The Numerati - Stephen Baker 2009-09-08

Learn how the crisis over digital privacy and manipulation evolved in this “utterly fascinating” look at the growth of data mining and analysis (Seattle Post-Intelligencer). Award-winning journalist Stephen Baker traces the rise of the “global math elite”: computer scientists who invent ways to not only record our behavior, but also to predict and alter it. Nowadays, we don’t need to be online to create a digital trail; we do it simply by driving through an automated tollbooth or shopping with a credit card. As massive amounts of information are collected, sifted, and analyzed, we all become targets of those who want to influence everything from what we buy to how we vote. Clear and “highly readable,” The Numerati is a look at the origins of our present-day world, the possibilities of the future, and those who—whether with good or bad intentions—profile us as workers, consumers, citizens, or potential terrorists (The Wall Street Journal).

[Imagine, a World Without DIS-EASE](#) - Mark S. Grenon 2020-01-20

Volume Two of 'Imagine, A World Without DIS-EASE' is an autobiographical narrative of the Genesis II Church of Health and Healing told by the Co-founder, Mark S. Grenon. This Amazing Journey started back in 2006 where Mark, then a missionary pilot in the Dominican Republic was working with medical teams in the D.R. and in Haiti when he contracted MRSA, a staph infection along with his three sons while working as interpreters. The MRSA spread to all of his 8 children! Nothing worked to kill this infection. After months of using the 'latest and greatest' antibiotics known at that time, it was getting worse! In desperation to save his son, Jonathan's leg, he found a free eBook on the internet written by a miner named Jim Humble. That book, 'Breakthrough, The Miracle Mineral Supplement of the 21st Century' not only 'restored health' for him and his family from the MRSA but put him on a path that changed his life! Mark and his sons, Jonathan and Joseph went on to help hundreds in the D.R. and Haiti 'restore health' from many different illnesses such as: Diabetes, AIDS, Dengue, Gastritis, Cancer, to name just a few. In 2010, Jim Humble came to live with the Grenon Family at their mission compound in Barahona, D.R. where they founded the G2Church. The G2Church has grown today as of January 2020, to over 3,700 members in 145+ countries with 1997 Health Ministers, 115 Bishops and 252 Church Chapters. For the past 3 years, 10+ testimonies of 'restored health' from 95% of the illnesses in this world are coming in and being read in the free weekly G2Church Newsletter [www.g2churchnews.org](http://www.g2churchnews.org) and on the weekly G2Voice Broadcast at: [www.g2voice.is](http://www.g2voice.is). This book will cover this incredible story starting in 2006 to 2014. May the Lord use this book to help many 'restore health!' Mark S. Grenon

Developing Intelligent Agent Systems - Lin Padgham 2005-06-24

Build your own intelligent agent system... Intelligent agent technology is a tool of modern computer science that can be used to engineer complex computer programmes that behave rationally in dynamic and changing environments. Applications range from small programmes that

intelligently search the Web buying and selling goods via electronic commerce, to autonomous space probes. This powerful technology is not widely used, however, as developing intelligent agent software requires high levels of training and skill. The authors of this book have developed and tested a methodology and tools for developing intelligent agent systems. With this methodology (Prometheus) developers can start agent-oriented designs and implementations easily from scratch saving valuable time and resources. Developing Intelligent Agent Systems not only answers the questions "what are agents?" and "why are they useful?" but also the crucial question: "how do I design and build intelligent agent systems?" The book covers everything a practitioner needs to know to begin to effectively use this technology - including an introduction to the notion of agents, a description of the concepts involved, and a software engineering methodology. Read on for: a practical step-by-step introduction to designing and building intelligent agent systems. a full life-cycle methodology for developing intelligent agent systems covering specification, analysis, design and implementation of agents. PDT: Prometheus Design Tool - software support for the Prometheus design process. the example of an electronic bookstore to illustrate the design process throughout the book.

Electronic resources including the Prometheus Design Tool (PDT), can be found at: <http://www.cs.rmit.edu.au/agents/prometheus> This book is aimed at industrial software developers, software engineers and at advanced undergraduate students. It assumes knowledge of basic software engineering but does not require knowledge of Artificial Intelligence or of mathematics. Familiarity with Java will help in reading the examples in chapter 10.

[The Last Resort](#) - Douglas Rogers 2009-09-22

Thrilling, heartbreaking, and, at times, absurdly funny, *The Last Resort* is a remarkable true story about one family in a country under siege and a testament to the love, perseverance, and resilience of the human spirit. Born and raised in Zimbabwe, Douglas Rogers is the son of white farmers living through that country's long and tense transition from postcolonial rule. He escaped the dull future mapped out for him by his parents for one of adventure and excitement in Europe and the United States. But when Zimbabwe's president Robert Mugabe launched his violent program to reclaim white-owned land and Rogers's parents were caught in the cross fire, everything changed. Lyn and Ros, the owners of Drifters—a famous game farm and backpacker lodge in the eastern mountains that was one of the most popular budget resorts in the country—found their home and resort under siege, their friends and neighbors expelled, and their lives in danger. But instead of leaving, as their son pleads with them to do, they haul out a shotgun and decide to stay. On returning to the country of his birth, Rogers finds his once orderly and progressive home transformed into something resembling a Marx Brothers romp crossed with *Heart of Darkness*: pot has supplanted maize in the fields; hookers have replaced college kids as guests; and

soldiers, spies, and teenage diamond dealers guzzle beer at the bar. And yet, in spite of it all, Rogers's parents—with the help of friends, farmworkers, lodge guests, and residents—among them black political dissidents and white refugee farmers—continue to hold on. But can they survive to the end? In the midst of a nation stuck between its stubborn past and an impatient future, Rogers soon begins to see his parents in a new light: unbowed, with passions and purpose renewed, even heroic. And, in the process, he learns that the "big story" he had relentlessly pursued his entire adult life as a roving journalist and travel writer was actually happening in his own backyard. Evoking elements of *The Tender Bar* and *Absurdistan*, *The Last Resort* is an inspiring, coming-of-age tale about home, love, hope, responsibility, and redemption. An edgy, roller-coaster adventure, it is also a deeply moving story about how to survive a corrupt Third World dictatorship with a little innovation, humor, bribery, and brothel management.

*Making Sense of Data II* - Glenn J. Myatt 2009-03-04

A hands-on guide to making valuable decisions from data using advanced

data mining methods and techniques This second installment in the Making Sense of Data series continues to explore a diverse range of commonly used approaches to making and communicating decisions from data. Delving into more technical topics, this book equips readers with advanced data mining methods that are needed to successfully translate raw data into smart decisions across various fields of research including business, engineering, finance, and the social sciences. Following a comprehensive introduction that details how to define a problem, perform an analysis, and deploy the results, Making Sense of Data II addresses the following key techniques for advanced data analysis: Data Visualization reviews principles and methods for understanding and communicating data through the use of visualization including single variables, the relationship between two or more variables, groupings in data, and dynamic approaches to interacting with data through graphical user interfaces. Clustering outlines common approaches to clustering data sets and provides detailed explanations of methods for determining the distance between observations and procedures for clustering observations. Agglomerative hierarchical clustering, partitioned-based clustering, and fuzzy clustering are also discussed. Predictive Analytics presents a discussion on how to build and assess models, along with a series of predictive analytics that can be used in a variety of situations including principal component analysis, multiple linear regression, discriminate analysis, logistic regression, and Naïve Bayes. Applications demonstrates the current uses of data mining across a wide range of industries and features case studies that illustrate the related applications in real-world scenarios. Each method is discussed within the context of a data mining process including defining the problem and deploying the results, and readers are provided with guidance on when and how each method should be used. The related Web site for the series ([www.makingsenseofdata.com](http://www.makingsenseofdata.com)) provides a hands-on data analysis and data mining experience. Readers wishing to gain more practical experience will benefit from the tutorial section of the book in conjunction with the Traceis™ software, which is freely available online. When God Goes to Starbucks - Paul Copan 2008-08-01

More than ever, Christians are bombarded with tough faith questions from their pluralistic friends and neighbors. Many of these emerge as "anti-truth claims" and slogans we are all familiar with: • Why not just look out for yourself? • Do what you want--just as long as you don't hurt anyone • Miracles violate the laws of nature • Aren't people born gay? Paul Copan has been answering questions like these for many years. In When God Goes to Starbucks, he offers readers solid and caring Christian responses to these and many other concerns that are being discussed in Starbucks, shopping malls, youth groups, and schools. Each

chapter provides succinct answers and points for countering the cultural questions believers are faced with today.
