Watching for Dolphins - David Constantine 1983
David Constantine's second book shows a remarkable development in the range and power of his poetry. After establishing his reputation with the quiet but resonant poems of *A Brightness to Cast Shadows* (1980), Constantine has gone on to achieve a classical mastery of form and to further develop a highly individual voice, which now has an almost visionary edge. In the poems and related Greek translations of *Watching for Dolphins* David Constantine recreates a complete imaginative world.

Mythical and biblical figures - Christ, Lazarus, Aphrodite and Persephone - appear as opposing forces of Christian compassion and classical excellence. Contrasts and contradictions are at the heart of Constantine's poetic world. The possibility of personal happiness is insisted upon: any wider optimism would be out of place.

The First 20 Hours - Josh Kaufman 2013-06-13
Forget the 10,000 hour rule— what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how

many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time . . . and have more fun along

the way.

Ourselves - Charlotte Mason 2013-05-20

Ourselves, the fourth volume of Charlotte Mason's Classic Homeschooling Series, is a character curriculum book written directly to children. Book I, *Self-Knowledge*, is for elementary school students; Book II, *Self-Direction*, is for older students. *Self-Knowledge* discusses our human desires and appetites; the "helpers" in our minds, such as intellect, sense of beauty, imagination, and reason; the ways in which we feel and express love for others, including sympathy, kindness, generosity, gratitude, courage, loyalty, and humility; and truth, justice, and integrity; and ends by encouraging children to develop the habit of being useful. *Self-Direction* is an in-depth discussion of the conscience and virtues such as temperance, chastity, fortitude, and prudence; the will and self-control; and the soul and its capacities, such as prayer, thanksgiving, faith, and praise. Charlotte Mason was a late nineteenth-century British educator whose ideas were far ahead of her time. She believed that children are born persons worthy of respect, rather than blank slates, and that it was better to feed their growing minds with living literature and vital ideas and knowledge, rather than dry facts and knowledge filtered and pre-digested by the teacher. Her method of education, still used by some private schools and many homeschooling families, is gentle and flexible, especially with younger children, and includes first-hand exposure to great and noble ideas through books in each school subject, conveying wonder and arousing curiosity, and through reflection upon great art, music, and poetry; nature observation as the primary means of early science teaching; use of manipulatives and real-life application to understand mathematical concepts and learning to reason, rather than

rote memorization and working endless sums; and an emphasis on character and on cultivating and maintaining good personal habits. Schooling is teacher-directed, not child-led, but school time should be short enough to a

Life-Study of John - Witness Lee 1985-05-01

In the Lord's recovery during the past five hundred years the church's knowledge of the Lord and His truth has been continually progressing. This monumental and classical work by Brother Witness Lee builds upon and is a further development of all that the Lord has revealed to His church in the past centuries. It is filled with the revelation concerning the processed Triune God, the living Christ, the life-giving Spirit, the experience of life, and the definition and practice of the church. In this set Brother Lee has kept three basic principles that should rule and govern every believer in their interpretation, development, and expounding of the truths contained in the Scriptures. The first principle is that of the Triune God dispensing Himself into His chosen and redeemed people; the second principle is that we should interpret, develop, and expound the truths contained in the Bible with Christ for the church; and the third governing principle is Christ, the Spirit, life, and the church. No other study or exposition of the New Testament conveys the life nourishment or ushers the reader into the divine revelation of God's holy Word according to His New Testament economy as this one does.

How People Learn II - National Academies of Sciences, Engineering, and Medicine 2018-09-27

There are many reasons to be curious about the way people learn, and the past several decades have seen an explosion of research that has important implications for individual learning, schooling, workforce training, and policy. In 2000, *How People Learn: Brain, Mind, Experience, and School: Expanded Edition* was published and its influence has been wide and deep. The report summarized insights on the nature of learning in school-aged children; described principles for the design of effective learning environments; and provided examples of how that could be implemented in the classroom. Since then, researchers have continued to investigate the nature of learning and have generated new findings related to the

neurological processes involved in learning, individual and cultural variability related to learning, and educational technologies. In addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan, there have been important discoveries about influences on learning, particularly sociocultural factors and the structure of learning environments. How People Learn II: Learners, Contexts, and Cultures provides a much-needed update incorporating insights gained from this research over the past decade. The book expands on the foundation laid out in the 2000 report and takes an in-depth look at the constellation of influences that affect individual learning. How People Learn II will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults.

The Sufi Message Volume 2 - Hazrat Inayat Khan 2009-01-01

The Mysticism of Music, Sound and Word presents an essential part of the highly practical philosophy of Hazrat Inayat Khan. Born a musician, music and sound were for him the essence of life. Even when later he had to give up his practice of what in Indian philosophy is called struck music, the unstruck music remained with him, and increasingly so. Not only did he enjoy it in his meditations and all through life, whether in silent nature or in the roaring streets of Manhattan. In its fullness, it came out in his discourses and other presentations he made to the amazed and yet not fully understanding public of the West in the twenties. His realization of sound and music transformed his words into living beings, attuning the atmosphere, bringing inspiration to the public. This volume presents various aspects of his music. It contains four parts. In the Mysticism of Sound, the basic philosophy is given in a wide context. Both the abstract and some very practical aspects are covered. Music presents the mystic aspects of music besides relating its philosophy to the practical side again. It presents a beautiful early view of Indian music and it relates music and colour. Moreover, the psychic and healing powers are discussed. The Power of the Word and Cosmic Language elaborates these influences both philosophically and practically. The book really may be called mysticism in daily life.
