The Water Engine - José Antonio Alías García
2019-09-30

The "water engine" is an invention unfortunately invented many times. Hydrogen from water is very abundant, renewable and can be used in both energy poor and rich countries. Crude oil

and natural gas are limited energy resources. But there are many people who think that certain promising technologies have been suppressed by various political or economic powers, usually with the purpose of protecting their investments and interests and, at the already more absurd

extremes of the conspiracy illogical, for sinister motivations of much greater scope. In this new work, the versatile composer and writer Van Jaag, accompanies us on an exciting journey through the history of this unknown invention and its invented inventors.

Why buy a book you can download for free? We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes

original commentary which is copyright material. Note that government documents are in the public domain. We print these paperbacks as a service so you don't have to. The books are compact, tightly-bound paperback, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a SDVO SB.

Only Cry For The Living - Hollie S. McKay
2021-03-04

Only once in a lifetime does a war so brutal erupt. A war that becomes an official genocide, causes millions to run from their homes, compels the slaughtering of thousands in the most horrific of ways, and inspires terrorist attacks to transpire across the world. That is the chilling legacy of the ISIS onslaught, and Only Cry for the Living takes a profoundly personal, unprecedented dive into one of the most brutal terrorist organizations in the world. Journalist Hollie S. McKay offers a raw, on-the-ground journey chronicling the rise of ISIS in Iraq—exposing the group’s vast impact and how and why it sought to wage terror on civilians in a desperate attempt to create an antiquated “caliphate.”

Emitter Detection and Geolocation for Electronic Warfare - Nicholas O'Donoghue 2019-10-31

This comprehensive resource provides theoretical formulation for detecting and geolocating non-cooperative emitters. Implementation of geolocation algorithms are discussed, as well as performance prediction of a hypothetical passive location system for systems analysis or vulnerability calculation. Comparison of novel direction finding and geolocation algorithms to classical forms are also included. Rooted in statistical signal processing and array processing theory, this book also provides an

overview of the application of novel detection and estimation algorithms to real world problems in EW. The book is divided into three parts: detection, angle of arrival estimation, and geolocation. Each section begins with an introductory chapter covering the relevant signal processing theory (either detection or estimation), then provides a series of chapters covering specific methods to achieve the desired end-product. MATLAB® code is provided to assist readers with relevant probability and statistics, RF propagation, atmospheric absorption, and noise, giving readers an understanding of the implementation of the algorithms in the book, as well as developing new approaches to solving problems. Packed with problem sets and examples, this book strikes a balance between introductory texts and reference manuals, making it useful for novice as well as advanced practitioners.
