The three-volume Encyclopedia of Criminology presents the latest research as well as the traditional topics which reflect the field's multidisciplinary nature in a single, authoritative reference work. More than 525 alphabetically arranged entries by the leading authorities in the discipline comprise this definitive, international resource. **Encyclopedia of Race and Crime** - Helen Taylor Greene 2009-04-14

"The organization of the reader's guide—especially the groupings of landmark cases, race riots, and criminology theories—is impressive ... Other related titles lack the breadth, detail, and accessibility of this work ... Recommended for all libraries; essential for comprehensive social studies collections." —Library Journal As seen almost daily on local and national news, race historically and presently figures prominently in crime and justice reporting within the United States, in the areas of hate crimes, racial profiling, sentencing disparities, wrongful convictions, felon disenfranchisement, political prisoners, juveniles and the death penalty, and culturally specific delinquency prevention programs. The Encyclopedia of Race and Crime covers issues in both historical and contemporary context, with information on race and ethnicity and their impact on crime and the administration of justice. These two volumes offer a greater appreciation for the similar historical experiences of varied racial and ethnic groups and illustrate how race and ethnicity has mattered and continues to matter in the administration of American criminal justice. Key Features Covers a number of broad thematic areas: basic concepts and theories of criminal justice; the police, courts, and corrections; juvenile justice; public policy; the media; organizations; specific groups and populations; and specific cases and biographies Addresses such topics as gender, hate/bias crimes, immigrant experiences, international and cross-cultural issues, race and gangs, and race and law, Presents experiences of all major racial and ethnic groups in the U.S., including Asians, Blacks, Latinos, Native Americans, and Ethnic Whites, as well as religious minorities, such as Muslims Includes coverage of recent incidents like the alleged rape of a black female North Carolina Central University student by white male members of the Duke University Lacrosse Team;, the Jena 6 incident; the Tulia, Texas drug arrests; the Rodney King beating; the O. J. Simpson trials in the 1990s; and more recent racial profiling incidents Two appendices provide information on locating and interpreting statistical data on race and crime, as well as detailed instructions on how to access statistical data on the web for such specific areas as arrests, drugs, gang membership, hate crimes, homicide trends, juvenile justice, prison populations, racial profiling, the death penalty, and victimization Because the topic of race and crime is of wide interest and relevance, entries in this Encyclopedia are written in an accessible style to appeal to a broad audience, making it a welcome addition to academic and public libraries alike.

*Criminal Careers and "Career Criminals,"* - National Research Council 1986-02-01

By focusing attention on individuals rather than on aggregates, this book takes a novel approach to studying criminal behavior. It develops a framework for collecting information about individual criminal careers and their parameters, reviews existing knowledge about criminal career dimensions, presents models of offending patterns, and describes how criminal career information can be used to develop and refine criminal justice policies. In addition, an agenda for future research on criminal careers is presented.

Criminals in the Making - John Paul Wright 2014-02-10

Why do individuals exposed to the same environment turn out so differently, with some engaging in crime and others abiding by societal rules and norms? Why are males involved in violent crime more often than females? And why do the precursors of serious pathological behavior typically emerge in childhood? *Criminals in the Making: Criminality Across the Life Course*, Second Edition, by John Paul Wright, Stephen G. Tibbetts, and Leah E. Daigle, addresses key questions surrounding criminal propensity by discussing studies of the life-course perspective—criminological research that links biological factors associated with criminality with the social and environmental agents thought to cause, facilitate, or otherwise influence a tendency towards criminal activity. The book provides comprehensive, interdisciplinary coverage of the current thinking in the field about criminal behavior over the course of a lifetime. Additionally, it highlights interventions proven effective and illustrates how the life-course perspective has contributed to a greater understanding of the causes of crime.

**Juvenile Crime, Juvenile Justice** - Institute of Medicine 2001-06-05

Even though youth crime rates have fallen since the mid-1990s, public fear and political rhetoric over the issue have heightened. The Columbine shootings and other sensational incidents add to the furor. Often overlooked are the underlying problems of child poverty, social disadvantage, and the pitfalls inherent to adolescent decisionmaking that contribute to youth crime. From a policy standpoint, adolescent offenders are caught in the crossfire between nurturance of youth and punishment of criminals, between rehabilitation and "get tough" pronouncements. In the midst of this emotional debate, the National Research Council's Panel on Juvenile Crime steps forward with an authoritative review of the best available data and analysis. *Juvenile Crime, Juvenile Justice* presents recommendations for addressing the many aspects of America's youth crime problem. This timely release discusses patterns and trends in crimes by children and adolescents--trends revealed by arrest data, victim reports, and other sources; youth crime within general crime; and race and sex disparities. The book explores desistance--the probability that delinquency or criminal activities decrease with age--and evaluates different approaches to predicting future crime rates. Why do young people turn to delinquency? *Juvenile Crime, Juvenile Justice* presents what we know and what we urgently need to find out about contributing factors, ranging from prenatal care, differences in temperament, and family influences to the role of peer relationships, the impact of the school policies toward delinquency, and the broader influences of the neighborhood and community. Equally important, this book examines a range of solutions: Prevention and intervention efforts directed to individuals, peer groups, and families, as well as day care-, school- and community-based initiatives. Intervention within the juvenile justice system. Role of the police. Processing and detention of youth offenders. Transferring youths to the adult judicial system. Residential placement of juveniles. The book includes background on the American juvenile court system, useful comparisons with the juvenile justice systems of other nations, and other important information for assessing this problem.

The Politics of the Prison and the Prisoner - Susan Easton 2018-06-13

In recent years there has been a resurgence of interest in the role of the prison as a source of political ideas and site of political engagement, as well as in the prisoner's quest for citizenship. The rising number of prisoners has increased fiscal burdens, which has meant that imprisonment has become a more important political issue. There is also greater interest in the prison as a site of political activism and in the generation of radical political ideas within the prison context and the formation of political networks within prison which extend beyond the prison walls. This book considers the prison as a site of political protest, discusses the quest for citizenship and the denial or negation of citizenship in prison, examines the discovery of politics in prison and the role of the prison in increasing political awareness, explores the treatment of political prisoners and reflects on the prisoner as a political problem for politicians negotiating pressures from the media and the public when addressing prisoners' demands. Drawing on a range of contemporary and historical topics such as prison riots, radicalisation and the denial of voting rights, and including discussion of cases from the UK, US and Russia, this book examines the prison as a political institution and as a site of both politicisation and political protest. This book will be of interest to students and academics engaged with prisons, penology, punishment and corrections.

**Empowerment Series: Human Behavior in the Social Environment: A Multidimensional Perspective** - Jose B. Ashford 2016-12-05

This lively, comprehensive introduction to human behavior in the social environment offers an integrative approach to biopsychosocial case formulations of current and developmental human behavior concerns. The sixth edition builds on prior efforts in promoting integrative assessments by adopting a specific method for completing case formulations that students apply to case studies in the book's developmental chapters. This innovation provides students with a bridge to the core competencies and recommended practice behaviors outlined in the 2015 Educational Policy and Accreditation Standards (EPAS) set by the Council on Social Work Education (CSWE), thus helping them connect foundation knowledge with practice concerns. Guidelines for practice and relevant assessment tools are identified for specific life tasks and for each phase of biopsychosocial development. **Prisoner Reentry in the 21st Century** - Keesha M. Middlemass 2019-11-04

This groundbreaking edited volume evaluates prisoner reentry using a critical approach to demonstrate how the many issues surrounding reentry do not merely intersect but are in fact reinforcing and interdependent. The number of former incarcerated persons with a felony conviction living in the United States has grown significantly in the last decade, reaching into the millions. When men and women are released from prison, their journey encompasses a range of challenges that are unique to each individual, including physical and mental illnesses, substance abuse, gender identity, complicated family dynamics, the denial of rights, and the inability to voice their experiences about returning home. Although scholars focus on the obstacles former prisoners encounter and how to reduce recidivism rates, the main challenge of prisoner reentry is how multiple interdependent issues overlap in complex ways. By examining prisoner reentry from various critical perspectives, this volume depicts how the carceral continuum, from incarceration to reentry, negatively impacts individuals, families, and communities; how the criminal justice system extends different forms of social control that break social networks; and how the shifting nature of prisoner reentry has created new and complicated obstacles to those affected by the criminal justice system. This volume explores these realities with respect to a range of social, community, political, and policy issues that former incarcerated persons must navigate to successfully reenter society. A springboard for future critical research and policy discussions, this book will be of interest to U.S. and international researchers and practitioners interested in the topic of prisoner reentry, as well as graduate and upper-level undergraduate students concerned with contemporary issues in corrections, community-based corrections, critical issues in criminal justice, criminal justice policies, and reentry.

Dirty Nasty Truth - John Barrett Hawkins 2011-02-01

While incarcerated at R.J. Donovan State Prison in San Diego, John Barrett Hawkins participated in the youth intervention program named "Convicts Reaching Out To People" (CROP). At CROP prisoners worked to help transform the lives of at-risk youth who were brought into the prison by police officers, parents and local schools. CROP was founded on the belief that the most effective way to deter delinquency is through story-telling. It is a public speaking forum where prisoners give personal testimonies concerning the crimes they committed and the lessons learned. The convicts also speak about other pertinent subjects including choices, gangs, drug use, self-esteem and life in prison. As a member of CROP at Donovan, Hawkins witnessed remarkable turnarounds in teens who were on a path of criminality. Hawkins realized that CROP provided a genuine opportunity for him to make amends for his past criminal activities. It was morally self-evident that he should use the story of the crime he committed and all the people he had hurt as a means of deterring others from breaking the law. Hawkins listened closely and took notes when the other CROP members gave their personal testimonies. The prisoners spoke to the groups of kids with raw honesty about the shameful crimes they committed. They were adept at revealing lessons that could only be learned through painful retrospect. Invariably, something traumatic occurred during each inmate's childhood - bullying, peer rejection, parental abuse, etc. - which resulted in their developing low self-esteem. As the convicts discussed the root causes of their criminality and the terrible things they endured as kids, the teens in attendance became conscious of pain that was fueling their own raw emotions and poor behavior. From this point of recognition real change as possible in those teenagers. At the CROP presentations Hawkins frequently interacted with the juvenile justice police officers and school teachers. They were evangelistic about the program's ability to transform the lives of teens that were making poor choices and getting into trouble with the law. One day Hawkins was speaking with a school administrator named Ms.

Williams who remarked, "I wish I had a book with all of the CROP member's stories in it for the students I couldn't bring today." Hawkins took the idea and ran with it. The result is *The Dirty Nasty Truth*. In this book, Hawkins tells 18 true crime stories that reveal lessons for deterring delinquency

[Tomorrow's Criminals](#) - N. Wim Slot 2016-02-24

It has been acknowledged for some years that the early onset of delinquency can predict a long and serious criminal career. Most resources are targeted at the teenage years but this book argues convincingly that more research and interventions should be aimed at child delinquents aged 12 and under. *Tomorrow's Criminals* addresses key problems in criminological research and makes studies from the Netherlands more accessible to a wider audience. It provides information and analyses on risk factors and reviews screening tools and risk-focused prevention methods. The contributions increase visibility and accessibility of European policy and practice in the explanation and prevention of child delinquency.

[Family Life, Delinquency and Crime](#) - Kevin N. Wright 1994

[Welsh prisoners in the prison estate](#) - Great Britain: Parliament: House of Commons: Welsh Affairs Committee 2007-06-06

The Committee undertook this inquiry to address concerns about the imprisonment of Welsh prisoners outside Wales. At present there are only four prisons in Wales, all in the South, and there is little provision for juveniles and no prisons for women. The overcrowding means that Welsh prisoners have a reduced chance of serving their sentence near home and reduces the chances of successful resettlement on release. The Committee believe there should be new prison places in North Wales, separate provision for young offenders and a new approach to women prisoners along the lines suggested by Baroness Corston. The report also address concerns about support services for mental illness amongst prisoners, the amount of Welsh language provision and education services.

**Corrections: Illinois: the problems of the ex-offender** - United States. Congress. House. Committee on the Judiciary. Subcommittee No. 3 1972

**The Treatment of Prisoners** - J. L. Murdoch 2006

At the start of the 21st century, some 2 million Europeans were detained against their will in prisons, police stations, mental health institutions or other detention centres. It is generally recognised that protection against the arbitrary deprivation of liberty and the prevention of ill-treatment reflect the extent to which states respect human rights and human dignity, when these can be jeopardised by demands for security and efficiency. This book describes the European system for the protection of people deprived of their liberty and how this has evolved over the past fifty years. It discusses the different initiatives taken by the Council of Europe in this area, of which the European Convention on Human Rights and the Convention for the Prevention of Torture and Inhuman or Degrading Treatment or Punishment are the most significant.

**Education's Prisoners** - Ken McGrew 2008

*Education's Prisoners* sheds light on the complicated relationship among the educational system, the political economy, and the prison industrial system in the United States. Working within the tradition of critical theory, this critical ethnography posits a more than accidental connection among these phenomena, and engages in a debate with existing literature within critical theory related to structure and agency. The life stories of the participants and their perspectives on their social circumstances provide a tool for deepening and questioning our understandings of these matters. In addition to its substantive findings, this book allows us to see in human terms how structures and forces in society contribute to the outcomes of school failure and incarceration that are usually measured in percentages and correlations. It suggests ways of improving classroom experiences and improving the life chances of young people.

[Bullying among Prisoners](#) - Jane Ireland 2013-05-13

This book aims to present key aspects of the prison-based bullying research which has taken place over the last few years. It is a field in which there has been considerably increased interest. One of the main features of this book is the recognition that much previous bullying research has been descriptive in nature, with little underlying theory to assist its development as an area of academic interest. In addressing this need this book will serve as an indispensable resource for students, academics and professionals with interests in this field. Chapters in the book address the following areas: need for innovation in prison bullying research, statistics on bullying, combining methods to research prison bullying, bullying behaviour among women in prison, bullying and suicides in prisons, developmental antecedents of prison bullies and/or victims, applying evolutionary theory to prison bullying, applying social problem solving models to prison bullying.

**Crime and Criminality** - Sandie Taylor 2015-12-22

The question of 'why' and 'how' certain individuals are drawn towards behaving in a way that contravenes the 'Law of the Land' is not an easy one to address. Researchers from various different fields have nevertheless attempted to develop theoretical explanations for the existence of different types of crime and why some individuals commit such acts. *Crime and Criminality* draws on criminology, sociology, psychology and neuroscience to offer a balanced perspective of crime, the criminal and criminality. Coverage includes: a comprehensive discussion of theoretical approaches to criminal behaviour, including biological, social and 'rational choice' approaches; an analysis of legal and social definitions of crime and how these definitions influence the way specific behaviours are labelled as criminal; an examination of different types of crime and criminals, from delinquents to 'psychopaths' and sex offenders; an exploration of different ways in which crime is predicted, including risk assessment and offender profiling and an overview of investigative techniques. Addressing a broad range of topics and offering a synthesis of competing theoretical explanations of criminality, this book is essential reading for students taking courses in criminology, criminal psychology, criminal behaviour, forensic psychology and psychological criminology.
