale to functioning cocking and trigger mechanisms. Each BrickGun is ultra-realistic in look and feel, but mostly harmless—perfect for display or your next backyard battle. NOTE: Adult supervision is required. These models are not suitable for children under the age of 12.

**Creating Serenity in Chaos** - Lewis Tagliaferre 2022-11-03

If you are the primary caregiver for a parent, spouse, child, sibling, or a friend or neighbor or expect that you will be, you need this book. If you are reading this book cover, it probably is because you have not found the resource you really need to care for yourself as you serve a care consumer who needs your personal support. This book is not about that person; it is about YOU. While there is no greater calling than to care for a loved one, it can be chaotic and challenging to your well-being. If you take a plane trip, you know they tell you in case of emergency to put on your own facemask first before taking care of others. Some people call it self-love. This book is chock-full of information and instruction in self-care based on professional research and therapy compiled by an experienced caregiver who also is an experienced researcher and writer. As such, the work is more practical and less theoretical, although it is based on many professional sources. It goes far beyond the usual content of most self-help books with a format organized into lessons and homework assignments. They address needs of the whole caregiving person that you are""physical, spiritual, mental, and emotional. With this self-development, you can feel better inside no matter what happens outside. Now, who would not want that?

**Mini Weapons of Mass Destruction: Build a Secret Agent Arsenal** - John Austin 2011

"As a budding spy, what better way to conceal your clandestine activities than to miniaturize your secret agent arsenal? Hide a mini catapult in a breath mint tin. Turn a Tic Tac case into vest-pocket candy shooter. Or transform a milk jug cap onto a fake wristwatch that launches tiny paper darts. Toy designer and author John Austin provides detailed, step-by-step instructions with diagrams to show James Bondiacs how to build 35 different spy weapons and surveillance tools. All of the projects in MiniWeapons of Mass Destruction 2 are built from common household items-binder clips, playing cards, rubber bands, markers, clothespins, paper clips, and discarded packaging-clearly detailed on materials lists. In addition to movie-inspired sidearms and other "weapons," you'll find plans to construct periscopes, bionic ears, grappling hooks, and decipher pens. Once you have assembled your arsenal, the author provides a number of ideas on how to hide your stash-inside a deck of cards, a false-bottom soda bottle, or a cereal box briefcase-and targets for practicing your spycraft, including a flip-down firing range, a fake security camera, and sharks with laser beams. And if you think yourself more of an evil-genius in training, this book also has projects to keep you busy while you finish planning your volcano lair-a Q-pick blow gun, a paper throwing star, a bowler hat launcher, and more. Fluffy Persian cat not included"--

*My Life in Orange* - Tim Guest 2016-03-01

A memoir of formative years spent on a series of communes: A "wonderful account of a frankly ghastly childhood . . . Hilarious and heartbreaking" (Daily Mail). At the age of six, Tim Guest was taken by his mother to a commune modeled on the teachings of the notorious Indian guru Bhagwan Shree Rajneesh. The Bhagwan preached an eclectic doctrine of Eastern mysticism, chaotic therapy, and sexual freedom, and enjoyed inhaling laughing gas, preaching from a dentist's chair, and collecting Rolls Royces. Tim and his mother were given Sanskrit names, dressed entirely in orange, and encouraged to surrender themselves into their new family. While his mother worked tirelessly for the cause, Tim—or Yogesh, as he was now called—lived a life of well-meaning but woefully misguided neglect in various communes in England, Oregon, India, and Germany. In 1985 the movement collapsed amid allegations of mass poisonings, attempted murder, and tax evasion, and Yogesh was once again Tim. In this extraordinary memoir, Tim Guest chronicles the heartbreaking experience of being left alone on earth while his mother hunted heaven. "An intelligent, wry, openhearted memoir of surviving a childhood and a cultural phenomenon that were both extraordinary."

*Badass LEGO Guns* - Martin Hudepohl 2010-12-15

LEGO Guns is packed with building instructions for five impressive looking "weapons" built entirely from LEGO TECHNIC parts. In this heavily illustrated 2-color book, you learn how to use LEGO TECHNIC pieces to build working model guns like the Warbeast, a sophisticated, fully-automatic submachine gun; Parabella, a semi-automatic pistol; Thriller, a slide action crossbow pistol with smooth cocking and chambering mechanisms; and the Magic Moth, a simple butterfly "knife" built with TECHNIC pieces. With the help of a bit of sanding, some rubber bands, and Crazy Glue, each gun actually shoots LEGO bricks at high speed, with surprising accuracy. The building instructions for each model are easy to follow and include detailed parts lists. LEGO Guns also includes sections discussing the general concepts of LEGO gun design and offers practical building tips and tricks. The models range from sophisticated to easy, and readers of all ages will find something enjoyable to build and play with.

**The Diabetes Code** - Dr. Jason Fung 2018-04-03

From acclaimed author Dr. Jason Fung, a revolutionary guide to reversing diabetes. Dr. Jason Fung forever changed the way we think about obesity with his best-selling book, *The Obesity Code*. Now he has

set out to do the same for type 2 diabetes. Today, most doctors, dietitians, and even diabetes specialists consider type 2 diabetes to be a chronic and progressive disease—a life sentence with no possibility of parole. But the truth, as Dr. Fung reveals in this paradigm-shifting book, is that type 2 diabetes is reversible. Writing with clear, persuasive language, he explains why conventional treatments that rely on insulin or other blood-glucose-lowering drugs can actually exacerbate the problem, leading to significant weight gain and even heart disease. The only way to treat type 2 diabetes effectively, he argues, is proper dieting and intermittent fasting—not medication. **Experience Building the Rotarymek-10x Rubber Band Machine**

**Gun** - Julian Lyndon Marsh 2012-08-31

This is the definitive guide book for building the RotaryMek-10X rubber band machine gun, one of the world's most advanced rubber band gun designs! To see a video demonstration of the gun and a preview of the book, look on the web for a video of the same title. Building the RotaryMek-10X is a complex, time-consuming woodworking project. Although successful completion of this project does not require particularly sophisticated woodworking techniques, the builder will need to have access to and be able to skillfully use a number of different tools, including a drill press, band saw, and computer-based scanner and printer. The end result of this project is a rubber band gun unlike any other, a truly fully automatic, rapid-firing, rubber band machine gun! In a manner analogous to a real machine gun, the mechanism of the RotaryMek-10X is driven by energy derived from the same source as that which propels the projectiles—the elastic potential energy of the stretched rubber band ammunition loaded onto the gun. There's no crank, no motor... just a trigger and a can of whoop-ass! If properly constructed from high-quality materials, the RotaryMek-10X can be loaded with as many as seventy size 33 rubber bands at one time. The gun develops an extremely high rate of fire (think of a Minigun), but it also has a responsive trigger system, allowing an operator to choose between firing many short bursts or just letting rip, "fire-hose-style." Please note that this project calls for the use of US-standard dimensional lumber as well as two different sizes of US-standard PVC plumbing pipe. Prospective builders outside the United States might first want to check the availability of the needed materials before committing to the project.

*Mini Weapons of Mass Destruction: Build Implements of Spitball Warfare*

- John Austin 2009-10-01

We've come a long way from the Peashooter Era: with the advent of modern household products and office supplies—binder clips,

clothespins, rubber bands, ballpoint pens, toothpicks, paper clips, plastic utensils, and (of course) matches and barbecue lighters—troublemakers of all stripes have the components needed to build an impressive, if somewhat miniaturized, arsenal. Toy designer John Austin provides detailed, step-by-step instructions for each project, including materials and ammo lists, clear diagrams, and construction tips, for mayhem-loving MacGyvers. The 35 devices include catapults, slingshots, minibombs, darts, and combustion shooters. Build a tiny trebuchet from paper clips and a D-cell battery. Wrap a penny in a string of paper caps to create a surprisingly impressive "bomb." Several of the projects even include variations where combatants mount laser pointer sights to their shooters to increase their accuracy. Finally, once you've built your armory, the author provides plans for a Top Secret Concealing Book to hide your stash, as well as targets for shooting practice. Never let your personal space go undefended again!
