Grandad Mandela - Ambassador Zindzi Mandela 2018-06-28

"...profoundly moving..." -Publishers Weekly Nelson Mandela's two great-grandchildren ask their grandmother, Mandela's youngest daughter, 15 questions about their grandad - the global icon of peace and forgiveness who spent 27 years in prison. They learn that he was a freedom fighter who put down his weapons for the sake of peace, and who then became the President of South Africa and a Nobel Peace Prize-winner, and realise that they can continue his legacy in the world today. Seen through a child's perspective, and authored jointly by Nelson Mandela's great-grandchildren and daughter, this amazing story is told as never before to celebrate what would have been Nelson's Mandela 100th birthday.

The Matcha Cookbook - Aster 2018-08-02

From a simple matcha latte, to ice cream, infused salt, smoothie bowls, tea loaves and homemade beauty recipes, The Matcha Cookbook explores the history, health benefits and 50 delicious recipes using this super healthy ingredient. As an ingredient, matcha is growing in popularity with health foodies and wellness seekers, with over 2.7 million posts on Instagram. Research shows that matcha can reduce the risk of cancer, improve heart health, aid recovery from exercise and help prevent ageing; the traditional matcha tea alone contains the nutritional equivalent of 10 cups of regular green tea, with 137 times more antioxidants, acting as the body's defence agents. Recipes include: Creamed corn & egg on sourdough Matcha bliss balls Summer rolls with matcha dipping sauce Seared rib eye steak with matcha dressed greens Matcha lemon posset

Absorption-Based Post-Combustion Capture of Carbon Dioxide - Paul Feron 2016-05-27

Absorption-Based Post-Combustion Capture of Carbon Dioxide provides a comprehensive and authoritative review of the use of absorbents for post-combustion capture of carbon dioxide. As fossil fuel-based power generation technologies are likely to remain key in the future, at least in the short- and medium-term, carbon capture and storage will be a critical greenhouse gas reduction technique. Post-combustion capture involves the removal of carbon dioxide from flue gases after fuel combustion, meaning that carbon dioxide can then be compressed and cooled to form a safely transportable liquid that can be stored underground. Provides researchers in academia and industry with an authoritative overview of the amine-based methods for carbon dioxide capture from flue gases and related processes Editors and contributors are well known experts in the field Presents the first book on this specific topic

Computational Ship Design - Myung-Il Roh 2017-09-29

This book offers an introduction to the fundamental principles and systematic methodologies employed in computational approaches to ship design. It takes a detailed approach to the description of the problem definition, related theories, mathematical formulation, algorithm selection, and other core design information. Over eight chapters and appendices the book covers the complete process of ship design, from a detailed description of design theories through to cutting-edge applications. Following an introduction to relevant terminology, the first chapters consider ship design equations and models, freeboard calculations, resistance prediction and power estimation. Subsequent chapters cover topics including propeller deign, engine selection, hull form design, structural design and outfitting. The book concludes with two chapters considering operating design and economic factors including construction costs and fuel consumption. The book reflects first-hand experiences in ship design and R&D activities, and incorporates improvements based on feedback received from many industry experts. Examples provided are based on genuine case studies in the field. The comprehensive description of each design stage presented in this book offers guidelines for academics, researchers, students, and industrial manufactures from diverse fields, including ocean engineering and mechanical engineering. From a commercial point of view the book will be of great value to those involved in designing a new vessel or improving an existing ship.

Fitrah- Mans Natural Disposition - MURTADHA. MUTAHHARI 2021-11-27

"Fitrah: Man's Natural Disposition" is a translation of the Persian book "Fi?rat" by the great Muslim thinker and reformer, Ayatollah Murtada Mutahhari. "Fitrah" is the theme of a 10-session lecture series given the martyred thinker in 1976-77. With ample citations from the Qur'an and other traditional Islamic sources, Mutahhari discusses the concept of 'fitrah' or man's natural disposition. The author does not confine himself to Islamic references as he continuously engages with the views of a wide range of philosophers including Plato, William James, Russell, Nietzsche, Marx, Feuerbach, Auguste Comte, Spencer, Will Durant, and Durkheim, among others. Mutahhari's ontological discussion covers a range of issues, including the literal and technical meaning of 'fitrah', sacred inclinations, love and worship, and the evolution of human originality. He also examines materialism and provides a theistic approach to some issues pertaining to the theories on the origin of religion, the evolution of human society, intrinsic and acquired guidance, and intuitive and sensory dispositions. This book lays a significant interconnected and deep foundation in Islamic theology and an understanding of human psychology, sociology and anthropology fully supported by the holy Quran, ahadith, logic and philosophy. The reader will leave with a holistic understanding of Islam and a true connection with the Almighty (SWT) through one own self.

Robust Control of Diesel Ship Propulsion - Nikolaos Xiros 2012-12-06

Based on the author's research and practical projects, he presents a broad view of the needs and problems of the shipping industry in this area. The book covers several models and control types, developing an integrated nonlinear state-space model of the marine propulsion system.

Teatime Birthdays: Afternoon Tea Celebrations for All Ages - Lorna Ables Reeves 2020-09-15

Celebrating a birthday is a momentous occasion. And what better way to commemorate it than with a tea party? This collection of 10 afternoon-tea menus includes table settings and recipes idyllic for a range of themes--from a little girl's fairy-inspired party to a Jurassic-themed one for boys to a Parisian-glam Sweet 16, as well as several elegant options for adults. Each set of scones, savories, and sweets has a perfectly paired tea to complement each course, and our tea-steeping guide ensures each infusion is properly prepared. With more than 90 recipes, TeaTime Birthdays will make party-planning simple, and each menu is certain to delight invitees and, especially, the guest of honor.

Handbuch Dieselmotoren - Helmut Tschöke 2017-11-03

Die 4. Auflage dieses maßgeblichen Nachschlagewerkes informiert umfassend über den aktuellen Stand und die neuesten Entwicklungen der inzwischen 120 Jahre alten Dieselmotortechnologie. Mehr als 90 Experten aus Industrie und Wissenschaft zeigen zentrale sowie zukunftsweisende Innovationen zur Verbesserung der CO₂- und Schadstoffemissionen, des Betriebsverhaltens, der Kosten, der Zuverlässigkeit und Robustheit des Dieselantriebs. Aktuelle Entwicklungen berücksichtigt das Werk mit Erweiterungen um Inhalte zu alternativen Kraftstoffen, insbesondere zu Gasanwendungen, sowie zur Einbindung des Dieselmotors in hybride Antriebskonzepte für Pkw und Nutzfahrzeuge. Nach wie vor steht im Fokus der Entwicklungsanstrengungen, den Dieselmotor hinsichtlich seiner NO_x- und Partikelemissionen zu verbessern, um auch künftigen gesetzlichen Grenzwerten zu entsprechen. Das Buch befasst sich mit der Theorie, der Konstruktion und der Anwendung des Dieselmotors für alle möglichen Einsatzarten, vom Antrieb für Pkw über SUVs und Pick-ups bis hin zu den schwersten Nutzfahrzeugen und Lokomotiven, für stationäre und mobile Arbeitsmaschinen sowie für nahezu alle Schiffsgrößen.

Modern Marine Internal Combustion Engines - Ievgen Bilousov 2020-06-30

This book offers a comprehensive and timely overview of internal combustion engines for use in marine environments. It reviews the development of modern four-stroke marine engines, gas and gas-diesel engines and low-speed two-stroke crosshead engines, describing their application areas and providing readers with a useful snapshot of their technical features, e.g. their dimensions, weights, cylinder arrangements, cylinder capabilities, rotation speeds, and exhaust gas temperatures. For each marine engine, information is provided on the manufacturer, historical background, development and technical characteristics of the manufacturer's most popular models, and detailed drawings of the engine, depicting its main design features. This book offers a unique, self-contained reference guide for engineers and professionals involved in shipbuilding. At the same time, it is intended to support students at maritime academies and university students in naval architecture/marine engineering with their design projects at both master and graduate levels, thus filling an important gap in the literature.

The Omega Prize - S. L. Millward 2010

This is a story which will make your heart sing - a story for all the family to read together. Young Judy discovers an unexpected package in her grandfather's old study. She has never met her grandfather (Poppy) as he died before she was born, but Judy is the one to unearth the puzzle which Poppy left for his family. To find the treasure which Poppy left, the family must first solve every riddle which he wrote on a beautiful scroll, and carefully wrapped in a rich purple velvet bag. Unless they solve the puzzles, they won't find the treasure. See if you can solve the puzzles before the family does. What has Poppy left them as an inheritance? Have fun with the story and enjoy the Omega Prize at the end.

Jeter Unfiltered - Derek Jeter 2014-10-28

The only authorized full-color book commemorating Derek Jeter's iconic baseball career with the New York Yankees, featuring archival images and original photos of his final 2014 season from renowned photographer Christopher Anderson. Derek Jeter's twentieth and final season in Major League Baseball truly marks the end of a sports era. The New York Yankees' shortstop—a five-time World Series victor, team captain since 2003, and one of the greatest ballplayers of all time—is a beloved and inspiring role model

who displays the indefinable qualities of a champion, on and off the field. *Jeter Unfiltered* is a powerful collection of never-before-published images taken over the course of Derek's final season. Fans will have unprecedented access to "The Captain," as the famously private baseball legend takes us behind the scenes—inside his home, the stadium, the gym, at his Turn 2 Foundation events, fortieth birthday party, and more—as he looks back with candor and gratitude on his baseball career. The result is an intimate portrait bursting with personality, professionalism, and pride. *Jeter Unfiltered* is Jeter as you have never seen him before: unguarded, unapologetic...unfiltered.

Walker Evans - Walker Evans 2001

"As novelist and poet Andrei Codrescu points out in the essay that accompanies this selection of photographs from the Getty Museum's collection, Evans's photographs are the work of an artist whose temperament was distinctly at odds with Beals's impassioned rhetoric. Evans's photographs of Cuba were made by a young, still maturing artist who - as Codrescu argues - was just beginning to combine his early, formalist aesthetic with the social concerns that would figure prominently in his later work."--Jacket.

Maritime Technology and Engineering - Carlos Guedes Soares 2014-09-30

Maritime Technology and Engineering includes the papers presented at the 2nd International Conference on Maritime Technology and Engineering (MARTECH 2014, Lisbon, Portugal, 15-17 October 2014). The contributions reflect the internationalization of the maritime sector, and cover a wide range of topics: Ports; Maritime transportation; Inland navigat

Atheism - S. T. Joshi 2000

An anthology of writings on atheism, agnosticism, and skepticism by some of the world's most celebrated thinkers.

Foundations of Topology - C. Wayne Patty 2009

Topology is a branch of pure mathematics that deals with the abstract relationships found in geometry and analysis. Written with the mature student in mind, *Foundations of Topology, Second Edition*, provides a user-friendly, clear, and concise introduction to this fascinating area of mathematics. The author introduces topics that are well motivated with thorough proofs that make them easy to follow. Historical comments are dispersed throughout the text, and exercises, varying in degree of difficulty, are found at the end of each chapter. *Foundations of Topology* is an excellent text for teaching students how to develop the skill to write clear and precise proofs.

Warship 1996 - David McLean 1997-01

This annual publication includes a wide range of feature articles devoted to the design, development and service history of the world's fighting ships.

Essentials of CRM - Bryan Bergeron 2004-01-16

ESSENTIALS OF CRM Full of valuable tips, techniques, illustrative real-world examples, exhibits, and best practices, this handy and concise paperback will help you stay up to date on the newest thinking,

strategies, developments, and technologies in CRM. "Once again, Bryan Bergeron proves that he is ahead of the curve when it comes to understanding the value of customer relationships. This remarkable book is geared not only toward corporate executives with mega-investments in CRM, but can also be successfully applied to the street corner vendor. His articulate and sensitive style brings this highly involved subject matter to a level we can all understand." —Michael Cusack, author of *Online Customer Care: Strategies for Call Center Excellence* "Managing relationships with customers has become a critical organizational competency. Bergeron has done a superb job of presenting the breadth, complexity, and nature of CRM. This book provides a fabulous and actionable grounding in CRM for organizational leadership." —John Glaser, PhD, Vice President and CIO, Partners Healthcare System The Wiley Essentials Series—because the business world is always changing...and so should you.

Towards Green Marine Technology and Transport - Carlos Guedes Soares 2015-09-04

Towards Green Marine Technology and Transport covers recent developments in marine technology and transport. The book brings together a selection of papers reflecting fundamental areas of recent research and development in the fields of ship hydrodynamics, marine structures, ship design, shipyard technology, ship machinery, maritime transportation,

Rich man poor man - Thomas Cyprian Jupp 1992

Adam's money order was for one hundred pounds. Suddenly he was a rich man. Go to the post office and the Post Office official will give you the money. Adam did, but the official did not give him the money. He felt poor again.

Voodoo River - Robert Crais 2013-07-16

Elvis Cole finds himself deep in the bayou of Louisiana searching for the estranged parents of a television star -- but something deadly is looking for him. L.A. private eye Elvis Cole is hired by popular television star Jodie Taylor to delve into her past and identify the biological parents who gave her up for adoption thirty-six years before. Cole's assignment is to find out their biological history and report back. It seems all too clear cut. But when he gets to Louisiana and begins his search, he finds that there's something much darker going on. Other people are also looking for Taylor's parents, and some are ending up dead. And when Cole realizes that his employer knew more than she was telling, *Voodoo River* becomes a twisting tale of identity, secrets, and murder.

Internal Combustion Engines and Powertrain Systems for Future Transport 2019 - IMECHE 2020-03-09

With the changing landscape of the transport sector, there are also alternative powertrain systems on offer that can run independently of or in conjunction with the internal combustion (IC) engine. This shift has actually helped the industry gain traction with the IC Engine market projected to grow at 4.67% CAGR during the forecast period 2019-2025. It continues to meet both requirements and challenges through continual technology advancement and innovation from the latest research. With this in mind, the contributions in *Internal Combustion Engines and Powertrain Systems for Future Transport 2019* not only cover the particular issues for the IC engine market but also reflect the impact of alternative powertrains on the propulsion industry. The main topics include: • Engines for hybrid powertrains and electrification • IC engines • Fuel cells • E-machines • Air-path and other technologies achieving performance and fuel economy benefits • Advances and improvements in combustion and ignition systems • Emissions regulation and their control by engine and after-treatment • Developments in real-world driving cycles • Advanced boosting systems • Connected powertrains (AI) • Electrification opportunities • Energy conversion and recovery systems • Modified or novel engine cycles • IC engines for heavy duty and off highway *Internal Combustion Engines and Powertrain Systems for Future Transport 2019* provides a forum for IC engine, fuels and powertrain experts, and looks closely at developments in powertrain technology required to meet the demands of the low carbon economy and global competition in all sectors of the transportation, off-highway and stationary power industries.

Ship Design - Apostolos Papanikolaou 2014-09-16

This book deals with ship design and in particular with methodologies of the preliminary design of ships. The book is complemented by a basic bibliography and five appendices with useful updated charts for the selection of the main dimensions and other basic characteristics of different types of ships (Appendix A),

the determination of hull form from the data of systematic hull form series (Appendix B), the detailed description of the relational method for the preliminary estimation of ship weights (Appendix C), a brief review of the historical evolution of shipbuilding science and technology from the prehistoric era to date (Appendix D) and finally a historical review of regulatory developments of ship's damage stability to date (Appendix E). The book can be used as textbook for ship design courses or as additional reading for university or college students of naval architecture courses and related disciplines; it may also serve as a reference book for naval architects, practicing engineers of related disciplines and ship officers, who like to enter the ship design field systematically or to use practical methodologies for the estimation of ship's main dimensions and of other ship main properties and elements of ship design.

Sustainable Maritime Transportation and Exploitation of Sea Resources - Enrico Rizzuto 2011-09-20 *Sustainable Maritime Transportation and Exploitation of Sea Resources* covers the most updated aspects of maritime transports and of coastal and sea resources exploitation, with a focus on (but not limited to) the Mediterranean area. Vessels for transportation are analysed from the viewpoint of ship design in terms of hydrodynamic, structural and plant optimisation, as well as from the perspective of construction, maintenance, operation and logistics. The exploitation of marine and coastal resources is covered in terms of fishing, aquaculture and renewable energy production as well as of subsea resources extraction. The characterisation of the marine environment is seen under the twofold perspective of providing reference loads and conditions for the design of means for the resources exploitation, but also of setting limits to the design in order to preserve the natural ambient and minimise the impact of anthropogenic activities related to both transportation and exploitation. Efficiency, reliability, safety and sustainability of sea- and Mediterranean-related human activities are the focus throughout the book. *Sustainable Maritime Transportation and Exploitation of Sea Resources* will be of interest to technical operators in the various areas involved (shipbuilding and ship-owner companies, research organisations, universities, certifying bodies), but will also serve as an updated reference work for government agencies and other institutional and educational bodies.

Marvel Doodles - Marvel Book Group 2016-10-04

Younglings can draw, color, and create with all their favorite characters from the Marvel films. From *Guardians of the Galaxy* to *Spider-Man*, every page is packed with doodles. Readers can use their artistic powers to bring these sensational scenes to life!

Advances in IC Engines and Combustion Technology - Ashwani K. Gupta 2020-08-18

This book comprises select peer-reviewed proceedings of the 26th National Conference on IC Engines and Combustion (NCICEC) 2019 which was organised by the Department of Mechanical Engineering, National Institute of Technology Kurukshetra under the aegis of The Combustion Institute-Indian Section (CIIS). The book covers latest research and developments in the areas of combustion and propulsion, exhaust emissions, gas turbines, hybrid vehicles, IC engines, and alternative fuels. The contents include theoretical and numerical tools applied to a wide range of combustion problems, and also discusses their applications. This book can be a good reference for engineers, educators and researchers working in the area of IC engines and combustion.

Math 87 - Stephen Hake 1999

Cuaderno del estudiante [Spanish student workbook] to be used with the English student textbook; may be used individually or as a source for blackline masters.

On Literary Theory and Philosophy - Richard Freadman 1991-01-01

The Killing of Cynthia Sykes - E.W. MacNeill 2020-06-18

It starts out with a protagonist a Philadelphia detective who is assigned to investigate the murder of a rich business woman. He is a veteran of twenty years as a detective and is considered very good at his job. During the course of his investigation he interviews a person of interest who is the vice president of the victims company. He interviews her for a second time and there starts a romantic connection between the two. The antagonist in this book is a Russian operative named Jason who is tasked to acquire secrets from a high level American diplomat. The romantic interest in this novel name is Susan Conway and she is the vice president of the Sykes Empire. Cynthia Sykes is the victim in this novel.

Ship Resistance and Propulsion - Anthony F. Molland 2011-08-08

Ship Resistance and Propulsion provides a comprehensive approach to evaluating ship resistance and propulsion. Informed by applied research, including experimental and CFD techniques, this book provides guidance for the practical estimation of ship propulsive power for a range of ship types. Published standard series data for hull resistance and propeller performance enables practitioners to make ship power predictions based on material and data contained within the book. Fully worked examples illustrate

applications of the data and powering methodologies; these include cargo and container ships, tankers and bulk carriers, ferries, warships, patrol craft, work boats, planing craft and yachts. The book is aimed at a broad readership including practising naval architects and marine engineers, seagoing officers, small craft designers, undergraduate and postgraduate students. Also useful for those involved in transportation, transport efficiency and ecologistics who need to carry out reliable estimates of ship power requirements.
