Public Examinations Examined - Thomas Kellaghan 2019-11-19

High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and

how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment.

Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with

certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. "This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as "the diploma disease" takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog." Angela W. Little, Professor Emerita, Institute of Education, University College London "This book is very well

structured and written and draws on the authors' remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings.†? Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning "I am sure that Public Examinations Examined, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations.†? Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation

The Expanding Earth - S.W. Carey 2013-10-22
Developments in Geotectonics, 10: The Expanding Earth focuses on the principles, methodologies, transformations, and approaches involved in the expanding earth concept. The book first elaborates on the development of the expanding earth concept, necessity for expansion, and the subduction myth. Discussions focus on higher velocity under Benioff zone, seismic attenuation, blue schists and paired metamorphic belts, dispersion of polygons, arctic paradox, and kinematic contrast. The manuscript then ponders on the scale of tectonic phenomena, non-uniformitarianism, tectonic profiles, and paleomagnetism. Concerns cover global paleomagnetism, general summary of the tectonic profile, implosions, fluid pressures, pure shear, crustal extension, simple shear with

horizontal axis, geological examples of scale fields, and length-time fields of deformation. The publication explores the cause of expansion, modes of crustal extension, and rotation and asymmetry of the earth, including dynamic asymmetry, precessions, nutations, librations, and wobbles at fixed obliquity, variation of rate of rotation, and categories of submarine ridges. The text is a dependable source of data for researchers wanting to study the concept of expanding earth.

Fruit and vegetables - your dietary essentials - Food and Agriculture Organization of the United Nations 2020-12-15

The International Year of Fruits and Vegetables 2021 (IYFV), as declared by the UN General Assembly in Resolution A/RES/74/244, aims at raising awareness of, directing policy attention to, and sharing good practices on the nutritional and health benefits of fruit and vegetable consumption, the contribution of fruit and vegetable consumption to the promotion of

diversified, balanced and healthy diets and lifestyles, and reducing loss and waste of fruits and vegetables. This background paper outlines the benefits of fruit and vegetable consumption, but also examines the various aspects of the fruit and vegetable sector from a food systems approach: from sustainable production and trade to loss and waste management. This paper provides an overview of the sector and a framework and a starting point for discussion for the Year, highlighting the interlinkages of stakeholders and key issues to be considered for action during the IYFV.

Economic Geography - Sharmistha Bagchi-Sen
2006-09-27

The impact of economic geography both within and beyond the wider field of geography has been constrained in the past by its own limitations. Drawing together the work of several eminent geographers this superb collection assesses the current state of knowledge in the sub discipline and its future

direction. In doing so, the contributors show how economic geographers have offered explanations that affect places and lives in the broader context of the global economy. Offering a discussion of theoretical constructs and methodologies with the purpose to show the need to combine different approaches in understanding spatial (inter) dependencies, contributors also demonstrate the need to engage with multiple audiences, and within this context they proceed to examine how geographers have interfaced with businesses and policy. This excellent collection moves economic geography from a preoccupation with theory towards more rigorous empirical research with greater relevance for public policy. With excellent breadth of coverage, it provides an outstanding introduction to research topics and approaches.

Studio Thinking 2 - Lois Hetland 2015-04-24

" The first edition of this bestseller was featured in The New York Times and The Boston Globe for its groundbreaking research on the positive effects of art education on student learning across the curriculum. Capitalizing on observations and conversations with educators who have used the Studio Thinking Framework in diverse settings, this expanded edition features new material, including: The addition of Exhibitions as a fourth Studio Structure for Learning (along with Demonstration-Lecture,

Students-at-Work, and Critique). Explanation and examples of the dispositional elements of each Habit, including skill, alertness (noticing appropriate times to put skills to use), and inclination (the drive or motivation to employ skills). A chart aligning Habits to the English Language Arts and Mathematics Common Core. Descriptions of how the Framework has been used inside and outside of schools in curriculum planning, teaching, and assessment across arts and non-arts disciplines. A full-color insert with new examples of student art. Studio Thinking 2 will help advocates explain arts education to policymakers, help art teachers develop and refine their teaching and assessment practices, and assist educators in other disciplines to learn from existing practices in arts education. Lois Hetland is professor and chair of art education at Massachusetts College of Art and Design and senior research affiliate at Project Zero, Harvard Graduate School of Education. Ellen Winner is professor and chair of psychology at Boston

College and a senior research associate at Project Zero. Shirley Veenemais an instructor in visual arts at Phillips Academy in Andover, Massachusetts. Kimberly M. Sheridan is an assistant professor in the College of Education and Human Development and the College of Visual and Performing Arts at George Mason University. "Our decade of using the Studio Thinking Framework in California's schools positions us for success in this new era because of the foundation of reflective, creative, and critical thinking developed in our schools and districts." —From the Foreword to the Second Edition by Louise Music, Executive Director of Integrated Learning, Alameda County Office of Education, Hayward, CA "Studio Thinking [is] a vision not only of learning in the arts but what could be learning most anywhere." —From the Foreword to the First Edition by David N. Perkins, Professor of Education, Harvard Graduate School of Education, and Senior Co-Director of Harvard Project Zero Praise for the

First Edition of *Studio Thinking*— “Winner and Hetland have set out to show what it means to take education in the arts seriously, in its own right.” —The New York Times “This book is very educational and would be helpful to art teachers in promoting quality teaching in their classrooms.” —School Arts Magazine “*Studio Thinking* is a major contribution to the field.” —Arts & Learning Review “The research in *Studio Thinking* is groundbreaking and important because it is anchored in the actual practice of teaching artists.... The ideas in *Studio Thinking* continue to provide a vehicle with which to navigate and understand the complex work in which we are all engaged.” —Teaching Artists Journal “Hetland and her colleagues reveal dozens of practical measures that could be adopted by any arts program, inside or outside of the school.... This is a bold new step in arts education.” —David R. Olson, Professor Emeritus, University of Toronto “Will be at the

top of the list of essential texts in arts education. I know of no other work in art education with this combination of authenticity and insight.” —Lars Lindström, Stockholm Institute of Education “The eight studio habits of mind should become a conceptual framework for all preservice art education programs; this book should be read by all early and experienced art educators.” —Mary Ann Stankiewicz, The Pennsylvania State University "
