Drilling Engineering Problems and Solutions - M. E. Hossain 2018-06-27

Petroleum and natural gas still remain the single biggest resource for energy on earth. Even as alternative and renewable sources are developed, petroleum and natural gas continue to be, by far, the most used and, if engineered properly, the most cost-effective and efficient, source of energy on the planet. Drilling engineering is one of the most important links in the energy chain, being, after all, the science of getting the resources out of the ground for processing. Without drilling engineering, there would be no gasoline, jet fuel, and the myriad of other “have to have” products that people use all

over the world every day. Following up on their previous books, also available from Wiley-Scrivener, the authors, two of the most well-respected, prolific, and progressive drilling engineers in the industry, offer this groundbreaking volume. They cover the basic tenets of drilling engineering, the most common problems that the drilling engineer faces day to day, and cutting-edge new technology and processes through their unique lens. Written to reflect the new, changing world that we live in, this fascinating new volume offers a treasure of knowledge for the veteran engineer, new hire, or student. This book is an excellent resource for petroleum engineering students, reservoir engineers, supervisors & managers, researchers and environmental engineers for planning every aspect of rig operations in the most sustainable, environmentally responsible manner, using the most up-to-date technological advancements in equipment and processes.

[Adnan's Story](#) - Rabia Chaudry 2016-08-09

Now a New York Times bestseller and a major docuseries The 2017 American Book Award Winner from the Before Columbus Foundation A Washington Post notable nonfiction book for 2016 A Goodreads Best of 2016 Nonfiction Finalist A Kobo Best Book of 2016 Includes an update from Rabia on Adnan's vacated murder conviction in summer 2016 Serial only told part of the story... In early 2000, Adnan Syed was convicted and sentenced to life plus thirty years for the murder of his ex-girlfriend Hae Min Lee, a high school senior in Baltimore, Maryland. Syed has maintained his innocence, and Rabia Chaudry, a family friend, has always believed

him. By 2013, after almost all appeals had been exhausted, Rabia contacted Sarah Koenig, a producer at This American Life, in hopes of finding a journalist who could shed light on Adnan's story. In 2014, Koenig's investigation turned into Serial, a Peabody Award-winning podcast with more than 500 million international listeners. But Serial did not tell the whole story. In this compelling narrative, Rabia Chaudry presents new key evidence that she maintains dismantles the State's case: a potential new suspect, forensics indicating Hae was killed and kept somewhere for almost half a day, and documentation withheld by the State that destroys the cell phone evidence -- among many other points -- and she shows how fans of Serial joined a crowd-sourced investigation into a case riddled with errors and strange twists. Adnan's Story also shares Adnan's life in prison, and weaves in his personal reflections, including never-before-seen letters. Chaudry, who is committed to exonerating Adnan, makes it clear

that justice is yet to be achieved in this much examined case.
