Demand Driven Material Requirements Planning - Carol Ptak 2018-02-15

In the 1950s, a method called Material Requirements Planning (or "MRP") changed the world of manufacturing forever. But times have changed--customer tolerance times are shorter, product variety and complexity has increased, and supply chains have spread around the world. MRP is dramatically failing in this "New Normal." Demand Driven Material Requirements Planning (DDMRP), Version 2 presents a practical, proven, and emerging method for supply chain planning and execution that effectively brings the 1950s concept into the modern era. The foundation of DDMRP is based upon the connection between the creation, protection, and acceleration of the flow of relevant materials and information to drive returns on asset performance in the New Normal. Using an innovative multi-echelon

"Position, Protect and Pull" approach, DDMRP helps plan and manage inventories and materials in today's more complex supply scenarios, with attention being paid to ownership, the market, engineering, sales, and the supply base. It enables a company to decouple forecast error from supply order generation and build in line to actual market requirements, and promotes better and quicker decisions and actions at the planning and execution level. DDMRP is already in use by MAJOR Global 1000 companies. This book is THE definitive work on DDMRP, and will be required as courseware for all those taking the Certified Demand Driven Planner (CDDP) Program. New Features in Version 2 Completely new Chapter 13, introducing the Demand Driven Adaptive Enterprise (DDAE) Model New Appendix E: The Innovations of DDMRP New and revised graphics scattered throughout the book

Process Improvement for Effective Budgeting and Financial Reporting - Nils H. Rasmussen 2003-06-17

"The budget and financial reporting processes are well known sources of frustration for most CFOs. Seeking a quick fix to the problem, the common solution is to pour more money into new and better software. This leaves the root cause, the inefficient and dysfunctional underlying processes and routines, unaddressed. As this book shows, substantial and sustainable improvements are only achieved through an holistic approach to process improvement, technology, strategy, and people."

—Tom Henry Knudsen, Executive Vice President, Telenor EiendomFornebu AS, Proven methods for improving efficiency

Corporations face a high turnover among financial managers, rapid changes in technology, lack of time and process redesign skills, and ongoing ambiguity about primary objectives behind the budgeting and financial reporting processes. Amid this frenzy, it is the fundamental efficiency of these processes that dramatically impact overall business performance. *Process Improvement for Effective Budgeting and Financial Reporting* provides financial managers with a compelling blueprint for increasing efficiency and eliminating waste of time and energy. Four operational experts layout an 80/20 plan—improving 80% of processes in 20% of the time it would take to improve 100%—and explain a Business Process Improvement (BPI) plan that incorporates: The emerging trends affecting financial managers today Step-by-step process implementation Interviews with industry leaders, consultants, and managers who have

Four Eternal Women - Mary Dian Molton 2011

Toni Wolff was at first the patient, and later the friend, mistress for a time, long-term colleague and personal analyst of Swiss Psychiatrist Carl Jung. In addition to her work as the founder, leader and teacher for the Psychological Society in Zurich which led to the establishment of the world-renowned C.G. Jung Institute in Zurich/Konstanz, she published a seminal but little known work called "Structural Forms of the Feminine Psyche" ("Der Psychologie," Berne, 1951). This treatise, certainly one of the first studies in Analytical Psychology, has been the subject of the authors' investigation, attention, research and study for the past twelve years. Toni Wolff's original outline of her four archetypes barely filled fifteen pages of the journal, and was written in the academic style of professional

publications of that period, sans illustration or commentary. While Wolff's work has been mentioned in short form in the work of several writers, Four Eternal Women is the first full and serious archetypal delineation of her original thesis, and examines each of her four feminine archetypes from several perspectives: Wolff's Own Words; An Overview of History and Myth; Familiar Characteristics; Lesser-Known (Shadow) Possibilities; Career Inclinations; Relationships to Men; Relationships to Children; Relationships to Each of the Other Types; The tension of the opposites set up by Wolff's own diagrammatic representation of these archetypes provided an additional dynamic to this study. Those who have followed Jung's individuation path will recognize aspects of Jung's 'Transcendent Function.' All readers may well become personally sensitized to discover their own type preferences, and how some aspects of shadow may be present in their 'opposite' partner.
