Entrepreneurial Identity in US Book Publishing in the Twenty-First Century -

Rachel Noorda 2021-09-30

Entrepreneurship underpins many roles within the publishing industry, from freelancing to bookselling. Entrepreneurs are shaped by the contexts in which their entrepreneurship is situated (social, political, economic, and national). Additionally, entrepreneurship is integral to occupational identity for book publishing entrepreneurs. This Element examines entrepreneurship through the lens of identity and narrative based on interview data with book publishing entrepreneurs in the US. Book publishing entrepreneurship narratives of independence, culture over commerce, accidental profession, place, risk, (in)stability, busyness, and freedom are examined in this Element.

Women and Global Entrepreneurship -

Maura McAdam 2021-04-06

Entrepreneurship in context has been described as the third wave in entrepreneurship research. Accordingly, specific socio-economic, political, market, and institutional contexts are key to fostering, enabling, and enacting entrepreneurial activity and behaviours. These contexts shape everyday entrepreneurship experiences. This book is based on the premise that how gender is articulated within the entrepreneurial debate has to acknowledge context. However, context is not a construct that only applies to those economies and situations that differ from the presumed norm of Western developed nations. Adopting a more critical appraisal of how context is positioned within current theorizing around gender and entrepreneurial behaviours offers potential to progress debate whilst acknowledging that competing and contrasting contextual influences require clearer recognition. This book, therefore, has the potential to unearth credible and robust

approaches to further examining contextualisation and women entrepreneurship that advances new insights. By exploring and examining how contextual influences shape women's entrepreneurship, this book challenges the assumption that women entrepreneurship is the same throughout the world. It will be of value to researchers, academics, and students with an interest in entrepreneurship, political economy, economics, and public policy.

Growing and Managing a Small Business - Kathleen R. Allen 2006

Growing and Managing a Small Business provides students with a comprehensive introduction to business ownership and management from the start-up phase through growth and harvest. Decidedly entrepreneurial in focus, this book departs from the traditional small business management text by incorporating themes and principles appropriate to managing small companies in a dynamic, global environment. In addition to up-to-date

coverage of risk management and strategies for "harvesting the business," the Second Edition introduces several new chapters that examine topics such as ethics and social responsibility, family businesses, and technology. New boxed features illustrate the author's real-world approach through case studies and profiles of small businesses and entrepreneurs. New! Chapter 2, "Entrepreneurial Strategy and Business Ethics," introduces coverage of ethics early on, prompting students to consider social responsibility in the planning phase of a business, rather than viewing it as an afterthought. New! As a large percentage of small business owners are those who take over a family business, Chapter 5 focuses on "Stepping into the Family Business." New! Chapter 6, "Launching a High Technology Business," examines the unique set of elements that entrepreneurs must consider when starting a business that takes advantage of the opportunities technology affords. New! Located

at the beginning and end of every chapter, Learning from Entrepreneurs cases feature real-world entrepreneurs at various stages of business development from companies such as Netflix, Method Products, and Quiznos Sub Shops. Accompanying Guiding the Entrepreneur questions ask readers how they would advise the entrepreneur featured in the case. New! Learning from Success boxed features highlight the successes of actual entrepreneurs. These features examine ventures ranging from Mailboxes, Etc. to Jerry Garcia's band the Grateful Dead. Learning from Mistakes illustrate errors in strategy or planning and offer tips for avoiding such errors. New! Learning from the Global Market boxes show how international entrepreneurs meet the challenges addressed in each chapter. These features look at the Japanese decision-making method called jankenpo (or "Rock, Paper, Scissors"); the goals of New Zealand's small business owners, and how they differ from their U.S. counterparts;

Entrepreneurship in Africa - Ven Sriram

2020-11-16

It is now widely recognized that in regions like Africa, for economic and other reasons, the public sector has had to disengage and divest from many areas of the economy and allow private enterprise, especially scalable start-ups and new ventures, to enter and flourish if economic development and employment are to grow. There is, however, a training and education gap since entrepreneurship is rarely taught formally at African universities and, when it is, it is often approached from a Western perspective which may not be appropriate given that African environments are significantly

different from most Western ones in terms of economic infrastructure and political considerations. This book allows readers to understand the African entrepreneurial context by guiding them through the principal stages in the life of a new venture, and offers approaches, both Western and indigenous, that can inform their entrepreneurial actions. It concludes by examining some specialized topics, including female, youth, and social entrepreneurship, as well as real estate and technology. Exercises throughout the book will enable readers to evaluate their motivations and preparedness for entrepreneurship and learn how to communicate a new venture's key features to potential stakeholders. By focusing on the distinctive features of entrepreneurship in the African context, and taking a conversational tone, this is an informative and practical text that will be useful for students of Global Entrepreneurship and Business as well as actual and prospective entrepreneurs in the private, non-profit, and

public sectors.

Entrepreneurship & Management - Manjunath V.S. 2010-09

Entrepreneurial Ecosystem - Mathew J Manimala 2015-02-09

Economic development is a priority for all nation-states, whether developing or developed. In recent times, a few among the developing

nations – often referred to as the emerging economies – have attracted the world’s attention because of their fast pace of economic growth. While the similarities among these nations (for example the BRICS) in the pattern of their economic growth are highlighted and discussed, the differences are often glossed over. This book, therefore, attempts to present the diverse ways in which entrepreneurship is facilitated in emerging economies, through a compilation of research papers from six different countries (India, China, Singapore, Hong Kong, Nigeria and New Zealand) belonging to the class of emerging economies. The papers included in this book cover a variety of topics related to the creation and management of an entrepreneurial ecosystem, such as intercultural interactions, IPR issues, government policies for SMEs, social entrepreneurship, opportunity identification, green entrepreneurship, employee entrepreneurship, symbiotic ventures and social capital, social fluidity mapping for reducing

failure stigma, green awareness in the corporate world and among entrepreneurs, venture capital for growth, immigrant entrepreneurs, entrepreneurial success and life satisfaction, among others. The contributions are supported by an introductory chapter that provides an integrative framework by unifying the diverse patterns of economic development in the different countries under various institutional inadequacies as a process of “muddling-through to development”, necessitated by the non-systematic development of the ecosystem for new venture creation. This book is indeed a must-read for those interested in understanding the process of entrepreneurship and economic development in emerging economies.

Beyond Collisions - Maria Meyers 2017-12-19

In communities across America, people are trying to support entrepreneurs. They know entrepreneurs add jobs, character and vitality to a community's economy. Beyond Collisions gets behind the meetups, the accelerators and the hackathons to provide a guide for how to support entrepreneurs - how to build the entrepreneurial infrastructure. Entrepreneurship is poised to take its place alongside attraction and retention as a key economic development strategy. In traditional economic development, there is a defined process for the attraction and

retention of companies. With entrepreneurship, there's been no infrastructure, no roadmap. In most communities, efforts to support entrepreneurs are fragmented. Beyond Collisions provides a clear, proven path to building the entrepreneurial infrastructure that can enable people to start and grow thriving companies. It's not one program, no silver bullet. It's a process, a strategy to identify, connect and empower entrepreneurial support resources, and then measure the results. Maria Meyers, Kate Pope Hodel and the SourceLink team have been working in Kansas City and across the country for 15 years, listening, learning and leading. They join with others, the entrepreneurs of entrepreneurship, to share hard-earned lessons about how to build the kind of inclusive, supportive network that encourages entrepreneurship. Beyond Collisions explores key questions. Section One addresses why should a community support entrepreneurship, what an entrepreneurial infrastructure looks like and

who benefits. Section Two provides practical, tactical steps to identify, connect, empower and measure the entrepreneurial infrastructure. Section Three outlines strategies around marketing, funding and leadership. Sprinkled throughout are stories from the field, firsthand accounts of building networks, encouraging entrepreneurs and analyzing outcomes.

Management - Alan Zimmerman 2017-09-25
Business to business markets are considerably more challenging than consumer markets and as such demand a more specific skillset from marketers. Buyers, with a responsibility to their company and specialist product knowledge, are more demanding than the average consumer. Given that the products themselves may be highly complex, this often requires a sophisticated buyer to understand them. Increasingly, B2B relationships are conducted within a global context. However all textbooks are region-specific despite this growing move towards global business relationships - except this one. This textbook takes a global viewpoint, with the help of an international author team and cases from across the globe. Other unique

features of this insightful study include: placement of B2B in a strategic marketing setting; full discussion of strategy in a global setting including hypercompetition; full chapter on ethics and CSR early in the text; and detailed review of global B2B services marketing, trade shows, and market research. This new edition has been fully revised and updated with a full set of brand new case studies and features expanded sections on digital issues, CRM, and social media as well as personal selling. More selective, shorter, and easier to read than other B2B textbooks, this is ideal for introduction to B2B and shorter courses. Yet, it is comprehensive enough to cover all the aspects of B2B marketing any marketer needs, be they students or practitioners looking to improve their knowledge.
