I Didn't Talk - Beatriz Bracher 2018-07-31
The English-language debut of a master stylist: a compassionate but relentless novel about the long, dark harvest of Brazil's totalitarian rule. A professor prepares to retire—Gustavo is set to move from Sao Paulo to the countryside, but it isn't the urban violence he's fleeing: what he

fears most is the violence of his memory. But as he sorts out his papers, the ghosts arrive in full force. He was arrested in 1970 with his brother-in-law Armando: both were vicariously tortured. He was eventually released; Armando was killed. No one is certain that he didn't turn traitor: I didn't talk, he tells himself, yet guilt is his

lifelong harvest. *I Didn't Talk* pits everyone against the protagonist—especially his own brother. The torture never ends, despite his bones having healed and his teeth having been replaced. And to make matters worse, certain details from his shattered memory don't quite add up... Beatriz Bracher depicts a life where the temperature is lower, there is no music, and much is out of view. *I Didn't Talk's* pariah's-eye-view of the forgotten "small" victims powerfully bears witness to their "internal exile." *I didn't talk*, Gustavo tells himself; and as Bracher honors his endless pain, what burns this tour de force so indelibly in the reader's mind is her intensely controlled voice.

Esthetic Dentistry - Kenneth W. Aschheim 2001
Help your patients look better and improve their self-esteem with this complete, user-friendly guide to all of the latest esthetic dentistry procedures that are in high demand. Thoroughly updated by the most renowned leaders in the field, the new third edition of *Esthetic Dentistry*:

A Clinical Approach to Techniques and Materials offers clearly highlighted techniques in step-by-step fashion, with unmistakable delineation of armamentarium, for the treatment of esthetic problems. Hundreds of clinical tips are included throughout the book to help alert you to potential problems, variations on techniques, and other treatment considerations. Plus, an invaluable troubleshooting guide covers the different types of esthetic problems (such as size, discoloration, and spacing issues), potential solutions, and references to chapters where the specific problem is discussed in detail. With this expert reference in hand, you will have all you need to master the latest esthetic procedures that your patients want! Troubleshooting guide at the beginning of the book features tabled information containing a quick snapshot of the problem, the solution, and where in the text it can be found. Hundreds of clinical tips throughout the book alert you to potential problems, variations on techniques, and other

treatment considerations. Short narratives utilize a user-friendly format that works as a dependable reference, as well as a quick, at-a-glance guide. Part 2: Principles of Esthetics provides a detailed discussion of the fundamentals of esthetics and its relevancy to dentistry. Part 3: Esthetic Materials and Techniques assists you in selecting the correct materials for a specific clinical situation. Part 4: Esthetics and Other Clinical Applications offers an overview of how esthetics relates to other clinical specialties including, periodontics, orthodontics, implants, oral surgery, pediatrics, occlusion, laser surgery, oral photography, CAD/CAM technology, dermatological pharmaceuticals, and plastic surgery. NEW! Extensively revised content incorporates extensive updates within 95% of the chapters. NEW! Chapter on CAD/CAM technology addresses the advantages and disadvantages of CAD/CAM technology, and gives brief overviews of the most popular systems on the market.

NEW! Chapter on occlusion looks at the fundamental concepts of occlusion, including: temporomandibular joints and surrounding structures; uniform tooth contacts; coupled anterior teeth; phonetics; occlusal vertical dimension; and more. NEW! Chapter on dermatological pharmaceuticals inspects the underlying processes that cause facial aging, as well as botulinum toxin, facial fillers, and combination treatment. NEW! Completely revised chapter on dental marketing addresses both external and internal marketing, the classic 4Ps concept, electronic marketing, how to build a marketing program, and more. NEW! Chapter on eating disorders reviews anorexia nervosa, bulimia nervosa, and binge eating or eating disorders not otherwise specified, along with the oral manifestations of eating disorders and considerations when approaching a patient presenting with suspected symptoms of an eating disorder. NEW! Chapter on domestic violence addresses what domestic violence is,

the dental assessment, the legal issues surrounding domestic violence and the dentist, and how to best talk to the patient who might be a victim. Completely updated art program features over 1,300 full color illustrations and photographs with esthetically and clinically accurate renderings to give you a clear picture of the intended outcome in key areas such as bleaching, tooth coloring, implants, and more. Spanish version also available, ISBN: 84-8174-567-7

Changing Tides - Barbara Neis 2005
This book brings together contributions from researchers and community workers from thirteen countries of the world. Juxtaposing academic case studies with accounts from activists and fisheries workers, it points to the ways in which globalization and associated resource degradation, privatization, and the concentration of ownership and control in fisheries are jeopardizing the lives and livelihoods of women fish workers and their

families.

Biomimetic Restorative Dentistry - Pascal Magne 2021

"Applies the biomimetic principle to bonded restorations using composite resins and ceramics, describing the broad spectrum of indications and detailing the treatment planning, diagnostic approach, step-by-step treatment, and maintenance for each"--

Esthetics in Dentistry - Devorah Schwartz-Arad 2019-09-16

With contributions by Debora Ayala Walverde | Evgenia Durnovo | Chiori Hashiba | Miho Hayashi | Kirsti Humerinta | Veena Jain | Henriette Lerner | Amélie Mainjot | Saiesha K. Mistry | Katalin Nagy | Hyun Oh | Devorah Schwartz-Arad | Nassem Shah | Meriting Thokoane | Lezize Şebnem Türkün | Beatriz R. Vilaboa | Debora R. Vilaboa A unique collaboration between 17 internationally renowned women dentists has resulted in an inspirational textbook on esthetics in modern

dentistry. Illustrated with over 800 figures, the book presents a thorough overview of various aspects of esthetics, including orthodontics and orthognathics, implant therapy, restoration, rehabilitation, materials, trauma, and surgery. Each author also provides fascinating insights into her journey to become a successful female dentist in a male-dominated industry. The stories differ, but the results are the same - excellent patient care and excellent esthetics. "My sincere hope is that, over and above its professional contribution to the dental community, this book will encourage both young and experienced women dentists to escalate their knowledge, wisdom, and artistic talent, and to have the impact on the dental community they so rightly deserve." Dr Devorah Schwartz-Arad

Trick - Domenico Starnone 2018-03-08

Imagine a duel. A face-off between a man and a boy. The same blood runs through their veins. One, Daniele Mallarico, is a successful illustrator at the peak of his career. The other, Mario, is his

four-year-old grandson who has barely learned to talk but has a few tricks up his loose-fitting sleeves all the same. The older combatant has lived for years in almost complete solitude. The younger one has been dumped with a grandfather he barely knows for 72 hours. Starnone's sharp novella unfolds within the four walls (and a balcony!) of the apartment where the grandfather grew up, now the home of his daughter and her family, where the rage of an aging man meets optimism incarnate in the shape of a four-year-old child. Lurking, ever present in the conflict, is the memory of Naples, a wily, violent, and passionate city where the old man spent his youth and whose influence is not easily shaken.

Composite Veneers - Newton Fahl (Jr.) 2020
"The book discusses the many applications of the direct-indirect technique using composites, including prepress contact lenses and veneers, veneers with preparation (discolored teeth), fragments, diastema closure, and noncarious

cervical lesions, and offers step-by-step protocols for each"--

Poems from the Edge of Extinction - Chris McCabe 2021-12-09

Gold winner in Poetry and Special Honors Award winner for Best Anthology Nautilus Book Awards The Beautiful New Treasury of Poetry in Endangered Languages, in Association with the National Poetry Library Featuring award-winning poets from cultures as diverse as the Ainu people of Japan to the Zoque of Mexico, with languages that range from the indigenous Ahtna of Alaska to the Shetlandic dialect of Scots, this evocative collection gathers together 50 of the finest poems in endangered, or vulnerable, languages from across the continents. With poems by influential, award-winning poets such as US poet laureate Joy Harjo, Hawad, Valzhyna Mort, and Jackie Kay,

this collection offers a unique insight into both languages and poetry, taking the reader on an emotional, life-affirming journey into the cultures of these beautiful languages, celebrating our linguistic diversity and highlighting our commonalities and the fundamental role verbal art plays in human life. Each poem appears in its original form, alongside an English translation, and is accompanied by a commentary about the language, the poet and the poem - in a vibrant celebration of life, diversity, language, and the enduring power of poetry. One language is falling silent every two weeks. Half of the 7,000 languages spoken in the world today will be lost by the end of this century. With the loss of these languages, we also lose the unique poetic traditions of their speakers and writers. This timely anthology is passionately edited by widely published poet and UK National Poetry Librarian, Chris McCabe, who is also the founder of the Endangered Poetry Project, a

major project launched by London's Southbank Centre to collect poetry written in the world's disappearing languages, and introduced by Dr Mandana Seyfeddinipur, Director of the Endangered Languages Documentation Programme and the Endangered Languages Archive at SOAS University of London, and Dr Martin Orwin, Senior Lecturer in Somali and Amharic, SOAS University of London. Languages included in the book: Assyrian; Belarusian; Chimiini; Irish Gaelic; Maori; Navajo; Patua; Rotuman; Saami; Scottish Gaelic; Welsh; Yiddish; Zoque Poets included in the book: Joy Harjo; Hawad; Jackie Kay; Aurélia Lassaque; Nineb Lamassu; Gearóid Mac Lochlainn; Valzhyna Mort; Laura Tohe; Taniel Varoujan; Avrom Sutzkever

Dental Biomaterials - Edward Sacher
2018-12-18

ronaldo-hirata

The contents of this book touch on the all major dental biomaterials: polymers, composites, ceramics and metals. The first part introduces the readers to the surface physicochemical and mechanical characterizations at the nanoscopic level, and the use of finite element analysis. The second part discusses dental adhesion, resin-based composites, polymerization contraction stress, impression materials and soft liners for total prosthesis. The third part deals with ceramics in restorative dentistry: zirconia and lithium disilicate, the fractography of dental ceramics, as well as bioglass for bone growth. The fourth part discusses the toxicity of mercury in dentistry, and the use of preventive materials for dental diseases. The concluding part identifies imminent techniques for dental biomaterials, such as additive manufacturing (3D printing), and bioprinting in dentistry.

Recipes for composite restorations - Ronaldo Hirata 2022

Although many dental manuals have been called "cookbooks", none has ever embraced the style so fully as this new book. In its pages, the practitioner is fully reimagined as a master chef, and 26 esthetic restorative protocols are presented as gourmet recipes, ready to be learned and savored. The purpose of this book is to encourage true mastery of the fundamentals while avoiding the most common pitfalls. Dr Hirata demonstrates how to make the most of composite materials by focusing on the details and techniques that can really improve the final

results. In restorative dentistry, the key is to use the right materials with the best technique. However, that is not enough. Any chef knows that once you have learned the fundamentals, your best work must also reflect your personal character, and the same goes for the work of restorative dentists. By focusing on the skillful use of the right ingredients and tools, this tour de force will teach you how to take the heat and take your restorative protocols to the next level. Keep it simple. Master the basics..

XXVI Brazilian Congress on Biomedical Engineering - Rodrigo Costa-Felix 2019-06-04

This volume presents the proceedings of the Brazilian Congress on Biomedical Engineering (CBEB 2018). The conference was organised by the Brazilian Society on Biomedical Engineering (SBEB) and held in Armação de Buzios, Rio de Janeiro, Brazil from 21-25 October, 2018. Topics of the proceedings include these 11 tracks: • Bioengineering • Biomaterials, Tissue Engineering and Artificial Organs •

Biomechanics and Rehabilitation • Biomedical Devices and Instrumentation • Biomedical Robotics, Assistive Technologies and Health Informatics • Clinical Engineering and Health Technology Assessment • Metrology, Standardization, Testing and Quality in Health • Biomedical Signal and Image Processing • Neural Engineering • Special Topics • Systems and Technologies for Therapy and Diagnosis
Clinical Cases in Dental Hygiene - Cheryl M. Westphal Theile 2019-01-30

Clinical Cases in Dental Hygiene is an indispensable resource to understanding both the theory and practice of dental hygiene, illustrated by real-life cases in a clinically relevant format. Mathematical Morphology and Its Applications to Image and Signal

Processing - John Goutsias 2006-04-11

Mathematical morphology is a powerful methodology for the processing and analysis of geometric structure in signals and images. This book contains the proceedings of the fifth International Symposium on Mathematical Morphology and its Applications to Image and Signal Processing, held June 26-28, 2000, at Xerox PARC, Palo Alto, California. It provides a broad sampling of the most recent theoretical and practical developments of mathematical morphology and its applications to image and signal processing. Areas covered include: decomposition of structuring functions and morphological operators, morphological discretization, filtering, connectivity and connected operators, morphological shape analysis and interpolation, texture analysis, morphological segmentation, morphological

multiresolution techniques and scale-spaces, and morphological algorithms and applications.

Audience: The subject matter of this volume will be of interest to electrical engineers, computer scientists, and mathematicians whose research work is focused on the theoretical and practical aspects of nonlinear signal and image processing. It will also be of interest to those working in computer vision, applied mathematics, and computer graphics.

Peri-Implant Soft-Tissue Integration and Management - Mario Rocuzzo 2021-04-19

Popular demand for dental implants as a reliable long-term option to replace missing teeth has risen dramatically. However, situations remain that pose challenges to practitioners and the treatment process. Written by renowned clinicians and supported by cases contributed by expert practitioners, the present volume of the ITI Treatment Guide series highlights the integration and management of peri-implant soft tissues. It discusses soft-tissue management

before and during implant placement and during supportive peri-implant therapy and addresses the techniques and materials used for peri-implant soft-tissue augmentation and replacement and for the treatment of peri-implant soft-tissue dehiscences. Volume 12 of the ITI Treatment Guides series offers clinicians a comprehensive overview of various evidence-based techniques and treatment approaches for use in daily practice, with a focus on current techniques and materials.

Fixed Restorations - Irena Sailer 2021-07-01
In *Fixed Restorations: A Clinical Guide to the Selection of Materials and Fabrication Technology*, the authors Irena Sailer, Vincent Fehmer, and Bjarni Pjetursson have created a timely and comprehensive guide to modern reconstructive dentistry. The book is divided into four parts: basic information regarding materials and production processes, step-by-step clinical

procedures with extensive case presentations, long-term outcomes, and management of complications. With over 2000 clinical images and diagrams, backed up with the scientific evidence for recommendations, the best practice for tooth- and implant-supported fixed restorations is clearly described. The vast clinical and technical knowledge and experience of the authors has resulted in a unique textbook that will aid in decision making regarding material selection and procedures for all patients in need of fixed restorations.

Color and Appearance in Dentistry - Alvaro Della Bona 2020-04-03

This book presents the state of the art in color science and explains its application to dental structures and materials, using high-quality illustrations to ensure ease of learning. Most people seek a bright smile with a natural appearance. This goal often poses a great clinical challenge for the dentist, and its achievement is dependent on a good knowledge of color science and optical properties relevant to dentistry. Further, if a smile is to be esthetically improved to the patient's satisfaction, the dentist must be able to extract the best from dental materials and techniques, must understand all aspects of facial harmony, and must communicate effectively with both the patient and lab technicians. All of these aspects are thoroughly explored in the book, with

detailed coverage of such topics as visual and instrumental shade matching, color management, and avoidance of complications and pitfalls. Color and Appearance in Dentistry will be of high value to all who are engaged in the daily practice of esthetic dentistry.

My Grandmother's Braid - Alina Bronsky
2021-01-21

Sharp and tender at once, a humourous take on family dysfunction and human weakness seen through a young boy's eyes. Max lives with his grandparents in a residential home for refugees in Germany. When his grandmother—a terrifying, stubborn matriarch and a former Russian prima donna—moved them from the Motherland, it was in search of a better life. But she is not at all pleased with how things are run in Germany. His grandmother has been telling Max that he is an incompetent, clueless weakling since he was a child. While he may be dolt in his grandmother's eyes, Max is bright enough to notice that his stoic and taciturn grandfather has

fallen hopelessly in love with their neighbour, Nina. When a child is born to Nina that is the spitting image of Max's grandfather, things come to a hilarious if dramatic head. Everybody will have to learn to defend themselves from Max's all-powerful grandmother.

Nanobiomaterials in Dentistry - Alexandru Grumezescu
2016-06-04

Nanobiomaterials in Dentistry: Applications of Nanobiomaterials discusses synthesis methods and novel technologies involving nanostructured bio-active materials with applications in dentistry. This book provides current research results for those working in an applied setting. The advantage of having all this information in one coherent text will be the focused nature of the chapters and the ease of which this information can be accessed. This collection of titles brings together many of the novel

applications these materials have in biology and discusses the advantages and disadvantages of each application and the perspectives of the technologies based on these findings. At the moment there is no other comparable book series covering all the subjects approached in this set of titles. Offers an updated and highly structured reference material for students, researchers, and practitioners working in biomedical, biotechnological, and engineering fields Serves as a valuable resource of recent scientific progress, along with most known applications of nanomaterials in the biomedical field Features novel opportunities and ideas for developing or improving technologies in nanomedicine and dentistry

Love - Hanne Ørstavik 2018-02-13
WINNER OF THE 2019 PEN TRANSLATION PRIZE FINALIST FOR THE NATIONAL BOOK AWARD FOR TRANSLATED LITERATURE A mother and son move to a village in northern Norway, each ensconced in their own world. Their distance has fatal consequences. Love is the story of Vibeke and Jon, a mother and son who have just moved to a small place in the north of Norway. It's the day before Jon's birthday, and a travelling carnival has come to the village. Jon goes out to sell lottery tickets for his sports club, and Vibeke is going to the library. From here on we follow the two individuals on their separate journeys through a cold winter's night - while a sense of uneasiness grows. Love illustrates how language builds its own reality, and thus how mother and son can live in completely separate worlds. This distance is found not only between human beings, but

also within each individual. This novel shows how such distance may have fatal consequences.

Biofuel Production - Marco Aurelio Dos Santos Bernardes 2011-09-15

This book aspires to be a comprehensive summary of current biofuels issues and thereby contribute to the understanding of this important topic. Readers will find themes including biofuels development efforts, their implications for the food industry, current and future biofuels crops, the successful Brazilian ethanol program, insights of the first, second, third and fourth biofuel generations, advanced biofuel production techniques, related waste treatment, emissions and environmental impacts, water consumption, produced allergens and toxins. Additionally, the biofuel policy discussion is expected to be continuing in the foreseeable future and the reading of the biofuels features dealt with in this book, are

recommended for anyone interested in understanding this diverse and developing theme.

About Trees - Katie Holten 2015

About Trees considers our relationship with language, landscape, perception, and memory in the Anthropocene. The book includes texts and artwork by a stellar line up of contributors including Jorge Luis Borges, Andrea Bowers, Ursula K. Le Guin, Ada Lovelace and dozens of others. Holten was artist in residence at Buro BDP. While working on the book she created an alphabet and used it to make a new typeface called Trees. She also made a series of limited edition offset prints based on her Tree Drawings.

Labyrinth - Burhan Sönmez 2019-11-19

Notable International Crime Novel of the Year - Crime Reads / Lit Hub From a prize-winning Turkish novelist, a heady, political tale of one man's search for identity and meaning in Istanbul after the loss of his memory. A blues singer, Boratin, attempts suicide by jumping off

the Bosphorus Bridge, but opens his eyes in the hospital. He has lost his memory, and can't recall why he wished to end his life. He remembers only things that are unrelated to himself, but confuses their timing. He knows that the Ottoman Empire fell, and that the last sultan died, but has no idea when. His mind falters when remembering civilizations, while life, like a labyrinth, leads him down different paths. From the confusion of his social and individual memory, he is faced with two questions. Does physical recognition provide a sense of identity? Which is more liberating for a man, or a society: knowing the past, or forgetting it? Embroidered with Borgesian micro-stories, Labyrinth flows smoothly on the surface while traversing sharp bends beneath the current.

Ramifications - Daniel Saldaña París

2020-10-13

Folding and refolding origami frogs, extracting the symmetrical veins from leaves, retreating to

an imaginary world in his closet: after Teresa walked out the door one July afternoon in 1994, her son filled the void she left with a series of unusual rituals. Twenty-three years later, he lies in bed, reconstructing the events surrounding his mother's disappearance. Did she actually join the Zapatistas in the jungles of Chiapas, as he was led to believe? He dissects his memories of that fateful summer until a startling discovery shatters his conception of his family's story. Daniel Saldaña París (Among Strange Victims) returns with an emotionally rich anti-coming-of-age novel that wrestles with the inherited privileges and crimes of masculinity.

A Musical Offering - Luis Sagasti 2020-07-21

Tracing a circular course that echoes Bach's Goldberg Variations, Luis Sagasti's second book to appear in English takes the guise of a musical scheherazade, recounting story after story, vibrating to celestial harmonies. From the music born of the sun to the music sent into space on the Voyager mission, from Rothko to rock music,

from the composers of the concentration camps to a weeping room for Argentinian conscripts in the Falklands, *A Musical Offering* traverses the shifting sands of fiction and history.

THERMEC 2018 - R. Shabadi 2018-12-26

This book presents the proceedings of the THERMEC 2018: 10th International Conference on Processing and Manufacturing of Advanced Materials, which took place between July 09 and July 13, 2018 in Paris, France, under the co-sponsorship of Universite de Lille, MINES ParisTech, PSL and Universite de Tours, France. The presented book will be useful for many researchers and engineers/technologists working in different aspects of processing and fabrication of materials, structure/property evaluation and applications of both ferrous and nonferrous materials including biomaterials, smart materials as well as the advanced measurement techniques in the materials science.

One Another - Monique Schwitter 2019-02-12

One Another dazzles as Monique Schwitter deftly weaves an intricate, moving, and wonderfully eccentric portrayal of love and art—erotic, chaotic, comedic, tragic, and glorious. When a writer googles the name of her first love and discovers he committed suicide years ago, she is deeply shaken. Memories of Petrus begin to flood into her mind, followed by the memories of other loves, one after another. What exactly is love? How does it come and go? She begins to search her personal history for answers. Twelve men. Twelve chapters in a novel. Melancholy Petrus, handsome actor Jakob, Simon with his pet rat, gay Nathanael, a student, her brother. Her husband's story is supposed to be the last. But as story after story unfolds, the past and present entangle until her orderly search is interrupted by present-day complications of love and by a startling event overlooked at home that begins to seize the plotline of both her art and life.

Aesthetic & Restorative Dentistry - Douglas A. Terry 2009-01-01

This dynamic multi-contributor book illustrates important esthetic and restorative dental procedures as they are used in everyday clinical situations. It is designed to explain how a selected material and/or instrument can be used as part of a thorough protocol to achieve restorative excellence. With the scientific knowledge and clinical and laboratory expertise of an elect international editorial team, this book encompasses many facets of dentistry including biomaterials, dental technology, operative dentistry, prosthodontics, orthodontics,

periodontics, and implant dentistry. Each chapter is divided into two parts. The first part consists of the latest evidence-based clinical concepts and biomaterials information related to the topic. The second section provides step-by-step high-quality illustration of the associated clinical procedures. The detailed photographic description of restorative and surgical procedures will ensure proper decision making and enhanced technique. Clinicians, technicians, and auxiliary staff will discover ways to make improvements in their work, maximize their productivity, and provide improved oral health to their patients.
