Rabbit - Patricia Williams 2017-08-22
Finalist for an NAACP Image Award for
Outstanding Literature Finalist for a 2018
Southern Book Prize for Biography and History
"I pounced on [Ms. Pat's] book. And I thought

she did such a great job...God, [Rabbit] was entertaining. And I recommended it to so many people." —David Sedaris, author of the New York Times bestseller Calypso "An absolute must-read" - Shondaland "[Rabbit] tells how it went down with brutal honesty and outrageous humor" - New York Times "I know a lot of

people think they know what it's like to grow up in the hood. Like maybe they watched a couple of seasons of The Wire and they got the shit all figured out. But TV doesn't tell the whole story." - Ms. Pat They called her Rabbit. Patricia Williams (aka Ms. Pat) was born and raised in Atlanta at the height of the crack epidemic. One of five children, Pat watched as her mother struggled to get by on charity, cons, and petty crimes. At age seven, Pat was taught to roll drunks for money. At twelve, she was targeted for sex by a man eight years her senior. By thirteen, she was pregnant. By fifteen, Pat was a mother of two. Alone at sixteen, Pat was determined to make a better life for her children. But with no job skills and an eighth-grade education, her options were limited. She learned quickly that hustling and humor were the only tools she had to survive. Rabbit is an unflinching memoir of cinematic scope and unexpected humor. With wisdom and humor, Pat gives us a rare glimpse of what it's really like to

be a black mom in America.

Impianti elettrici e speciali negli edifici -

Giuseppe Gustavo Quaranta 2014-06

Scopo principale dell'opera è quello di rispondere ai quesiti su come si affronta la progettazione elettrica e quale documentazione fornire a un committente, pubblico e privato sulla base della Guida CEI 0-2. L'opera, innovativa nel suo genere, a partire dall'esperienza trentennale dell'autore come progettista, collaudatore e direttore lavori, illustra con un linguaggio scientifico e chiaro tutte le più importanti problematiche e le procedure di approccio alla progettazione degli impianti elettrici in bassa tensione, con una particolare attenzione anche agli impianti speciali e a quelli di home e building automation e alla loro integrazione nell'edificio. Il volume si rivolge pertanto a tutte quelle figure che per formazione e professione devono oggi disporre di competenze aggiornate per realizzare e documentare un progetto. In particolare, si

rivolge a progettisti e installatori d'impianti, a uffici tecnici delle imprese di installazione, senza dimenticare i laureandi in ingegneria elettrica, e gli studenti e professori d'istituti tecnici e professionali. Il libro è composto da 16 capitoli ed è diviso in 4 parti in cui: affronta gli aspetti metodologici e i criteri per il dimensionamento degli impianti; illustra i nuovi servizi e le nuove tecnologie per l'abitazione e l'edificio, con un capitolo interamente dedicato all'home e building automation; illustra e commenta la guida CEI 0-2 per la predisposizione degli elaborati di progetto e la normativa per le verifiche periodiche di sicurezza (DPR 462/2001); fornisce e sviluppa la progettazione e la documentazione di progetto dell'impianto elettrico di un fabbricato destinato a edilizia residenziale. Sono state sviluppate, inoltre, considerazioni circa l'evoluzione del mercato dei prossimi anni, le competenze richieste e le nuove figure professionali che vengono a determinarsi nel settore delle nuove tecnologie, con un

capitolo dedicato alle problematiche connesse allo svolgimento dell'attività professionale per poter garantire un servizio di progettazione di qualità con costi competitivi. Giuseppe Gustavo Quaranta, già autore di diversi libri, ingegnere libero professionista, progettista di impianti elettrici e domotici, componente del Sottocomitato Tecnico 64-D del CEI "Interpretazione normativa". Coordinatore della Commissione di studio "Sistemi elettrici ed elettronici" del Collegio degli Ingegneri e Architetti di Milano, è stato cultore della materia d'impianti elettrici presso la facoltà d'ingegneria del Politecnico di Milano - Dipartimento BEST-Building Environment Science & Technology- corso di progettazione edilizia integrata per gli studenti del 5° anno del corso d'ingegneria civile edile. Hark - Sam Lipsyte 2020-01-21

An "extremely funny...brilliantly alive" (The New York Times Book Review) social satire of the highest order from bestselling author Sam Lipsyte, centered around an unwitting mindfulness guru and the phenomenon he initiates. In an America convulsed by political upheaval, cultural discord, environmental catastrophe, and spiritual confusion, so many of

us find ourselves anxious and distracted, searching desperately for peace, salvation, and—perhaps most immediately—just a little damn focus. Enter Hark Morner, a failed stand-up comic turned mindfulness guru whose revolutionary program is set to captivate the masses. But for Fraz and Tovah, a middle-aged couple slogging through a very rough patch, it may take more than the tenets of Hark's "Mental Archery" to solve the riddles of love, lust, work, and parenthood on the eve of civilizational collapse. And given the sudden power of certain fringe players, including a renegade Ivy League ethicist, a gentle Swedish kidnapper, a social media tycoon with an empire on the skids, and a mysteriously influential (but undeniably slimy) catfish, it just might be too late. But what's the point of a world, even a blasted-out post-apocalyptic world, if they don't try with all their might to keep their marriage alive? In this "awfully funny...tartly effective sendup of 21st-century America" (Star Tribune, Minneapolis)

Sam Lipsyte reaches new peaks of daring in a novel that revels in contemporary absurdity and the wild poetry of everyday language while exploring the emotional truths of his characters. "Recommended reading" (Vanity Fair), in which "every line feels as thrillingly charged as a live wire" (O, The Oprah Magazine), Hark is a smart, incisive look at men, women, and children seeking meaning and dignity in a chaotic, ridiculous, and often dangerous world.

How We Reason - Philip Johnson-Laird
2008-10-23

Good reasoning can lead to success; bad reasoning can lead to catastrophe. Yet, it's not obvious how we reason, and why we make mistakes - so much of our mental life goes on outside our awareness. In recent years huge strides have been made into developing a scientific understanding of reasoning. This new book by one of the pioneers of the field, Philip

Johnson-Laird, looks at the mental processes that underlie our reasoning. It provides the most accessible account yet of the science of reasoning. We can all reason from our childhood onwards - but how? 'How we reason' outlines a bold approach to understanding reasoning. According to this approach, we don't rely on the laws of logic or probability - we reason by thinking about what's possible, we reason by seeing what is common to the possibilities. As the book shows, this approach can answer many of the questions about how we reason, and what causes mistakes in our reasoning that can lead to disasters such as Chernobyl. It shows why our irrational fears may become psychological illnesses, why terrorists develop 'crazy' ideologies, and how we can act in order to improve our reasoning. The book ends by looking at the role of reasoning in three extraordinary case histories: the Wright brothers' use of analogies in inventing their flyer, the cryptanalysts' deductions in breaking

the German's Enigma code in World War II, and Dr. John Snow's inductive reasoning in discovering how cholera spread from one person to another. Accessible, stimulating, and controversial, How we Reason presents a bold new approach to understanding one of the most intriguing facets of being human.
