Economy, Society and Public Policy - Core Espp Team
2019-09-18

In order to be well-governed, a democracy needs voters who are fluent in the language of economics and who can do some quantitative analysis of social and economic policy. We also need a well-trained cadre of researchers and journalists

who have more advanced skills in these fields. Many students in other disciplines are drawn to economics so that they can engage with policy debates on environmental sustainability, inequality, the future of work, financial instability, and innovation. But, when they begin the study of economics, they find that courses appear to have little to do with these pressing policy matters, and are designed primarily for students who want to study the subject as their major, or even for those destined to go on to post-graduate study in the field. The result: policy-oriented students often find they have to choose between a quantitative and analytical course of study - economics - that is only minimally policy oriented in content and that downplays the insights of other disciplines, or a policy and problem-oriented course of study that gives them little training in modelling or quantitative scientific methods. **Economy, Society, and Public Policy** changes this. It has been created specifically for

students from social science, public policy, business studies, engineering, biology, and other disciplines who are not economics majors. If you are one of these students, we want to engage, challenge, and empower you with an understanding of economics. We hope you will acquire the tools to articulate reasoned views on pressing policy problems. You may even decide to take more courses in economics as a result. The book is also being used successfully in courses for economics, business, and public policy majors, as well as in economics modules for masters' courses in Public Policy and in Philosophy, Politics and Economics (PPE). This textbook--the print complement to CORE's open-access online eBook--is the result of a worldwide collaboration among researchers, educators, and students who are committed to bringing the socially relevant insights of economics to a broader audience.

Report of the Mid Staffordshire NHS Foundation Trust Public Inquiry - Mid Staffordshire NHS Foundation Trust Public Inquiry 2013-02-06

This public inquiry report into serious failings in healthcare that took place at the Mid Staffordshire NHS Foundation Trust builds on the first independent report published in February 2010 (ISBN 9780102964394). It further examines the suffering of patients caused by failures by the Trust: there was a failure to listen to its patients and staff or ensure correction of

deficiencies. There was also a failure to tackle the insidious negative culture involving poor standards and a disengagement from managerial and leadership responsibilities. These failures are in part a consequence of allowing a focus on reaching national access targets, achieving financial balance and seeking foundation trust status at the cost of delivering acceptable care standards. Further, the checks and balances that operate within the NHS system should have prevented the serious systemic failure that developed at Mid Staffs. The system failed in its primary duty to protect patients and maintain confidence in the healthcare system. This report identifies numerous warning signs that could and should have alerted the system to problems developing at the Trust. It also sets out 290 recommendations grouped around: (i) putting the patient first; (ii) developing a set of fundamental standards, easily understood and accepted by patients; (iii) providing

professionally endorsed and evidence-based means of compliance of standards that are understood and adopted by staff; (iv) ensuring openness, transparency and candour throughout system; (v) policing of these standards by the healthcare regulator; (vi) making all those who provide care for patients , properly accountable; (vii) enhancing recruitment, education, training and support of all key contributors to the provision of healthcare; (viii) developing and sharing ever improving means of measuring and understanding the performance of individual professionals, teams, units and provider organisations for the patients, the public, and other stakeholders.

Bee Gees - Michael O'Neill 2021-11

This is the incredible illustrated story of the Bee Gees, the band that Barry, Maurice and Robin, the brothers Gibb, formed in 1958. The trio were especially successful as a popular music act in the late 1960s and early 1970s, and later as prominent performers of the disco music era in the mid-to-late 1970s with the soundtrack album 'Saturday Night Fever'. The group sang recognisable three-part tight harmonies; Robin's clear vibrato lead vocals was the hallmark of their earlier hits, while Barry's R&B falsetto

became their signature sound during the mid-to-late 1970s and 1980s. The Bee Gees have sold over 120 million records worldwide making them one of the world's best-selling artists of all time. The boys also wrote all of their own hits, as well as writing and producing several major hits for other artists. They were inducted into the Rock and Roll Hall of Fame in 1997. The Bee Gees' Hall of Fame citation says, "Only Elvis Presley, the Beatles, Michael Jackson, Garth Brooks and Paul McCartney have out sold the Bee Gees." Following Maurice's death in January 2003 at the age of 53, Barry and Robin retired the group's name after 45 years of activity.
