Nothing but the Truth - John Kani 2002-01-01
An award-winning play about the relationship between brothers. Nothing but the Truth is the story of two brothers, of sibling rivalry, of exile, of memory and reconciliation, and the ambiguities of freedom. The play was John Kani's debut as sole playwright and was first performed in the Market Theatre in Johannesburg. It won the 2003 Fleur du Cap Award for best actor and best new South African play. In the same year Kani was also awarded a special Obie award for his extraordinary contribution to theatre in the USA.

Parenting Matters - National Academies of Sciences, Engineering, and Medicine 2016-11-21
Decades of research have demonstrated that the parent-child dyad and the environment of the family—“which includes all primary caregivers”—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during

childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Philosophising Experiences and Vision of the Female Body, Mind, and Soul: Historical Context and Contemporary Theory -
Musingafi, Maxwell Constantine Chando
2021-04-23

Much of our understanding of the world, our societies, and ourselves rests on theories and knowledge generated predominantly by men of certain nationalities and economic classes. This male-dominated and culturally specific theorizing and knowledge have generally resulted in the exclusion of women and other groups from the process of formal theorizing and knowledge building. Feminism argues that the male-dominated knowledge represents a skewed perception of reality and is only partial

knowledge. Feminism is a generalized, wide-ranging system of ideas about social life and human experience developed from a woman-centered perspective. It treats women as the central subjects in the investigative process and seeks to see the world from the distinctive vantage points of women in the social world. The best way to empower women and better the situation for women is to take women's daily experiences and their informal theorizing into account and, on this basis, adopt feminist approaches to building theory and knowledge. Philosophising Experiences and Vision of the Female Body, Mind, and Soul: Historical Context and Contemporary Theory provides an overview and introduction to the study of feminist theory and practice in the social sciences. This book provides a starting point for further and more advanced study of the nexus of feminism, gender, and development and translates feminist theory and concepts into practice. The chapters investigate, in a historical context, mainstream and contemporary theories of feminism and gender studies. This book is ideal for post-graduate students of social science; researchers of development management, business management, public governance, and gender and development; activists; feminists; and practitioners, stakeholders, researchers, academicians, and students interested in feminist theory and knowledge building.

Mind The Gap - Dr Karen Gurney 2020-03-05
'This book taught me so much about female desire. A must read!' Cherry Healey Did you know that there is an orgasm gap of around 30% between heterosexual couples when they have sex? In Mind The Gap, Dr Karen Gurney, a clinical psychologist and certified psychosexologist, explores not just this gap, but the gaps in our knowledge of so much of the most important new science around sex and desire. In this book, you will learn that nearly everything that you've been led to believe about female sexuality isn't actually true. And that, despite what you might think, it is possible to simultaneously feel little to no spontaneous desire and have a happy and mutually satisfying sex life long term. Exploring the mismatch between ideas about sex in our society and what the science tells us, Mind The Gap also explains how this disconnect lies at the root of many of

our sexual problems. Combining science with case studies, practical exercises and tips, this is a book for anyone who wants to better understand the mechanics of desire and futureproof their sex life, for life.

Communities in Action - National Academies of Sciences, Engineering, and Medicine 2017-04-27

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Strategy That Works - Paul Leinwand 2016-01-12

How to close the gap between strategy and execution Two-thirds of executives say their organizations don't have the capabilities to support their strategy. In *Strategy That Works*, Paul Leinwand and Cesare Mainardi explain why. They identify conventional business practices that unintentionally create a gap between strategy and execution. And they show how some of the best companies in the world consistently leap ahead of their competitors. Based on new research, the authors reveal five practices for connecting strategy and execution used by highly successful enterprises such as IKEA, Natura, Danaher, Haier, and Lego. These companies:

- Commit to what they do best instead of chasing multiple opportunities
- Build their own unique winning capabilities instead of copying others
- Put their culture to work instead of struggling to change it
- Invest where it matters instead of going lean across the board
- Shape the future instead of reacting to it

Packed with tools you can use for building these five practices into your organization and supported by in-depth profiles of companies that are known for making their strategy work, this is your guide for reconnecting strategy to execution.

How People Learn - National Research Council 2000-08-11

First released in the Spring of 1999, *How People Learn* has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do

infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do-with curricula, classroom settings, and teaching methods--to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. How People Learn examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

Towards a New Understanding of Masculine Habitus and Women and Leadership in Public Relations - Martina Topić 2022-09-30

This edited volume analyses leadership in the public relations (PR) industry with a specific focus on women and their leadership styles. It looks at how women lead, the influence of the socialisation process on leadership styles, the difference between feminine and masculine leadership styles, and the impact of leadership style on career opportunities for women. The book features case studies exploring leadership in PR around the world in an attempt to answer a central research question: is there a masculine habitus in the PR industry despite the rise of women in PR? The authors of each chapter conducted original research on women working in PR within their own country and provide original insights into the position of women in a feminised industry, as well as proposing new and original theoretical frameworks for future research. Written for scholars, researchers and students of PR and communication, this book

will also be of interest to those studying gender studies, leadership and organisational analysis, and sociology.

Telecom 101 - Eric Coll 2008-01-01

*** NEW FOURTH EDITION NOW AVAILABLE

*** LOOK FOR TELECOM 101, 4TH EDITION

This is the historical listing for the third edition. Telecom 101 is the three course workbooks from Teracom's acclaimed core training Course 101 Telecom, Datacom and Networking for Non-Engineering Professionals combined together into a single professionally-bound softcover textbook with a laminated cover, 401 pages, 177 diagrams and a full index. Telecom 101 covers telecom, datacom and networking from A-Z, organized in logical chapters covering all major topics, and written in our signature telecom for non-engineers style. Specifically designed for the non-engineering professional, we'll bust the buzzwords, demystify the jargon, and cut through doubletalk. We fill in the gaps, build a solid, structured base of knowledge and show how everything fits together... knowledge and understanding that lasts a lifetime. This content, tuned and refined over the course of eighteen years, has been taught to thousands of people needing to build a solid, structured understanding of telecom, datacom and networking. A high percentage of seminar attendees specifically praise the course materials on seminar evaluations - materials now available in softcover textbook format in Telecom 101. Teracom's Telecom 101 is an invaluable day-to-day handbook, and is used by many as an economical and convenient way to self-study. A US Army communications specialist deployed to Iraq called it "a lifesaver" when contacting to us to order his own copy after the owner of the one he was borrowing demanded it back! The third edition, published 2008, is completely revised and updated, with complete coverage of telecom, datacom, IP and networking fundamentals plus up-to-date information on VoIP, MPLS, IP, DSL, wireless and more. Compare this to hunting down and paying hundreds of dollars for multiple books by different authors that may or may not cover what you need to know - in plain English - and you'll agree this is a very attractive deal. Knowing What Students Know - National
Research Council 2001-10-27

Education is a hot topic. From the stage of
presidential debates to tonight's dinner table, it
is an issue that most Americans are deeply
concerned about. While there are many
strategies for improving the educational process,
we need a way to find out what works and what

doesn't work as well. Educational assessment
seeks to determine just how well students are
learning and is an integral part of our quest for
improved education. The nation is pinning
greater expectations on educational assessment
than ever before. We look to these assessment
tools when documenting whether students and
institutions are truly meeting education goals.
But we must stop and ask a crucial question:
What kind of assessment is most effective? At a
time when traditional testing is subject to
increasing criticism, research suggests that new,
exciting approaches to assessment may be on
the horizon. Advances in the sciences of how
people learn and how to measure such learning
offer the hope of developing new kinds of
assessments-assessments that help students
succeed in school by making as clear as possible
the nature of their accomplishments and the
progress of their learning. *Knowing What
Students Know* essentially explains how
expanding knowledge in the scientific fields of
human learning and educational measurement
can form the foundations of an improved
approach to assessment. These advances
suggest ways that the targets of assessment-
what students know and how well they know it-
as well as the methods used to make inferences
about student learning can be made more valid
and instructionally useful. Principles for
designing and using these new kinds of
assessments are presented, and examples are
used to illustrate the principles. Implications for
policy, practice, and research are also explored.
With the promise of a productive research-based
approach to assessment of student learning,
Knowing What Students Know will be important
to education administrators, assessment
designers, teachers and teacher educators, and
education advocates.

Reporting War and Conflict - Janet Harris
2018-10-03

Reporting War and Conflict brings together
history, theory and practice to explore the issues
and obstacles involved in the reporting of
contemporary war and conflict. The book
examines the radical changes taking place in the
working practices and day-to-day routines of war
journalists, arguing that managing risk has
become central to modern war correspondence.
How individual reporters and news organisations

organise their coverage of war and conflict is increasingly shaped by a variety of personal, professional and institutional risks. The book provides an historical and theoretical context to risk culture and the work of war correspondents, paying particular attention to the changing nature of technology, organisational structures and the role of witnessing. The conflicts in Iraq, Afghanistan and Syria are examined to highlight how risk and the calculations of risk vary according to the type of conflict. The focus is on the relationship between propaganda, censorship, the sourcing of information and the challenges of reporting war in the digital world. The authors then move on to discuss the arguments around risk in relation to gender and war reporting and the coverage of death on the battlefield. *Reporting War and Conflict* is a guide to the contemporary changes in warfare and the media environment that have influenced war reporting. It offers students and researchers in journalism and media studies an invaluable overview of the life of a modern war correspondent.

Teaching to Change the World - Jeannie Oakes
2018-01-29

Teaching to Change the World is an up-to-the-moment, engaging, social justice-oriented introduction to education and teaching, and the challenges and opportunities they present. Both foundational and practical, the chapters are organized around conventional topics but in a way that consistently integrates a coherent story that explains why schools are as they are. Taking the position that a hopeful, democratic future depends on ensuring that all students learn, the text pays particular attention to inequalities associated with race, social class, language, gender, and other social categories and explores teachers' role in addressing them. This thoroughly revised fifth edition remains a vital introduction to the profession for a new generation of teachers who seek to become purposeful, knowledgeable practitioners in our ever-changing educational landscape—for those teachers who see the potential for education to change the world. Features and Updates of the New Edition: • Fully updated Chapter 1, "The U.S. Schooling Dilemma," reflects our current state of education after the 2016 U.S. presidential election. • First-person observations

from teachers, including first-year teachers, continue to offer vivid, authentic pictures of what teaching to change the world means and involves. • Additional coverage of the ongoing effects of Common Core highlights the heated public discourse around teaching and teachers, and charter schools. • Attention to diversity and inclusion is treated as integral to all chapters, woven throughout rather than tacked on as separate units. • "Digging Deeper" resources on the new companion website include concrete resources that current and future teachers can use in their classrooms. • "Tools for Critique" provides instructors and students questions, prompts, and activities aimed at encouraging classroom discussion and particularly engaging those students least familiar with the central tenets of social justice education.

Critical Care Study Guide - Gerard J. Criner
2010-06-27

Critical care medicine is a dynamic and exciting arena where complex pathophysiologic states require extensive knowledge and up-to-date clinical information. An extensive knowledge of basic pathophysiology, as well as awareness of the appropriate diagnostic tests and treatments that are used to optimize care in the critically ill is essential. Since our first edition 7 years ago, new information crucial to the care and understanding of the critically ill patient has rapidly accumulated. Because this knowledge base crosses many different disciplines, a comprehensive multidisciplinary approach presenting the information is essential, similar to the multidisciplinary approach that is used to care for the critically ill patient. We have strived to provide this content in an easily digestible format that uses a variety of teaching tools to facilitate understanding of the presented concepts and to enhance information retention. To meet the demand to provide comprehensive and diverse education in order to understand the pathogenesis and optimum care of a variety of critical illnesses, we have substantially revised the prior topics in the first edition with updated information. We have also markedly expanded the number of topics covered to include acute lung injury and the acute respiratory distress syndrome, an expanded discussion of the physiology and operation of mechanical ventilation, obstetrical care in the ICU,

neurosurgical emergencies, acute co- nary syndromes, cardiac arrhythmias, role of whole body rehabilitation in the ICU, ethical conduct of human research in the ICU, and nursing care of the ICU patient.

International Handbook of Research on Environmental Education - Robert B. Stevenson 2014-06-20

The environment and contested notions of sustainability are increasingly topics of public interest, political debate, and legislation across the world. Environmental education journals now publish research from a wide variety of methodological traditions that show linkages between the environment, health, development, and education. The growth in scholarship makes this an opportune time to review and synthesize the knowledge base of the environmental education (EE) field. The purpose of this 51- chapter handbook is not only to illuminate the most important concepts, findings and theories that have been developed by EE research, but also to critically examine the historical progression of the field, its current debates and controversies, what is still missing from the EE research agenda, and where that agenda might be headed. Published for the American Educational Research Association (AERA).

Mind the Gap - Matthias Henze 2017-08-15

Do you want to understand Jesus of Nazareth, his apostles, and the rise of early Christianity? Reading the Old Testament is not enough, writes Matthias Henze in this slender volume aimed at the student of the Bible. To understand the Jews of the Second Temple period, it's essential to read what they wrote—and what Jesus and his followers might have read—beyond the Hebrew scriptures. Henze introduces the four-century gap between the Old and New Testaments and some of the writings produced during this period (different Old Testaments, the Apocrypha and Pseudepigrapha, the Dead Sea Scrolls); discusses how these texts have been read from the Reformation to the present, emphasizing the importance of the discovery of Qumran; guides the student's encounter with select texts from each collection; and then introduces key ideas found in specific New Testament texts that simply can't be understood without these early Jewish "intertestamental" writings—the Messiah, angels and demons, the law, and the resurrection of the dead. Finally, he discusses the role of these writings in the "parting of the ways" between Judaism and Christianity. *Mind the Gap* broadens curious students' perspectives on early Judaism and early Christianity and welcomes them to deeper study.

Teaching in the Online Classroom - Doug Lemov 2020-10-27

A timely guide to online teaching strategies from

bestselling author Doug Lemov and the Teach Like a Champion team School closures in response to the covid-19 coronavirus pandemic resulted in an immediate and universal pivot to online teaching. More than 3.7 million teachers in the U.S. were suddenly asked to teach in an entirely new setting with little preparation and no advance notice. This has caused an unprecedented threat to children's education, giving rise to an urgent need for resources and guidance. The New Normal is a just-in-time response to educators' call for help. Teaching expert Doug Lemov and his colleagues spent weeks studying videos of online teaching and they now provide educators in the midst of this transition with a clear guide to engaging and educating their students online. Although the transition to online education is happening more abruptly than anyone anticipated, technology-supported teaching may be here to stay. This guide explores the challenges involved in online teaching and guides educators and administrators to identify and understand best practices. It is a valuable tool to help you and your students succeed in synchronous and asynchronous settings this school year and beyond. Learn strategies for engaging students more fully online Find new techniques to assess student progress from afar Discover tools for building online classroom culture, combating online distractions, and more Watch videos of teachers building rigor and relationships during online instruction The New Normal features real-world examples you can apply and adapt right away in your own online classroom to allow you to survive and thrive online.

Beyond the Gap - Julie Rozenberg 2019-02-12
Beyond the Gap: How Countries Can Afford the Infrastructure They Need while Protecting the Planet aims to shift the debate regarding investment needs away from a simple focus on spending more and toward a focus on spending better on the right objectives, using relevant metrics. It does so by offering a careful and systematic approach to estimating the funding needs to close the service gaps in water and sanitation, transportation, electricity, irrigation, and flood protection. Exploring thousands of scenarios, this report finds that funding needs depend on the service goals and policy choices of low- and middle-income countries and could

range anywhere from 2 percent to 8 percent of GDP per year by 2030. Beyond the Gap also identifies a policy mix that will enable countries to achieve key international goals—universal access to water, sanitation, and electricity; greater mobility; improved food security; better protection from floods; and eventual full decarbonization—while limiting spending on new infrastructure to 4.5 percent of GDP per year. Importantly, the exploration of thousands of scenarios shows that infrastructure investment paths compatible with full decarbonization in the second half of the century need not cost more than more-polluting alternatives. Investment needs remain at 2 percent to 8 percent of GDP even when only the decarbonized scenarios are examined. The actual amount depends on the quality and quantity of services targeted, the timing of investments, construction costs, and complementary policies. Finally, investing in infrastructure is not enough; maintaining it also matters. Improving services requires much more than capital expenditure. Ensuring a steady flow of resources for operations and maintenance is a necessary condition for success. Good maintenance also generates substantial savings by reducing the total life-cycle cost of transport and water and sanitation infrastructure by more than 50 percent.

Environmental Publics - Sally Eden
2016-12-08

How do ordinary people think about the environment as they go about their daily lives? Does thinking about the environment make them do things differently? This book is the first to explore the idea of 'environmental publics', that is, the ways in which ordinary people engage with environmental issues across different practical contexts of work, play and home. Emphasising the practices of 'environmental engagement', *Environmental Publics* examines how people consume the environment, learn about it, campaign for its protection and enjoy it through their leisure time. But the book avoids relying on idealisations of 'consumers' or 'citizens', or theoretical constructs about behavioural norms that have traditionally dominated research in this field. Instead, this book differentiates environmental publics not by who they are but by what they are doing - their daily practices. It also analyses specifically the

geographies of those practices - how what people do affects the environment but in different ways across time and space and at different scales - aspects of practices that are neglected in the literature. With an interdisciplinary perspective, this book will be of interest to students and scholars in geography, sociology, science and technology studies, political science and anthropology. It is written in an accessible and readable style, so as to be useful for preliminary and more advanced courses in environmental management, perception and policy, as well as in studies of modern society, consumption and environmentalism.

Democracy and Education - John Dewey 1916
John Dewey's *Democracy and Education* addresses the challenge of providing quality public education in a democratic society. In this classic work Dewey calls for the complete renewal of public education, arguing for the fusion of vocational and contemplative studies in education and for the necessity of universal education for the advancement of self and society. First published in 1916, *Democracy and Education* is regarded as the seminal work on public education by one of the most important scholars of the century.

[Study and Master Accounting Grade 12 CAPS Teacher's Guide](#) - E. Conradie 2013-07-03

[The Color of Mind](#) - Derrick Darby 2018-01-24
American students vary in educational achievement, but white students in general typically have better test scores and grades than black students. Why is this the case, and what can school leaders do about it? In *The Color of Mind*, Derrick Darby and John L. Rury answer these pressing questions and show that we cannot make further progress in closing the achievement gap until we understand its racist origins. Telling the story of what they call the Color of Mind—the idea that there are racial differences in intelligence, character, and behavior—they show how philosophers, such as David Hume and Immanuel Kant, and American statesman Thomas Jefferson, contributed to the construction of this pernicious idea, how it influenced the nature of schooling and student achievement, and how voices of dissent such as Frederick Douglass, Frances Ellen Watkins

Harper, and W. E. B. Du Bois debunked the Color of Mind and worked to undo its adverse impacts. Rejecting the view that racial differences in educational achievement are a product of innate or cultural differences, Darby and Rury uncover the historical interplay between ideas about race and American schooling, to show clearly that the racial achievement gap has been socially and institutionally constructed. School leaders striving to bring justice and dignity to American schools today must work to root out the systemic manifestations of these ideas within schools, while still doing what they can to mitigate the negative effects of poverty, segregation, inequality, and other external factors that adversely affect student achievement. While we cannot expect schools alone to solve these vexing social problems, we must demand that they address the dignitary injustices associated with how we track, discipline, and deal with special education that reinforce long-standing racist ideas. That is the only way to expel the Color of Mind from schools, close the racial achievement gap, and afford all children the dignity they deserve.
