Knowing What Works in Health Care - Institute of Medicine
2008-05-29

There is currently heightened interest in optimizing health care through the generation of new knowledge on the effectiveness of health care services. The United States must substantially strengthen its capacity for assessing evidence on what is known and not known about "what works" in health care. Even the most sophisticated clinicians and consumers struggle to learn which care is appropriate and under what circumstances. *Knowing What Works in Health Care* looks at the three fundamental health care issues in the United States—setting priorities for evidence assessment, assessing evidence (systematic review), and developing evidence-based clinical practice guidelines—and how each of these contributes to the end goal of effective, practical health care systems. This book provides an overall vision and roadmap for improving how the nation uses scientific evidence to identify the most effective clinical services. *Knowing What Works in Health Care* gives private and public sector firms, consumers, health care professionals, benefit administrators, and others the authoritative, independent information required for making essential informed health care decisions.

Disability & International Development - Malcolm MacLachlan
2009-07-21

One of the greatest challenges facing modern global health is how to include the most marginalized and impoverished people in international efforts to promote social and economic development. In *Disability and International Development* disability rights are situated within the broader context of global health and the need for much greater inter-sector collaboration. Reports from a broad cross-section of low- and middle-income countries—locales as diverse as Zimbabwe, Bolivia, Kyrgyzstan, and Papua New Guinea—move beyond surface discussions of "what is working" and "what shows promise" to discuss political and governance contexts, the roles of disabled persons in research by outsiders, concurrent struggles (e.g., women's or children's rights), and instructive inroads made by community activists and national Disabled People's Organizations. The results are provocative, and offer new lenses for viewing both the issues and the populations they affect. Each of the book's chapters spotlights a topic as representative of the enormity and immediacy of challenges to inclusive global health, including: The impact of international human rights law on domestic law and local traditions. The effect of failed states on the lives of people with disabilities. Empowerment and advocacy: disability organizations and movements. HIV/AIDS interventions with disabled persons. Assistive technologies in low-income countries. Strategies for improving the lives of children with disabilities. Cross-disciplinary as well as cross-cultural, *Disability and International Development* will attract a wide audience of professionals in rehabilitation, social welfare and human rights; governmental and non-governmental organizations and disabled people's organizations; researchers and practitioners. It will also be relevant to those working in health and welfare administration, health policy, international aid and development, and human rights. In addition, graduate students in disability studies, public and global health and international development should find this an important guide to the future of these fields.

Envisioning a Transformed Clinical Trials Enterprise in the United States
- Institute of Medicine 2012-10-13

There is growing recognition that the United States' clinical trials enterprise (CTE) faces great challenges. There is a gap between what is desired - where medical care is provided solely based on high quality evidence - and the reality - where there is limited capacity to generate timely and practical evidence for drug development and to support medical treatment decisions. With the need for transforming the CTE in the U.S. becoming more pressing, the IOM Forum on Drug Discovery, Development, and Translation held a two-day workshop in November 2011, bringing together leaders in research and health care. The

workshop focused on how to transform the CTE and discussed a vision to make the enterprise more efficient, effective, and fully integrated into the health care system. Key issue areas addressed at the workshop included: the development of a robust clinical trials workforce, the alignment of cultural and financial incentives for clinical trials, and the creation of a sustainable infrastructure to support a transformed CTE. This document summarizes the workshop.

Management for Social Enterprise - Bob Doherty 2009-03-19

Electronic Inspection Copy available for instructors here `Management for Social Enterprise is a great introduction to the rich variety of social enterprises in the UK. It is also a useful tool to help us to build more effective social enterprises that really deliver on their missions by people who have hands on experience. This is just what the rapidly growing social enterprise sector needs, a management manual to help us take social enterprises to the next level by people who have hands on experience' - Sophi Tranchell, Managing Director of Divine Chocolate Ltd and Cabinet Office sponsored Social Enterprise Ambassador `The recent explosive growth in the number of social enterprises, their diverse and dynamic nature, and the upsurge in research about them all makes this a potentially bewildering field of knowledge to explore. This book provides a clear and timely guide to the management challenges involved in understanding and running social enterprises, and underlines why their unique nature requires something more than just standard business school wisdom' - Ken Peattie, Professor of Marketing and Strategy, Cardiff Business School, and Director of the ESRC Centre for Business Relationships, Accountability, Sustainability and Society `Provides a good introduction to the management of social enterprises touching on a broad range of topics and will help those involved in managing social enterprises and those trying to understand more about the sector. It draws on the experience of those who have worked in the social enterprise sector in a range of countries and are passionate about developing it' - Fergus Lyon, Professor of Enterprise and Organizations, Middlesex University Overviewing the key business topics required by social entrepreneurs, and managers in social enterprises *Management for Social Enterprise* covers strategy, finance, ethics, social accounting, marketing and people management. Written in direct, accessible language by a team of authors currently teaching and researching in this sector, each chapter is fully supported with learning resources. Chapters include brief overviews, further reading, suggested web resources and, importantly, international case studies, drawing on real-life business examples. This book is essential reading for students and practitioners of Social Entrepreneurship and Social Enterprise, but will also be of use to anyone with an interest in management, corporate responsibility, ethics or community studies. The Oxford Handbook of Undergraduate Psychology Education - Dana S. Dunn 2015-08-07

The Oxford Handbook of Undergraduate Psychology Education is dedicated to providing comprehensive coverage of teaching, pedagogy, and professional issues in psychology. The Handbook is designed to help psychology educators at each stage of their careers, from teaching their first courses and developing their careers to serving as department or program administrators. The goal of the Handbook is to provide teachers, educators, researchers, scholars, and administrators in psychology with current, practical advice on course creation, best practices in psychology pedagogy, course content recommendations, teaching methods and classroom management strategies, advice on student advising, and administrative and professional issues, such as managing one's career, chairing the department, organizing the curriculum, and conducting assessment, among other topics. The primary audience for this Handbook is college and university-level psychology teachers (at both two and four-year institutions) at the assistant, associate, and full professor levels, as well as department chairs and other psychology program administrators, who want to improve teaching and learning within their departments. Faculty members in other social science disciplines (e.g., sociology, education, political science) will find material in the Handbook to be applicable or adaptable to their own programs and courses.

Concrete Dreams - Nicholas D'Avella 2019-11-15

In Concrete Dreams Nicholas D'Avella examines the changing social and economic lives of buildings in the context of a construction boom following Argentina's political and economic crisis of 2001. D'Avella tells the stories of small-scale investors who turned to real estate as an alternative to a financial system they no longer trusted, of architects who struggled to maintain artistic values and political commitments in the face of the ongoing commodification of their work, and of residents-turned-activists who worked to protect their neighborhoods and city from being overtaken by new development. Such forms of everyday engagement with buildings, he argues, produce divergent forms of value that persist in tension with hegemonic forms of value. In the dreams attached to built environments and the material forms in which those dreams are articulated—from charts and graphs to architectural drawings, urban planning codes, and tango lyrics—D'Avella finds a blueprint for building livable futures in which people can survive alongside and even push back against the hegemony of capitalism.

[The Cambridge Handbook of the Changing Nature of Work](#) - Brian J. Hoffman 2020-04-23

This handbook provides an overview of the research on the changing nature of work and workers by marshalling interdisciplinary research to summarize the empirical evidence and provide documentation of what has actually changed. Connections are explored between the changing nature of work and macro-level trends in technological change, income inequality, global labor markets, labor unions, organizational forms, and skill polarization, among others. This edited volume also reviews evidence for changes in workers, including generational change (or lack thereof), that has accumulated across domains. Based on documented changes in work and worker behavior, the handbook derives implications for a range of management functions, such as selection, performance management, leadership, workplace ethics, and employee well-being. This evaluation of the extent of changes and their impact gives guidance on what best practices should be put in place to harness these developments to achieve success.

Strategic Innovative Marketing - Androniki Kavoura 2016-09-26

This book presents the latest on the theoretical approach of the contemporary issues evolved in strategic marketing and the integration of theory and practice. It seeks to make advancements in the discipline by promoting strategic research and innovative activities in marketing. The book highlights the use of data analytics, intelligence and knowledge-based systems in this area. In the era of knowledge-based economy, marketing has a lot to gain from collecting and analyzing data associated with customers, business processes, market economics or even data related to social activities. The contributed chapters are concerned with using modern qualitative and quantitative techniques based on information technology used to manage and analyze business data, to discover hidden knowledge and to introduce intelligence into marketing processes. This allows for a focus on innovative applications in all aspects of marketing, of computerized technologies related to data analytics, predictive analytics and modeling, business intelligence and knowledge engineering, in order to demonstrate new ways of uncovering hidden knowledge and supporting marketing decisions with evidence-based intelligent tools. Among the topics covered include innovative tourism marketing strategies, marketing communications in small and medium-sized enterprises (SMEs), the use of business modeling, as well as reflecting on the marketing trends and outlook for all transportation industry segments. The papers in this proceedings has been written by scientists, researchers, practitioners and students that demonstrate a special orientation in strategic marketing, all of whom aspire to be ahead of the curve based on the pillars of innovation. This proceedings volume compiles their contributions to the field, highlighting the exchange of insights on strategic issues in the science of innovation marketing.

[Strategic Research and Political Communication for NGOs](#) - Accenture Foundation 2009-04-11

This unique and easy-to-use book offers a new paradigm to NGO managers in effecting policy change. Introducing corporate research and strategy tools such as market and organizational analysis, it goes on to apply these to case studies to exemplify the remarkable similarities between the NGO sector and the for-profit sector. Drawing on principles of corporate governance, the author presents a clear, step-by-step, hands-on approach to positioning one's cause effectively with stakeholders, policy-makers, media and the general public. By recognizing the role of communication in the 21st century, the book emphasizes the importance of effectively using new channels and interfaces of digital communication (such as online social networking sites) to generate and maintain visibility, mobilize campaigns and initiate policy change. With illustrative examples of Best Practice based on case studies of Indian and International NGOs, this book is an essential read for NGO managers and communication programme officers, social work administrators and other professionals engaged in the field of social work.

Town and Gown Relations - Roger L. Kemp 2013-02-21

This is a timely work on a very dynamic field. It provides more than 40 best practice case studies from nearly half the states in America, and discusses current and evolving trends in the relations between educational institutions and cities, towns and other municipalities. The schools include public and private universities and colleges, public school districts, and other local school systems. Case studies examine current and evolving state-of-the-art practices. Appendices include a glossary; regional, national and international resource directories; bibliographic sources; model agreements and documents; a state municipal league directory; a state public library directory; and a summary of distance learning resources. The handbook is indexed. The future of America's cities and schools depends upon the proper management of resources through the use of state-of-the-art town-gown planning practices. Both public officials and taxpayers, faculties, as well as students, benefit from town and gown best practices.

Global Pharmaceuticals - Adriana Petryna 2006-02-22

In some parts of the world spending on pharmaceuticals is astronomical. In others people do not have access to basic or life-saving drugs.

Individuals struggle to afford medications; whole populations are neglected, considered too poor to constitute profitable markets for the development and distribution of necessary drugs. The ethnographies brought together in this timely collection analyze both the dynamics of the burgeoning international pharmaceutical trade and the global inequalities that emerge from and are reinforced by market-driven medicine. They demonstrate that questions about who will be treated and who will not filter through every phase of pharmaceutical production, from preclinical research to human testing, marketing, distribution, prescription, and consumption. Whether considering how American drug companies seek to create a market for antidepressants in Japan, how Brazil has created a model HIV/AIDS prevention and treatment program, or how the urban poor in Delhi understand and access healthcare, these essays illuminate the roles of corporations, governments, NGOs, and individuals in relation to global pharmaceuticals. Some essays show how individual and communal identities are affected by the marketing and availability of medications. Among these are an exploration of how the pharmaceutical industry shapes popular and expert understandings of mental illness in North America and Great Britain. There is also an examination of the agonizing choices facing Ugandan families trying to finance AIDS treatment. Several essays explore the inner workings of the emerging international pharmaceutical regime. One looks at the expanding quest for clinical research subjects; another at the entwining of science and business interests in the Argentine market for psychotropic medications. By bringing the moral calculations involved in the production and distribution of pharmaceuticals into stark relief, this collection charts urgent new territory for social scientific research.

NASA's Elementary and Secondary Education Program - National Research Council 2008-04-24

The federal role in precollege science, technology, engineering, and mathematics (STEM) education is receiving increasing attention in light of the need to support public understanding of science and to develop a strong scientific and technical workforce in a competitive global economy. Federal science agencies, such as the National Aeronautics and Space Administration (NASA), are being looked to as a resource for enhancing precollege STEM education and bringing more young people to scientific and technical careers. For NASA and other federal science agencies, concerns about workforce and public understanding of science also have an immediate local dimension. The agency faces an aerospace workforce skewed toward those close to retirement and job recruitment competition for those with science and engineering degrees. In addition, public support for the agency's missions stems in part from public understanding of the importance of the agency's contributions in science, engineering, and space exploration. In the NASA authorization act of 2005 (P.L. 109-555 Subtitle B-Education, Sec. 614) Congress directed the agency to support a review and evaluation of its precollege education program to be carried out by the National Research Council (NRC). NASA's Elementary and Secondary Education Program: Review and Critique includes recommendations to improve the effectiveness of the program and addresses these four tasks: 1. an evaluation of the effectiveness of the overall program in meeting its defined goals and objectives; 2. an assessment of the quality and educational effectiveness of the major components of the program, including an evaluation of the adequacy of assessment metrics and data collection requirements available for determining the effectiveness of individual projects; 3. an evaluation of the funding priorities in the program, including a review of the funding level and trend for each major component of the program and an assessment of whether the resources made available are consistent with meeting identified goals and priorities; and 4. a determination of the extent and effectiveness of coordination and collaboration between NASA and other federal agencies that sponsor science, technology, and mathematics education activities.

Effective Interprofessional Education - Hugh Barr 2008-04-15

This volume presents a systematic review of interprofessional education in health and social care. This is accompanied by a wider-ranging critique of interprofessional education, grounded by experience, and informed by sources beyond the evaluations that qualified for inclusion in the review. Synthesising the evidence base for interprofessional education nevertheless remains central, with 353 studies surveyed in the first instance, from which 107 studies form the basis for the final analysis. The book does much more than amass evidence. It revisits conventional wisdom; setting an agenda to help interested parties perform better by applying lessons learned, remedying weaknesses and renewing efforts to address unanswered questions. The first three chapters set the scene for the systematic review and its findings. The middle section of the book articulates the findings of the review. Finally, the closing chapters consider values and attitudes, theoretical perspectives and offer conclusions. Arguments, assumptions and evidence in this publication are presented to inform policy making, programme planning, teaching and research.
