Somewhere in Baghdad is the mysterious "Jericho," the traitor who is willing—for a price—to reveal what is going on in the high councils of the Iraqi dictator. Peopled with vivid characters, brilliantly displaying Forsyth's incomparable, knowledge of intelligence operations and tradecraft, moving back and forth between Washington and London, Baghdad and Kuwait, desert vastnesses and city bazaars, this breathtaking novel is an utterly convincing story of what may actually have happened behind the headlines.

Still Life with Cars - John L. Lumley 2005-06-30

Most childhood fascinations are a passing fancy, but something about cars tends to capture the imagination forever. Witness the countless backyard weed-wrapped classics, rusted just shy of a shadow, slated one day for a return to glory; cloudy vacation memories of choking exhaust, deafening engines and blinding chrome; countless white-knuckled highway moments as the driver faces backwards to better glimpse some passing oddity spotted four lanes over. Somehow, cars have a way of getting into a kid's blood. Any chronic condition requires a lifetime of maintenance. John Lumley caught the fever early—likely from a midnight blue Hudson—and it's been with him ever since. This engaging memoir follows a life spent nursing an obsession with cars, fitting for a son of Detroit's heyday. With occasional play in the garage of the Ford estate and an excursion to see Buckminster Fuller's three-wheeled Dymaxion among his earliest memories, John Lumley's enduring love of cars is no surprise. From those childhood adventures followed a lifetime spent elbow-deep in engines—Nash, Hupmobile, Mercury, Citroën, Triumph, Volkswagen, Lagonda, Armstrong-Siddeley, Bentley and more, many of them pictured. Though his career was devoted to loftier pursuits, the grease beneath his nails perhaps best sums up Lumley's lifelong love. Fifty-eight photographs and an index accompany the text.

The History and Future of Technology - Robert U. Ayres 2021

Eminent physicist and economist, Robert Ayres, examines the history of technology as a change agent in society, focusing on societal roots rather than technology as an autonomous, self-perpetuating phenomenon. With rare exceptions, technology is developed in response to societal needs that have

evolutionary roots and causes. In our genus *Homo*, language evolved in response to a need for our ancestors to communicate, both in the moment, and to posterity. A band of hunters had no chance in competition with predators that were larger and faster without this type of organization, which eventually gave birth to writing and music. The steam engine did not leap fully formed from the brain of James Watt. It evolved from a need to pump water out of coal mines, driven by a need to burn coal instead of firewood, in turn due to deforestation. Later, the steam engine made machines and mechanization possible. Even quite simple machines increased human productivity by a factor of hundreds, if not thousands. That was the Industrial Revolution. If we count electricity and the automobile as a second industrial revolution, and the digital computer as the beginning of a third, the world is now on the cusp of a fourth revolution led by microbiology. These industrial revolutions have benefited many in the short term, but devastated the Earth's ecosystems. Can technology save the human race from the catastrophic consequences of its past success? That is the question this book will try to answer.

Of Green Illusions - Clifton Lopez 2012-07

He stood on the ledge of the great Cauldarian range looking down at his hand in which he held a rock. The beauty of it was overpowering, its green opaque luminescence made him feel falsely at ease. But he knew this was an object of beauty that no Cauldarian should possess. The stone represented the dark side of history. The ideological faith and power that emanated from it could also be used for good. But its efficacy was wielded as if it were a sword striking at every aspect of the populace's freedom. So far its thrust proved deadly in every instance. It had to be thrown over the ledge and into the night if his people were to survive. Michael had awakened from this same dream that he had many times before. It was as if it were only yesterday that his world had changed; it was different, but in many ways it was still the same...
