Contemporary Management Accounting Practices in UK Manufacturing - David Dugdale 2005-11-15

This report investigates the presentation and analysis of financial information in 41 UK Manufacturing

companies. Traditional and contemporary accounting techniques are exemplified in the case studies. With old and new techniques explored, the research shows that there is little that is new in management accounting theory and practice. The study concludes that there is not one set of practices which all should follow. ·Cima research report - reveals methods currently used for reporting financial information in UK manufacturing companies. ·Based on 41 companies, it shows a rich diversity of reporting practices that are constrained neither by the financial accounting requirements of SSAP9 nor by any sense of general management accounting trends. ·Financial Directors choose from a toolkit of 'traditional' and 'contemporary' practices in constructing reporting systems appropriate to their varied commercial needs, but with a strong leaning towards contribution margin approaches.

*Advanced Planning in Fresh Food Industries* - Matthias Lütke Entrup 2006-03-30

Production planning in fresh food industries is a challenging task. Although modern Advanced Planning and Scheduling (APS) systems could provide significant support, APS implementation numbers in these industries remain low. Therefore, based on an in-depth analysis of three sample fresh food industries (dairy, fresh and processed meat), the author evaluates what APS systems should offer in order to effectively support production planning and how the leading systems currently handle the most distinguishing characteristic of fresh food industries, the short product shelf life. Starting from the identified weaknesses, customized software solutions for each of the sample industries are proposed that allow to optimize the production of fresh foods with respect to shelf life. The book thereby offers valuable insights not only to researchers but also to software providers of APS systems and professionals from fresh food industries.

*Crowley's Producers' Bulletin* - 1937
