Four Kings - George Kimball 2008-10-01

Roberto Duran, Marvelous Marvin Hagler, Sugar Ray Leonard, and Thomas "Hit Man" Hearns all formed the pantheon of boxing greats during the late 1970s and early 1980s—before the pay-per-view model, when prize fights were telecast on network television and still captured the nation's attention. Championship bouts during this era were replete with revenge and fury, often pitting one of these storied fighters against another. From training camps to locker rooms, author George Kimball was there to cover every body shot, uppercut, and TKO. Inside stories full of drama, sacrifice, fear, and pain make up this treasury of boxing tales brought to life by one of the sport's greatest writers.

Prosperity without Growth - Tim Jackson 2016-12-08

What can prosperity possibly mean in a world of environmental and social limits? The publication of Prosperity without Growth was a landmark in the sustainability debate. Tim Jackson's piercing challenge to conventional economics openly questioned the most highly prized goal of politicians and economists alike: the continued pursuit of exponential economic growth. Its findings provoked controversy, inspired debate and led to a new wave of research building on its arguments and conclusions. This substantially revised and re-written edition updates those arguments and considerably expands upon them. Jackson demonstrates that building a 'post-growth' economy is a precise, definable and meaningful task. Starting from clear first principles, he sets out the dimensions of that task: the nature of enterprise; the quality of our working lives; the structure of investment; and the role of the money supply. He shows how the economy of tomorrow may be transformed in ways that protect employment, facilitate social investment, reduce inequality and deliver both ecological and financial stability. Seven years after it was first published, Prosperity without Growth is no longer a radical narrative whispered by a marginal fringe, but an essential vision of social progress in a post-crisis world. Fulfilling that vision is simply the most urgent task of our times.

Paris to the Moon - Adam Gopnik 2001-12-18

Paris. The name alone conjures images of chestnut-lined boulevards, sidewalk cafés, breathtaking façades around every corner--in short, an exquisite romanticism that has captured the American imagination for as long as there have been Americans. In 1995, Adam Gopnik, his wife, and their infant son left the familiar comforts and hassles of New York City for the urbane glamour of the City of Light. Gopnik is a longtime New Yorker writer, and the magazine has sent its writers to Paris for decades--but his was above all a personal pilgrimage to the place that had for so long been the undisputed capital of everything cultural and beautiful. It was also the opportunity to raise a child who would know what it was to romp in the Luxembourg Gardens, to enjoy a croque monsieur in a Left Bank café--a child (and perhaps a father, too) who would have a grasp of that Parisian sense of style we Americans find so elusive. So, in the grand tradition of the American abroad, Gopnik walked the paths of the Tuileries, enjoyed philosophical discussions at his local bistro, wrote as violet twilight fell on the arrondissements. Of course, as readers of Gopnik's beloved and award-winning "Paris Journals" in The New Yorker know, there was also the matter of raising a child and carrying on with day-to-day, not-so-fabled life. Evenings with French intellectuals preceded middle-of-the-night baby feedings; afternoons were filled with trips to the Musée d'Orsay and pinball games; weekday leftovers were eaten while three-star chefs debated a "culinary crisis." As Gopnik describes in this funny and tender book, the dual processes of navigating a foreign city and becoming a parent are not completely dissimilar journeys--both hold new routines, new languages, a new set of rules by which everyday life is lived. With singular wit and insight, Gopnik weaves the magical with the mundane in a wholly delightful, often hilarious look at what it was to be an American family man in Paris at the end of the twentieth century. "We went to Paris for a sentimental reeducation-I did anyway-even though the sentiments we were instructed in were not the ones we were expecting to learn, which I believe is why they call it an education."

Soccernomics - Simon Kuper 2018-04-24

The 2018 World Cup edition of the international bestseller and "the most intelligent book ever written about soccer" (San Francisco Chronicle) is updated throughout and features new chapters on the FIFA scandal, why Iceland wins, and women's soccer. Named one of the Best Books of the Year by the Guardian, Slate, Financial Times, Independent (UK), and Bloomberg News Written with an economist's brain and a soccer writer's skill, Soccernomics applies high-powered analytical tools to everyday soccer topics, looking at data and revealing counterintuitive truths about the world's most beloved game. It all adds up to a revolutionary new approach that has helped change the way the game is played. This World Cup edition features ample new material, including fresh insights into FIFA's corruption, the surge in domestic violence during World Cups, and Western Europe's unprecedented dominance of global soccer.

Europe's Deadly Century - Neil Forbes 2009

In the course of Europe's twentieth century, freedoms were won at the cost of terrible sacrifice. The physical remains of war, conflict and ideological struggle lie everywhere around us. The question of what to do with this common past, in which we all share an interest, lies at the centre of this important book. From a variety of professional backgrounds, the contributors consider a wide range of conflict-heritage sites in the context of international and national histories and regional and local historical narratives. Questions of who 'owns' the past, the ambiguities over how people identify with the local community or nation state, and whether or how to make moral judgements, are central. The book illustrates the challenges of documenting and describing what are often extensive, contested and sometimes enigmatic and ambiguous buildings and monuments. The priorities of conservation, and how we ensure that documents, artefacts, sites and buildings can be given adequate and appropriate protection and care, are also addressed.

The Economics of Conflict and Peace - Jurgen Brauer 2017-07-05

This work addresses new directions in research on the economic theory of conflict, the cost of war, and the benefits of peace. A collection of 17 papers drawing on contributors from all continents, the volume is divided into four sections. The first discusses novel ways to think about the economics of conflict and peace from theory perspectives. These include discussions of conflict from the perspectives of standard neoclassical analysis and economic geography. An especially interesting paper in this section addresses conflict in the context of the emerging theory of international public finance. A second section deals with military expenditures, economic/human development and economic growth in the US and developing nations of Asia and Africa. The volume enters new territory in sections three and four. Section three contains a set of papers on the economic cost of war and war's aftermath, significantly expanding economists' rather modest efforts to date. Section four is concerned with how the concepts of economics might be operationalized and institutionalized to foster security.

Edexcel GCSE Business - Alain G. Anderton 2009

Business Studies - Dave Hall 1999

Health Economics - Jay Bhattacharya 2018-10-19

Comprehensive in coverage this textbook, written by academics from leading institutions, discusses current developments and debates in modern health economics from an international perspective. Economic models are presented in detail, complemented by real-life explanations and analysis, and discussions of the influence of such theories on policymaking. Offering sound pedagogy and economic rigor, Health Economics focuses on building intuition alongside appropriate mathematical formality, translating technical language into accessible economic narrative. Rather than shying away from intellectual building blocks, students are introduced to technical and theoretical foundations and encouraged to apply these to inform empirical studies and wider policymaking. Health Economics provides: - A broad scope, featuring comparative health policy and empirical examples from around the world to help students relate the principles of health economics to everyday life - Coverage of topical issues such as the obesity epidemic, economic epidemiology, socioeconomic health disparities, and behavioural economics - A rich learning resource, complete with hundreds of exercises to help solidify and extend understanding. This book is designed for advanced undergraduate courses in health economics and policy but may also interest postgraduate students in economics,

medicine and health policy.

Arts and Cultural Management - Constance DeVereaux 2018-09-03

Arts and Cultural Management: Sense and Sensibilities in the State of the Field opens a conversation that is much needed for anyone identifying arts management or cultural management as primary areas of research, teaching, or practice. In the evolution of any field arises the need for scrutiny, reflection, and critique, as well as to display the advancements and diversity in approaches and thinking that contribute to a discipline's forward progression. While no one volume could encompass all that a discipline is or should be, a representational snapshot serves as a valuable benchmark. This book is addressed to those who operate as researchers, scholars, and practitioners of arts and cultural management. Driven by concerns about quality of life, globalization, development of economies, education of youth, the increasing mobility of cultural groups, and many other significant issues of the twenty-first century, governments and individuals have

increasingly turned to arts and culture as means of mitigating or resolving tough policy issues. For their growth, arts and culture sectors depend on people in positions of leadership and management who play a significant role in the creation, production, exhibition, dissemination, interpretation, and evaluation of arts and culture experiences for publics and policies. Less than a century old as a formal field of inquiry, however, arts and cultural management has been in flux since its inception. What is arts and cultural management? remains an open question. A comprehensive literature on the discipline, as an object of study, is still developing. This State of the Discipline offers a benchmark for those interested in the evolution and development of arts and cultural management as a branch of knowledge alongside more established disciplines of research and scholarship.

Resonances of the Raj - Nalini Ghuman 2014

This text examines the ramifications of the intertwined and overlapping histories of Britain and India on English music in the last fifty years of the colonial encounter, and traces the effects of the British Raj on the English musical imagination. Through a series of case studies, author Nalini Ghuman integrates music directly into the cultural history of the British Raj, revealing unexpected minglings of peoples, musics, and ideas that raise questions about 'Englishness', about the nature of Empire, and about the fixedness of identity.
