You will gain an understanding of the opening and the middlegames to which it leads, enabling you to find the right moves and plans in your own games. It is as if you were sitting at the board with a chess coach answering your questions about the plans for both sides, the ideas behind particular moves, and what specific knowledge you need to have. The Classical Sicilian is one of the most popular and respected systems of the Sicilian, and has been used frequently by players such as Anand, Kramnik and Shirov. Black develops his pieces more quickly than in many Sicilian systems, and intricate piece-play often results. The Classical Sicilian arises after the moves 1 e4 c5 2 Nf3 d6 3 d4 cxd4 4 Nxd4 Nf6 5 Nc3 Nc6. White's most popular and critical response is the Richter-Rauzer Attack, and recent years have seen a diversification in the plans for both sides in this perennially popular line. The idea of playing ...e5 in the Sicilian is an old one but the modern Sveshnikov treatment was developed in the 1970s, since when it has featured in the repertoires of numerous elite players. Sveshnikov vs the Anti-Sicilians - Evgeny Sveshnikov 2015-03-26

The Sicilian Defence is Black's most popular reply to 1.e4. Most black players hope to get an Open Sicilian because of its unbalanced play and interesting opportunities to play for a win. But what if White avoids the

Open Sicilian and does not play 2.Nf3? This happens more often than you would think, as in roughly one third of the cases White players opt for one of the numerous 'Anti-Sicilian' lines at their disposal. These Anti-Sicilians vary from primitive and obscure to wild and aggressive to respected but tedious. But they have one thing in common: they are all dragging Black into territory where he doesn't want to be, and where it is easy to get ambushed. Evgeny Sveshnikov offers help. The Russian grandmaster, who is one of the most respected chess opening experts in the world, presents practical and effective recipes against a broad range of annoying variations: 2.a3?, 2.Na3?!, 2.b4?!, 2.b3, 2.Nc3, 2.d3 and many others. In this book he discusses the backgrounds of openings, provides guidelines and explains in an instructive and accessible way the basic principles of a position. The Carlsen Variation - A New Anti-Sicilian - Carsten Hansen

Rattle your opponents from the get-go! How do you change the Sicilian Defense in your favor? The Sicilian Defense (1.e4 c5) contains countless variations and sub-variations that have been discussed in detail at all levels of play for many years. Even "small" specialized systems have been covered in exhaustive detail in book after book. That is why this book is unique, The Carlsen Variation, which arises after 1.e4 c5 2.Nc3 d6 3.d4 cxd4 4.Qxd4, has never previously been covered in detail before. The variation was uncorked by World Champion Magnus Carlsen in 2018 and has since been played by several other top grandmasters such as Fabiano Caruana, Hikaru Nakamura, and several others. Yet despite this attention, the theory of the variation is largely unexplored and this book

aims to set this discrepancy straight. Main lines are established and carefully analyzed with hundreds of new ideas and improvements

suggested along the way. For the reader, this book is an excellent resource to get the opponent out of their opponent's "book" into our book. Time to have some fun in the Sicilian - enjoy!
