Into the Magic Shop - James R. Doty, MD

2017-02-14

The award-winning New York Times bestseller about the extraordinary things that can happen when we harness the power of both the brain and the heart Growing up in the high desert of California, Jim Doty was poor, with an alcoholic father and a mother chronically depressed and paralyzed by a stroke. Today he is the director of the Center for Compassion and Altruism Research and Education (CCARE) at Stanford University, of which the Dalai Lama is a founding benefactor. But back then his life was at a dead end until at twelve he wandered into a

magic shop looking for a plastic thumb. Instead he met Ruth, a woman who taught him a series of exercises to ease his own suffering and manifest his greatest desires. Her final mandate was that he keep his heart open and teach these techniques to others. She gave him his first glimpse of the unique relationship between the brain and the heart. Doty would go on to put Ruth's practices to work with extraordinary results—power and wealth that he could only imagine as a twelve-year-old, riding his orange Sting-Ray bike. But he neglects Ruth's most important lesson, to keep his heart open, with disastrous results—until he has the opportunity to make a spectacular charitable contribution that will virtually ruin him. Part memoir, part science, part inspiration, and part practical instruction, *Into the Magic Shop* shows us how we can fundamentally change our lives by first changing our brains and our hearts.

You create both pain and pleasure in quick succession and some times in one sentence like ' You look good but your hair could have been better'. Most guys there focus only on pleasure and fail to deliver emotional ups and downs, which women crave". Read one more about 'Rules of texting' "vii. Never be too available. The Beat of Life - Reinhard Friedl 2021-02-02

The heart is our most important organ and perhaps our most mysterious. Every day it pumps 9000 litres of blood and beats around 100,000 times. But the heart is more than just a pump. In all major human cultures, it is seen as the source of love, sympathy, joy, courage, strength and wisdom. Why is this so? Having witnessed the extraordinary complexity and unpredictability of human hearts in the operating theatre - each one individual in its make-up, like a fingerprint - heart surgeon Reinhard Friedl went on a search for answers. He examined closely the latest findings in neurocardiology and psychocardiology, and in *The Beat of Life* he shares his discoveries. In the tradition of Giulia Enders' *Gut* and Norman Doidge's *The Brain That Changes Itself*, he uses riveting personal stories to illustrate the complex relationship between the heart, the brain and the psyche. *The Beat of Life* ends with a plea: that we recognise the heart's wisdom and adopt a more heart-centred way of living, which will lead to greater health.
