[The Legend of Lakshmi Prasad](#) - Lakshmi Prasad 2016-10-28

I am Lakshmi Prasad, native of Bihar. I am doing PhD on a very important subject "Mating habits of gay chimpanzees in West Africa" at PANU University, the best University in India and possibly the best University in the world. My idols are "Faizal Guru", "Janab Kasab Sahib", "Focus Carat", "Baba Badkar", "Zakir Nalayak", "Gharkha Dutt", "Dr. Kana Ayyub" and all PhD students who had committed suicide since they failed to solve their PhD problems. I personally feel that, all deprived Indians should automatically be awarded a PhD degree coupled with a free pension of 1 lakh rupees/month to be delivered in cash via post at door step. Till then we are going to fight for azaadi from India. Imagine a day, when no PhD student would have to commit suicide, imagine a day, when no lower caste will be humiliated by upper caste, s/he can use his/her doctorate degree and force others to call him/her Dr. X, Dr. Y, etc.

[Human Learning: Biology, Brain, and Neuroscience](#) - Aaron S. Benjamin 2008-08-15

Human learning is studied in a variety of ways. Motor learning is often studied separately from verbal learning. Studies may delve into anatomy vs function, may view behavioral outcomes or look discretely at the molecular and cellular level of learning. All have merit but they are dispersed across a wide literature and rarely are the findings integrated and synthesized in a meaningful way. Human Learning: Biology, Brain, and Neuroscience synthesizes findings across these levels and types of learning and memory investigation. Divided into three sections, each section includes a discussion by the editors integrating themes and ideas that emerge across the chapters within each section. Section 1 discusses general topics in human learning and cognition research, including inhibition, short term and long term memory, verbal memory, memory disruption, and scheduling and learning. Section 2 discusses cognitive neuroscience aspects of human learning. Coverage here includes models, skill acquisition, declarative and non declarative memory, age effects on memory, and memory for emotional events. Section 3 focuses on human motor learning. This book is suitable for cognitive neuroscientists, cognitive psychologists, kinesthesiologists, and graduate courses in learning. * Synthesizes research from a variety of disciplines, levels, and content areas * Provides section discussions on common findings

between chapters * Covers motor and verbal learning

A dog on the loose. A boy yearning to connect to his family's roots. A country in the midst of great change. And a vibrant exploration of the power of stories—the ones we tell each other and the ones we find ourselves in. Twelve-year-old Marwand's memories from his previous visit to Afghanistan six years ago center on his contentious relationship with Budabash, the terrifying but beloved dog who guards his extended family's compound in the rural village of Logar. But eager for an ally in this place that is meant to be "home," Marwand misreads his reunion with the dog and approaches Budabash the way he would any pet on his American suburban block—and the results are disastrous: Marwand loses a finger, and Budabash escapes into the night. Marwand is not chastened and doubles down on his desire to fit in here. He must get the dog back, and the resulting search is a gripping and vivid adventure story, a lyrical, funny, and surprisingly tender coming-of-age journey across contemporary Afghanistan that blends the bravado and vulnerability of a boy's teenage years with an homage to familial oral tradition and calls to mind *One Thousand and One Nights* yet speaks with a voice all its own.

#MeToo in the Corporate World - Sylvia Ann Hewlett 2020-01-28

Economist and award-winning author Sylvia Ann Hewlett blends vivid stories with powerful new data in assessing the impact of the #MeToo movement in corporate America and provides concrete action to help executives and companies create more inclusive and safe work

environments for women, people of color, and LGBTQ employees. While the #MeToo movement has exposed the enormous harm done by sexual misconduct in the workplace, the movement's full promise has not been fulfilled, Sylvia Ann Hewlett argues. Showcasing new data on the incidence of sexual harassment and assault at work, she reveals how the movement has focused almost exclusively on white women and failed to support other vulnerable groups who are also targets of abuse. Black men, gay men and women, and Latinas experience particularly high rates of sexual harassment and assault. In addition to exploring the movement's limitations, Hewlett examines the collateral damage inflicted by #MeToo. She looks at hits to the bottom line (lawsuits and settlements, tarnished brands, and stock devaluations) and hits to the talent pipeline. In particular she shows how male leaders, fearful of gossip and legal action, are increasingly skittish about sponsoring young women, no matter how high performing they are. This makes it much more likely that women will stall out mid-career and will deprive companies of diversity in the C-Suite and "gender smarts" around decision-making tables. Digging deep into examples that range from Fox News, Nike, and Google to CBS, Michigan State University, and the Catholic Church, Hewlett lays bare the financial losses associated with sexual misconduct scandals. No wonder corporate chief risk officers newly have #MeToo in their line of sight! A third of this book is devoted to solutions and Hewlett offers a three-pronged strategy, combining legal remedies with individual and corporate action steps that can be used to protect employees and businesses they work for. Drawing from companies as different as IBM and IPG she discusses "experiments at the edge" as well as more evolved initiatives that can help any corporation create a more equitable and safer environment.

SOON TO BE A MAJOR MOTION PICTURE The stunning Booker Prize-winning novel from the author of *Amnesty* and *Selection Day* that critics have likened to Richard Wright's *Native Son*, *The White Tiger* follows a darkly comic Bangalore driver through the poverty and corruption of modern India's caste society. "This is the authentic voice of the Third World, like you've never heard it before" (John Burdett, *Bangkok 8*). The white tiger of this novel is Balram Halwai, a poor Indian villager whose great ambition leads him to the zenith of Indian business culture, the world of the Bangalore entrepreneur. On the occasion of the president of China's impending trip to Bangalore, Balram writes a letter to him describing his transformation and his experience as driver and servant to a wealthy Indian family, which he thinks exemplifies the contradictions and complications of Indian society. Recalling *The Death of Vishnu* and *Bangkok 8* in ambition, scope, *The White Tiger* is narrative genius with a mischief and personality all its own. Amoral, irreverent, deeply endearing, and utterly contemporary, this novel is an international publishing sensation—and a startling, provocative debut.

Corporate Criminal Responsibility - Australian Law Reform Commission 2020-08-31

The Land-Water-Energy Nexus - Organisation for Economic Co-Operation and Development (OECD) 2017-11-15

This report contributes to the discussion of interconnections between scarce resources by highlighting the nexus between land, water and energy (the LWE nexus). It focuses on a dynamic, integrated, and disaggregated analysis of how land, water and energy interact in the biophysical and economic systems. The report provides projections for the biophysical and economic consequences of nexus bottlenecks until 2060, highlighting that while the LWE nexus is essentially local, there can be significant large-scale repercussions in vulnerable regions, notably on forest cover and in terms of food and water security. The analysis is based on coupling a gridded biophysical systems model with a multi-regional, multi-sectoral dynamic general equilibrium modelling assessment. Numerical insights are provided by investigating a carefully selected set of scenarios that are designed to illustrate the key bottlenecks: one scenario for each resource bottleneck, plus two scenarios that combine all bottlenecks, with and without an overlay of climate change.
