The 'Made in Germany' Champion Brands - Ugesh A. Joseph 2016-03-09

Germany's economic miracle is a widely-known phenomenon, and the world-leading, innovative products and services associated with German companies are something that others seek to imitate. In The 'Made in Germany' Champion Brands, Ugesh A. Joseph provides an extensively researched, insightful look at over 200 of Germany's best brands to see what they stand for, what has made them what they are today, and what might be

transferable. The way Germany is branded as a nation carries across into the branding of its companies and services, particularly the global superstar brands - truly world-class in size, performance and reputation. Just as important are the medium-sized and small enterprises, known as the 'Mittelstand'. These innovative and successful enterprises from a wide range of industries and product / service categories are amongst the World market leaders in their own niche and play a huge part in making Germany what it is today. The book also focuses on

German industrial entrepreneurship and a selection of innovative and emergent stars. All these companies are supported and encouraged by a sophisticated infrastructure of facilitators, influencers and enhancers - the research, industry, trade and standards organizations, the fairs and exhibitions and all the social and cultural factors that influence, enhance and add positive value to the country's image. Professionals or academics interested in business; entrepreneurship; branding and marketing; product or service development; international trade and business development policy, will find fascinating insights in this book; while those with an interest in Germany from emerging industrial economies will learn something of the secrets of German success.

Gems in the Early Modern World - Michael Bycroft
2018-11-27

This edited collection is an interdisciplinary study of gems in the early modern world. It examines the relations between the art, science, and technology of gems, and it does so against the backdrop of an expanding global trade in gems. The eleven chapters are organised into three parts. The first part sets the scene by describing how gems moved around the early modern world, how they were set in motion, and how they were pulled together in the course of their travels. The second part is about value. It asks why people valued gems, how they determined the value of a given gem, and how the value of a gem was connected to its perceived place of origin. The third part deals with the skills involved in cutting, polishing, and mounting gems, and how these skills were transmitted and articulated by artisans. The common themes of all these chapters are materials, knowledge and global trade. The contributors to this volume focus on the material properties of gems such as

their weight and hardness, on the knowledge involved in exchanging them and valuing them, and on the cultural consequences of the expanding trade in gems in Eurasia and the Americas.

Of Reynaert the Fox - A. Th Bouwman 2009

An entertaining reworking of the most popular branch of the Old French tale of Reynard the Fox, the mid-thirteenth century Dutch epic *Van den vos Reynaerde* is one of the earliest long literary works in the Dutch vernacular. Sly Reynaert and a cast of other comical woodland characters find themselves again and again caught up in escapades that often provide a satirical commentary on human society. This charmingly volume is the first bilingual edition of the tale, featuring facing pages with an English translation by Thea Summerfield, making the undisputed masterpiece of medieval Dutch literature accessible to a wide

**CAPS LOCK: How
Capitalism Took Hold of
Graphic Design, and How to
Escape from It** - Ruben Pater
2021-09-21

Capitalism could not exist
without the coins, banknotes,
documents, information
graphics, interfaces, branding,
and advertisements made by
graphic designers. Even anti-
consumerist strategies such as
social design and speculative
design are appropriated to
serve economic growth. It
seems design is locked in a
cycle of exploitation and
extraction, furthering
inequality and environmental
collapse. CAPS LOCK uses
clear language and visual
examples to show how graphic
design and capitalism are

inextricably linked. The book
features designed objects and
also examines how the study,
work, and professional practice
of designers support the
market economy. Six radical
design cooperatives are
featured that resist capitalist
thinking in their own way,
hoping to inspire a more
socially aware graphic design.

mid-infrared spectra of symmetric and spherical top molecules in their gaseous form. Theoretical models based on the use of group theory are applied to rigid and non-rigid molecules, characterized by the phenomenon of tunneling and large amplitude motions. The calculation of vibration-rotation energy levels and the analysis of infrared transitions are applied to molecules of ammonia (NH₃) and methane (CH₄). The applications show how interactions at the molecular scale modify the near and mid-infrared spectra of isolated molecules, under the influence of the pressure of a nano-cage (the substitution site of a rare gas matrix, clathrate, fullerene or zeolite) or a surface, and allow us to identify the characteristics of the perturbing environment. This book provides valuable support for teachers and researchers but is also intended for engineering students, working research engineers and Master's and doctorate students.

Plant Location Selection

Techniques - Edwin M. McPherson 1995-12-31

This book ties together history, legislation and economics to create an awareness of what chances an individual will have when he selects a location for a plant. Key costs are discussed including those mandated by the environment and by legislation. The impact of cultures, both past and present, upon the opportunity for economic success are reviewed. It is a "How To" and a "Beware" presentation of plant location, both domestic and international. The book is designed to provide chief executive officers, manufacturing vice presidents, chief engineers and engineers a checklist of things to do in analyzing a potential plant site. It is also designed to provide state and local industrial development staffs' guidance in their efforts to obtain industry. New entrepreneurs will find this book to be useful in making presentations to financial agencies. The do's and don'ts of plant location are dealt with from both the

current and historical prospective. The impact of legislation upon manufacturing costs and thereby industry location is covered by both current and past examples. Examples of failed locations from both industry and site planners perspectives are provided. The book shows how to choose the best location in a country through arraying the basic economic and social facts in an orderly manner. Both tangible and intangible cost analysis and factor weighting are covered. Included are the impact of customs, legal systems, ways of doing business upon costs, management style and plant efficiency. Current legislation's potential impact upon plant location is evaluated. This review includes GATT, NAFTA, CBI and other international direct and indirect influences on markets and costs. Also the present and potential impact of OSHA, ADA, EPA and other national mandates is covered.

Everyday Nationalism in Hungary - Alexander Maxwell
2019-09-23

This book examines Hungarian nationalism through everyday practices that will strike most readers as things that seem an unlikely venue for national politics. Separate chapters examine nationalized tobacco, nationalized wine, nationalized moustaches, nationalized sexuality, and nationalized clothing. These practices had other economic, social or gendered meanings: moustaches were associated with manliness, wine with aristocracy, and so forth. The nationalization of everyday practices thus sheds light on

how patriots imagined the nation's economic, social, and gender composition. Nineteenth-century Hungary thus serves as the case study in the politics of "everyday nationalism." The book discusses several prominent names in Hungarian history, but in unfamiliar contexts. The book also engages with theoretical debates on nationalism, discussing several key theorists. Various chapters specifically examine how historical actors imagine relationship between the nation and the state, paying particular attention Rogers Brubaker's constructivist approach to nationalism without groups, Michael Billig's notion of 'banal nationalism,' Carole Pateman's ideas about the nation as a 'national brotherhood', and Tara Zahra's notion of 'national indifference.'

resource for quick, no-nonsense insights into understanding and using UML 2.0 and prior versions of the UML. Some readers will want to quickly get up to speed with the UML 2.0 and learn the essentials of the UML. Others will use this book as a handy, quick reference to the most common parts of the UML. The author delivers on both of these promises in a short, concise, and focused presentation. This book describes all the major UML diagram types, what they're used for, and the basic notation involved in creating and deciphering them. These diagrams include class, sequence, object, package, deployment, use case, state machine, activity, communication, composite structure, component, interaction overview, and timing diagrams. The examples are clear and the explanations cut to the fundamental design logic. Includes a quick reference to the most useful parts of the UML notation and a useful summary of diagram

types that were added to the UML 2.0. If you are like most developers, you don't have time to keep up with all the new innovations in software engineering. This new edition of Fowler's classic work gets you acquainted with some of the best thinking about efficient object-oriented software design using the UML--in a convenient format that will be essential to anyone who designs software professionally.

Iris Grace - Arabella Carter-Johnson 2017-04-25

"Iris' story, as told and photographed by her mother, beautifully deciphers the way a child with autism sees and approaches the world . . .

Compelling reading" (Booklist, starred review). Iris Grace is a beautiful little girl who, from a very young age, barely communicated, avoided social interaction with other people, and rarely smiled. Both before her diagnosis of autism and after, she seemed trapped in her own world, unable to connect with those around her. One day, her mother brought

home a Maine Coon kitten for Iris, even though cats aren't typically thought of as therapy pets. Thula, named after one of Iris's favorite African lullabies and meaning "peace" in Zulu, immediately bonded with Iris. Thula knew right away how to assuage Iris when she became overstimulated; when to intervene when Iris became overwhelmed; and how to provide distraction when Iris started heading toward a meltdown. Whether exploring, playing, sleeping, or taking a bath with Iris or accompanying the family on a bike ride, Thula became so much more than a therapy cat. With Thula's safe companionship, Iris began to talk and interact with her family. This heartwarming story is illustrated with both the author's photographs and sixty of Iris's gorgeous impressionistic paintings, works of art that have allowed her to express herself since the age of three. A gifted artist, Iris sees the natural world in a profoundly vivid and visceral way. With Thula by her side, she'll sit and paint for hours,

and the results are stunning. Inspiring and touching, Iris Grace follows the struggles and triumphs of a family—and a miracle cat—as they learn to connect with an amazing child. *Ysengrimus* - Nivardus 1884

Mumbai is an ever-evolving city, bustling and brimming, never sleeping for a wink. But the past four decades brought upheavals of great magnitude that shaped the city as we know today. Marred by communal riots, gang wars and terrorism, the spirit of Mumbai has emerged indomitable every single time. Born and raised in the lanes of Bombay 3, this is the story of Jagan Kumar who dreams of being a television journalist and changing the world. But once he achieves this, he realises that television journalism has lost its path, now afflicted with sensationalism, corruption and bias. As a crime reporter, he

comes across various unscrupulous means that law enforcement agencies adopt to combat organised crime syndicates. He is shocked to witness interdepartmental rivalry that often jeopardises public security. Disenchanted, in conflict with his conscience and confused about his calling, he is about to quit when something happens that changes the course of his life. *Bombay 3* begins from the bylanes of old Bombay of the seventies and then takes you to Mosul in ISIS's Iraq of 2014 and finally to the streets of Bangkok where the underworld of Mumbai has spread its tentacles. A fast-paced thriller, it answers certain questions about life in Mumbai and raises a few new ones.

Entrepreneurship-Professionalism-Leadership - Moon-Ho

Ringo Ho 2020-06-11

This book updates the theory and brings together empirical research based on the multidimensional entrepreneurship-professionalism-leadership (EPL) framework for subjective career 'space'. It also discusses the extension of the original 'person-centred' framework to other levels of analysis, for example, ways of considering the EPL (human capital) capacities of an organisation, city, or even nation. By providing insights into the development of EPL motivations and efficacies over time, the book helps readers appreciate the application of the EPL framework in a wider range of contexts, such as research-innovation-enterprise, healthcare, and pre-university settings. It also shows how EPL research contributes to a better understanding of leadership and entrepreneurial development.

Studies in Indian Coins - D.C. Sircar 2008

The present book is an authoritative and authentic source for the study of Indian coins. It not only describes the coins but also studies them critically in all their aspects. The points which are dealt with here are on numismatic studies in India; Satamana and Sana; Kautilya and Buddhaghosa on coins; silver coins of Vasisthiputra Satakarni; alleged coins of the Mahisa kings; coins of semi-independent rulers; date of Isvaradatta's coins; Petluripalem hoard; some problems of tribal coins; coins of Kumaragupta I, Harigupta and Ramagupta; coins of Muhammad bin Sam and Prthviraja; coins of Kakatiya Prataparudra I; Gajapati Pagoda, Ganga Fanam and Ramatanka; coins of Bhairavasimha; Maratha mint under the Peshwas; Cowrie-shell, rupee and pice. In describing the features of a particular class of coins from the standpoint of standard, style and fabric or in discussing

the significance of the numismatic terms, the author has utilized the literary data which have a bearing on them.
